Eating Healthy God's Way Chelsea Green Publishing

This book is about one man's successful quest to reverse his cardiovascular disease and his wife's stage 3 lung cancer in their own home without mainstream pharmaceuticals, chemotherapy, or radiation. Most importantly he describes the value of addressing ones overall health condition at a cellular level in order to avoid the lurking threat of developing any number of other diseases and conditions. While applying these therapies and procedures the only side effect ever noticed by the author and his wife appeared to be the gradual and steadily growing sense of good health. Although the author is not a licensed medical doctor, the therapies he and his wife strictly followed for heart disease and lung cancer are described here in full detail. You decide.

The coauthor of *Fit for Life* and a doctor who recovered from heart disease after being given a very limited life expectancy outlines a health-bolstering program for overweight and nutritionally deficient readers that focuses on reversing the signs of aging, incorporating convenience exercises and preventing disease. 75,000 first printing.

**Young For Life** Fair Winds Press (MA)

Imagine there was an easy way you could keep your heart strong, your mind sharp, and your body youthful. Imagine this program could keep you young, improve your sex life, prevent cancer

and heart disease, and keep your skin supple and wrinkle-free. And perhaps best of all, imagine this was something readily available at your local drugstore or natural food store. These and other benefits are the miraculous results of antioxidants. Lester Packer is the world's foremost authority on these natural healers. In *The Antioxidant Miracle*, he explains for the first time exactly how you can design a practical, personalized antioxidant program for disease prevention and optimal wellness. *The Antioxidant Miracle* is the first popular book to reveal the full range of healing benefits of lipoic acid, the most versatile and powerful antioxidant and nature's secret weapon in treating heart disease, cancer, diabetes, and liver disease. This breakthrough book also unveils the astonishing strength of the antioxidant network, the combination of vitamin E, vitamin C, lipoic acid, Co Q10, and glutathione that-when taken together in the proper amounts-battles disease and aging far more aggressively than supplements taken individually. After an accessible explanation of the science behind antioxidants, Packer and bestselling health writer Carol Colman show you how to develop your own state-of-the-art supplement regimen designed to keep your body strong, your brain at full speed, and your antioxidant network working at its peak. They include specialized supplement programs for smokers, diabetics, people with a family history of cancer or heart disease, menopausal women, athletes, and picky eaters. You'll find out how to incorporate antioxidant-rich foods easily into your diet and develop your own plan for smooth, healthy, young looking skin. And you'll discover the benefits of

"booster" antioxidants-bioflavonoids like ginkgo biloba and Pycnogenol-and others like beta carotene and selenium. The Antioxidant Miracle can enhance and extend your life. Make the antioxidant miracle work for you! Advance acclaim for The Antioxidant Miracle \* "Finally, a book by a renowned and active researcher that proves the value of nutritional supplements. The Antioxidant Miracle provides a shield protecting us from disease and ensuring health. The information in this book could save your life!" Julian Whitaker, M.D., Founder, Whitaker Wellness Institute and \* Editor of Health and Healing. "Life is like a candle flame, and antioxidants make it burn brighter and longer. Lester Packer is the keeper of the flame. For those of us seeking to combat the debility and diseases of aging, The Antioxidant Miracle is an essential tool.-William Regelson, M.D., Coauthor of the New York Times bestseller, The Melatonin Miracle "Any health-conscious person will want to read The Antioxidant Miracle. It makes the understanding of these miracle nutrients easy to comprehend and utilize in his or her everyday life.-Earl Mindell. Author of The Herb Bible, The Vitamin Bible, and The Supplement Bible.

"Trust me; I'm a doctor" no longer has the credibility it once did. Nutritional therapy is often overlooked in medical school, and the information provided to physicians is often outdated. Advice to avoid healthy fats and stay out of the sun has been proven to be detrimental to longevity and wreak havoc on your system, and yet many doctors still regularly espouse this "wisdom." What

kind of advice is your doctor giving you? Is it possible you're being misled? Dr. Ken Berry is here to dispel the myths and misinformation that have been perpetuated by the medical and food industries for decades. This updated and expanded edition of Dr. Berry's bestseller *Lies My Doctor Told Me* exposes the truth behind all kinds of "lies" told by well-meaning but misinformed medical practitioners. In this book, Dr. Berry will enlighten you about nutrition and life choices, their role in your health, and how to begin an educated conversation with your doctor about finding the right path for you. This book is a survival kit on your journey through the confusing, and often misleading, world of conventional medicine and includes such topics as • How doctors are taught to think about nutrition and other preventative health measures—and how they should be thinking • How the Food Pyramid and MyPlate came into existence and why they should change • The facts about fat intake and heart health • The truth about the effects of whole wheat on the human body • The role of dairy in your diet • The truth about salt—friend or foe? • The dangers and benefits of hormone therapy • New information about inflammation and how it should be viewed by doctors Come out of the darkness and let Ken Berry be your guide to optimal health and harmony! *The Cure for Heart Disease* Archway Publishing

One day, I saw large grey tufts in front of my eyes. At work, I decided something definitely happened to my handwriting. The letters became so very small, it was impossible for me to write them any larger. The following day, I stayed home and suffered a migraine. That evening my speech became slurred. My husband

wanted to take me to a doctor. I said no. When our doctor's surgery opened in the morning, we were waiting. They asked: Was I born on the 28th or the 29th? I simply did not know. He then drove me to the hospital, where I waited an eternity. I took out my lipstick, but could only apply it to the left side of my mouth, the right side being impossible to reach. They performed a CT scan and later in the evening I was informed I had a stroke and that parts of the right side of my brain, close to the speech centre, were destroyed. Darkness closed in on me, but then came the light. A large blood vessel was completely blocked. The blood platelets piled up on top of each other, more and more and more. This was my brain close to the speech centre. Would my brain be totally destroyed? How much can a person take? Would I be able to speak again? Was this actually death that I was experiencing? It felt like I was free. Consciousness left my body.

The revised and expanded edition of the bestseller that changed millions of lives. The science is clear. The results are unmistakable. You can dramatically reduce your risk of cancer, heart disease, and diabetes just by changing your diet. More than 30 years ago, nutrition researcher T. Colin Campbell and his team at Cornell, in partnership with teams in China and England, embarked upon the China Study, the most comprehensive study ever undertaken of the relationship between diet and the risk of developing disease. What they found when combined with findings in Colin's laboratory, opened their eyes to the dangers of a diet high in animal protein and the unparalleled

health benefits of a whole foods, plant-based diet. In 2005, Colin and his son Tom, now a physician, shared those findings with the world in *The China Study*, hailed as one of the most important books about diet and health ever written. Featuring brand new content, this heavily expanded edition of Colin and Tom's groundbreaking book includes the latest undeniable evidence of the power of a plant-based diet, plus updated information about the changing medical system and how patients stand to benefit from a surging interest in plant-based nutrition. *The China Study—Revised and Expanded Edition* presents a clear and concise message of hope as it dispels a multitude of health myths and misinformation. The basic message is clear. The key to a long, healthy life lies in three things: breakfast, lunch, and dinner.

The ketogenic diet has gained in popularity, but that has led to some bad information being shared. You can do keto right, and you can do keto wrong. This book is all about how to do keto the right way! Despite what health science has beaten into us over the last fifty or so years, humans thrive on high-fat, low-carb diets. Millions of people around the world have discovered that a ketogenic lifestyle is the key to weight loss, disease prevention and intervention, and a more vibrant life. Gone are the days of constant hunger and low energy. This book leads you on a path to better health, a slimmer waistline, elimination of cravings, and endless energy. Craig and Maria Emmerich have partnered to write a book that digs deep into the science of ketogenic dieting, explaining how dozens of diseases can be cured or controlled through keto and how ketogenic diets are fueling a new breed of athlete—all in an easy-to-understand way that breaks down the complicated science for you. Keto is the definitive resource to the ketogenic lifestyle. Inside, you'll learn • How you can beat

cancer, obesity, metabolic syndrome, coronary artery disease, high cholesterol, Alzheimer's, dementia, ADHD, anxiety, and depression into submission by making some simple yet impactful changes to your diet • How cholesterol and diabetes medications could very well be making you sicker rather than better • How generations of bad advice—designed to sell sugar, not health—has killed millions who blindly trusted the medical community and, worse still, the government to tell them the truth • How overconsumption of carbohydrates is bad for your health and could be at the root of what ails you • How changing your inputs—the foods you eat—can change your outputs, meaning your quality of life • How our bodies work, including oxidative priority, fat flux, and lipolysis, explained in such a way that everyone can understand how our bodies really process what we put into them • How inflammation is at the root of many diseases and how modern diets that are rife with sugar, carbs, and omega-6 oils are sending us to early graves • How hormones control mood swings, sex drive, blood sugar levels, muscle tone, fat-burning ability, metabolism, the immune system, and much more—and how adopting a ketogenic lifestyle can change your waistline and your life • How to stock your pantry with the right foods and make meal plans that are delicious and easy to follow and, most importantly, are the pathway to a longer, healthier life • How you can build muscle and perform at your best on a low-carb, high-fat diet (No, we're not making that up!) • Which foods are the most nutrient dense to feed our cells the vitamins and minerals they need • How to sort through the confusion and conflicting information about what a ketogenic diet is This book

clears it all up, dispelling the myths of ketogenic diets. So, enjoy those healthy animal proteins. Gnow on that rib bone. And say no to that plate of "heart-healthy" pasta. New York Times bestselling author Maria Emmerich and her husband, Craig, are going to take you on a journey to a new life—one that helps you lose weight, build muscle, and live the life nature intended you to live!

*Journey to the Truth. An Introduction to the Reality of Ourselves and the World.* When thinking about the meaning and purpose of our lives, most people eventually come to these questions: 'Who am I really?' 'What is the purpose for being here?' and 'Where will I go after I die?' Increasing numbers are contemplating this, and so beginning the process of 'waking up' to our original nature; true reality, versus the illusions we have been led to believe until now. This is an introduction and overview to very important metaphysical and world topics. It is help for beginners on where and how to start, or move forward, on their own journey! We will explore together the possibility of being an eternal being, of reincarnation, learn about the human energy centres. We will investigate whether extraterrestrial beings are real. What can we do to achieve the inner and outer life we desire? What are the important issues on the planet, and how can we watch out for our physical health. Throughout the

book, the author use examples her experiences and growth from her own journey to date. There is a great need for the type of book she has written. It differs from others on the market in that it is short, with easy to follow chapters, and readers can identify which topics stand out as important to them personally, where they are drawn to find out more. Included is a bibliography and additional resources readers can use for further exploration.

A ketogenic diet isn't something new that has been recently formulated; people have been on a ketogenic diet for virtually three million years in which our brains were nurtured and evolved. Now the human brain is not only shrinking, but brain atrophy is the norm as we age and get plagued with diseases such as dementia, Alzheimer's disease and Parkinson's disease. People mistakenly think that they need to eat less and exercise more to create a calorie deficit in order to lose weight. This is not how diet and exercise helps with weight loss. A well-formulated keto-adapted diet along with proper exercise builds muscle and muscle builds mitochondria. It is in the mitochondria where fat is oxidized so you can keep your cells and liver insulin sensitized. Weight loss and health is about healthy mitochondria and about controlling hormones and specifically insulin. This is not a diet, it is a lifestyle. By eating this way, you will begin to heal your cells and will keep evolving your body into the happy and healthy person you want to be. This book is filled with the most impeccable nutrition information to fuel your cells. Maria's passion goes beyond explaining the 'why', she is a master in the kitchen and loves food. Her keto-adapted recipes at

the end of the book tie all the nutrition together so you can become keto-adapted faster than ever.

**WHAT YOUR DOCTOR MAY NOT TELL YOU ABOUT (TM): HEART DISEASE** Grand Central Life & Style

The best-selling book on heart disease, updated with the latest research and clinical findings on high-fat/ketogenic diets, sugar, genetics, and other factors. Heart disease is the #1 killer. However, traditional heart disease protocols—with their emphasis on lowering cholesterol—have it all wrong. Emerging science is showing that cholesterol levels are a poor predictor of heart disease and that standard prescriptions for lowering it, such as ineffective low-fat/high-carb diets and serious, side-effect-causing statin drugs, obscure the real causes of heart disease. Even doctors at leading institutions have been misled for years based on creative reporting of research results from pharmaceutical companies intent on supporting the \$31-billion-a-year cholesterol-lowering drug industry. The Great Cholesterol Myth reveals the real culprits of heart disease, including: inflammation, fibrinogen, triglycerides, homocysteine, belly fat, triglyceride to HDL ratios, and high glycemic levels. Best-selling health authors Jonny Bowden, PhD, and Stephen Sinatra, MD, give readers a four-part strategy based on the latest studies and clinical findings for effectively preventing, managing, and reversing heart disease, focusing on diet, exercise, supplements, and stress and anger management. Myths vs. Facts Myth: High cholesterol is the cause of heart disease. Fact: Cholesterol is only a minor player in the cascade of inflammation which is a cause of heart disease. Myth: Saturated fat is dangerous. Fact: Saturated fats are not dangerous. The killer fats are the

transfats from partially hydrogenated oils. Myth: The higher the cholesterol, the shorter the lifespan. Fact: Higher cholesterol protects you from gastrointestinal disease, pulmonary disease, and hemorrhagic stroke. Myth: High cholesterol is a predictor of heart attack. Fact: There is no correlation between cholesterol and heart attacks. Myth: Lowering cholesterol with statin drugs will prolong your life. Fact: There is no data to show that statins have a significant impact on longevity. Myth: Statin drugs are safe. Fact: Statin drugs can be extremely toxic including causing death. Myth: Statin drugs are useful in men, women, and the elderly. Fact: Statin drugs do the best job in middle-aged men with coronary disease. Myth: Statin drugs are useful in middle-aged men with coronary artery disease because of its impact on cholesterol. Fact: Statin drugs reduce inflammation and improve blood viscosity (thinning blood). Statins are extremely helpful in men with low HDL and coronary artery disease.

#### *Supplement Your Prescription Health Myths Exposed*

Prescription drugs can rob you of the very vitamins and minerals your body needs to overcome your current health condition. Whether you suffer from high blood pressure, high cholesterol, chronic heartburn (GERD), arthritis, diabetes, or depression, the prescription drugs you are taking can actually make your condition worse! Why didn't your doctor warn you about this possible side effect? Most office visits are short, and time is limited. And the truth is, many doctors have very little knowledge about nutrition and how it affects your overall health and well-being. As a result, your doctor is unlikely to tell you how to supplement your prescription. Dr. Cass offers essential information to complement your doctor's advice. This straightforward, easy-to-use guide explains: How drugs interfere with your body's ability to absorb and use vital nutrients. What nutrient depletions and side effects you can expect with the most frequently prescribed drugs. Which nutritional supplements and foods can safeguard against nutrient depletion and its health consequences. How specific diet changes and nutritional supplements can help you take control of your condition. Why it's important to support your plan with a balanced diet, exercise, and other self-care basics. Where to go to find more information to become your own health advocate. Your medications should help, not hurt. With *Supplement Your Prescription*, Dr. Cass shows you the way to optimal health. Did you know that chia seeds can serve as an antidepressant? Or that they can help protect against cancer, keep you looking and feeling younger, and help you lose weight? The chia plant is a relative of the mint plant. It makes tiny, flavorless, gluten-free seeds that are chock-full of antioxidants and fiber, and when combined with water, they can be used as a replacement for butter or oil in your favorite baked goods. In addition, the plants contain an oil that naturally repels pests, making it easy for farmers to grow the seeds organically, without the use of pesticides. If that's not enough to convince you to try them, consider that chia seeds help balance blood sugar, help prevent diseases such as diverticulitis and diverticulosis, and contain the essential fatty acid omega-3, which lowers hypertension and benefits your heart. You'll be amazed to learn all the ways chia seeds can improve your physical and mental health. With this book, you'll also learn how to incorporate chia seeds into your diet, with tips and recipes for baked goods, entrées, desserts, and more. Written in an easily accessible style, but backed up with charts, true stories, and well-researched facts, *Chia Seed Remedies* just might change your life.

With an increasing number of people suffering from obesity, heart disease, and other diet-related disorders, many of us turn to fad diets in an effort to drop excess pounds or recover our health. But what if our foods were doing more harm than good, and fad diets made matters worse? *Deadly Harvest* examines how the foods we eat today have little in common with those of our ancestors, and why this fact is important to our health. It also offers a proven program to

enhance health and improve longevity. Using the latest scientific research and studies of primitive lifestyles, the author first explains the diet that our ancestors followed--one in harmony with the human species. He then describes how our present diets affect our health, leading to disorders such as cancer, diabetes, heart disease, and more. Most important, he details measures we can take to improve our diet, our health, and our quality of life.

A groundbreaking program that reveals what really causes heart disease-- and what can be done to prevent and treat its devastating effects on long-term health. Coronary heart disease has long been the number one killer in this country, and for decades, we have been told about five basic risk factors: elevated cholesterol, high blood pressure, diabetes, obesity, and smoking. But the truth is that heart disease is much more complex-- with close to 400 risk factors! In this innovative guide, Dr. Mark Houston helps

readers discover the causes of heart disease, how to prevent and treat its debilitating effects via nutrition, nutritional supplements, exercise, weight management, and lays to rest to various myths (cholesterol is not the primary cause) based on scientific studies and medical publications. Readers will also learn how to identify the risk factors most likely to endanger them and construct an arsenal of non-pharmacological preventative strategies that can counteract this most deadly disease.
