The New York Times best-selling book
exploring the counterproductive reactions
white people have when their assumptions
about race are challenged, and how these
reactions maintain racial inequality. In this
"vital, necessary, and beautiful book"
(Michael Eric Dyson), antiracist educator
Robin DiAngelo deftly illuminates the
phenomenon of white fragility and "allows
us to understand racism as a practice not
restricted to 'bad people' (Claudia
Rankine). Referring to the defensive
moves that white people make when
challenged racially, white fragility is

characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

This stunning New York Times Bestseller from the survival story master, set along a rugged coastline centuries ago, does for the ocean what Hatchet does for the woods, as it relates the story of a young person's battle to stay alive against the odds, where the high seas meet a coastal wilderness. When a deadly plague reaches the small fish camp where he lives, an orphan named Leif is forced to take to the water in a cedar canoe. He flees northward, following a wild, fjord-riven shore, navigating from one danger to the next, unsure of his destination. Yet the deeper into his journey he paddles, the closer he comes to his truest self as he connects to "the heartbeat of the ocean . . . the pulse of the sea." With hints of Nordic mythology and an irresistible narrative pull, Northwind is Gary Paulsen at his captivating, adventuresome best.

As the title of the book implies, this book is written from the technician workbench point of view. No theories and long stories,

therefore what is in this book is what you will expect first hand when a microwave oven is brought to your workshop for repair. The author, Humphrey Kimathi has over 20 years experience in repair and service of home electrical appliances. Microwave oven which was invented in 1958 by accident has become an household name as many families have adopted this mode of warming food in seconds. An increase for the use of this technology has come with the need for personnel to service and maintain these gadgets. Unlike other home electrical appliances, microwave repair is the most dangerous, both to the user and service personnel. In this regard I have dedicated a full chapter on the safety around working on the microwave and also testing microwave leakage for the safety of the user before handing back the machine to the customer and also for the service technician-SAFETY FIRST!

The perfect Valentine's Day or anniversary gift: An illustrated collection of love and relationship advice from New Yorker writer Patricia Marx, with illustrations from New

Yorker cartoonist Roz Chast. Everyone's heard the old advice for a healthy relationship: Never go to bed angry. Play hard to get. Sexual favors in exchange for cleaning up the cat vomit is a good and fair trade. Okay, not that last one. It's one of the tips in *You Can Only Yell at Me for One Thing at a Time: Rules for Couples* by the authors of *Why Don't You Write My Eulogy Now So I Can Correct It: A Mother's Suggestions*. This guide will make you laugh, remind you why your relationship is better than everyone else's, and solve all your problems. Nuggets of advice include: If you must breathe, don't breathe so loudly. It is easier to stay inside and wait for the snow to melt than to fight about who should shovel. Queen-sized beds, king-sized blankets. Why not give this book to your significant or insignificant other, your anti-Valentine's Day crusader pal, or anyone who can't live with or without love?

"Kwon and Thompson's eloquent reasoning will help Christians broaden their understanding of the contemporary conversation over reparations."--

Publishers Weekly Christians are awakening to the legacy of racism in America like never before. While public conversations regarding the realities of racial division and inequalities have surged in recent years, so has the public outcry to work toward the long-awaited healing of these wounds. But American Christianity, with its tendency to view the ministry of reconciliation as its sole response to racial injustice, and its isolation from those who labor most diligently to address these things, is underequipped to offer solutions. Because of this, the church needs a new perspective on its responsibility for the deep racial brokenness at the heart of American culture and on what it can do to repair that brokenness. This book makes a compelling historical and theological case for the church's obligation to provide reparations for the oppression of African Americans. Duke Kwon and Gregory Thompson articulate the church's responsibility for its promotion and preservation of white supremacy throughout history, investigate the Bible's call to repair our racial brokenness, and offer a vision for the work of reparation at

the local level. They lead readers toward a moral imagination that views reparations as a long-overdue and necessary step in our collective journey toward healing and wholeness.

A revolutionary memoir about domestic abuse by the award-winning author of *Her Body and Other Parties* In the Dream House is Carmen Maria Machado's engrossing and wildly innovative account of a relationship gone bad, and a bold dissection of the mechanisms and cultural representations of psychological abuse. Tracing the full arc of a harrowing relationship with a charismatic but volatile woman, Machado struggles to make sense of how what happened to her shaped the person she was becoming. And it's that struggle that gives the book its original structure: each chapter is driven by its own narrative trope—the haunted house, erotica, the bildungsroman—through which Machado holds the events up to the light and examines them from different angles. She looks back at her religious adolescence, unpacks the stereotype of lesbian relationships as safe and utopian, and widens the view with essayistic explorations of the history and reality of

abuse in queer relationships. Machado's dire narrative is leavened with her characteristic wit, playfulness, and openness to inquiry. She casts a critical eye over legal proceedings, fairy tales, Star Trek, and Disney villains, as well as iconic works of film and fiction. The result is a wrenching, riveting book that explodes our ideas about what a memoir can do and be.

E-waste management is a serious challenge across developed, transition, and developing countries because of the consumer society and the globalization process. E-waste is a fast-growing waste stream which needs more attention of international organizations, governments, and local authorities in order to improve the current waste management practices. The book reveals the pollution side of this waste stream with critical implications on the environment and public health, and also it points out the resource side which must be further developed under the circular economy framework with respect to safety regulations. In this context, complicated patterns at the global scale

emerge under legal and illegal e-waste trades. The linkages between developed and developing countries and key issues of e-waste management sector are further examined in the book.

Unsafe at Any Speed Intellect Books
An examination of the global trade and

traffic in discarded electronics that reframes the question of the “right” thing to do with e-waste. The prevailing storyline about the problem of electronic waste frames e-waste as generated by consumers in developed countries and dumped on people and places in developing countries. In *Reassembling Rubbish*, Josh Lepawsky offers a different view. In an innovative analysis of the global trade and traffic in discarded electronics, Lepawsky reframes the question of the “right” thing to do with e-waste, mapping the complex flows of electronic materials. He counters the assumption that e-waste is a post-consumer problem, pointing out that waste occurs at all stages of electronic materials' existence, and calls attention to the under-researched world of reuse and repair. Lepawsky explains that there are conflicting legal distinctions between electronic waste and non-waste, and examines a legal case that illustrates the

consequences. He shows that patterns of trade do not support the dominant narrative of e-waste dumping but rather represent the dynamic ecologies of repair, refurbishment, and materials recovery. He asks how we know waste, how we measure it, and how we construe it, and how this affects our efforts to mitigate it. We might not put so much faith in household recycling if we counted the more massive amounts of pre-consumer electronic waste as official e-waste. Lepawsky charts the “minescapes,” “productionscapes,” and “clickscapes” of electronics, and the uneven “discardscapes” they produce. Finally, he considers both conventional and unconventional e-waste solutions, including decriminalizing export for reuse, repair, and upgrade; enabling ethical trade in electronics reuse, repair, refurbishment, and recycling; implementing extended producer responsibility; and instituting robust forms of public oversight.
