### **New Contexts and Challenges in Europe**

Emerald Group Publishing  
The future engagement of  
young citizens from a  
wide range of socio-  
economic, ethnic and

cultural backgrounds in  
democratic politics  
remains a crucial concern  
for academics, policy-  
makers, civics teachers  
and youth workers around  
the world. At a time when  
the negative relationship  
between socio-economic  
inequality and levels of  
political participation is  
compounded by high  
youth unemployment or

precarious employment in  
many countries, it is not  
surprising that new social  
media communications  
may be seen as a means  
to re-engage young  
citizens. This edited  
collection explores the  
influence of social media,  
such as YouTube,  
Facebook, and Twitter,  
upon the participatory  
culture of young citizens.

This collection, comprising contributions from a number of leading international scholars in this field, examines such themes as the possible effects of social media use upon patterns of political socialization; the potential of social media to ameliorate young people's political inequality; the role of social media communications for enhancing the civic education curriculum; and evidence for social media manifesting new forms of political engagement and

participation by young citizens. These issues are considered from a number of theoretical and methodological approaches but all attempt to move beyond simplistic notions of young people as an undifferentiated category of 'the internet generation'.

 During the first half of the twentieth century, Japanese immigrants entered Brazil by the tens of thousands. In more

recent decades that flow has been reversed: more than 200,000 Japanese-Brazilians and their families have relocated to Japan. Examining these significant but rarely studied transnational movements and the experiences of Japanese-Brazilians, the essays in *Searching for Home Abroad* rethink complex issues of ethnicity and national identity. The contributors—who represent a number of nationalities and disciplines themselves—analyze how

the original Japanese immigrants, their descendants in Brazil, and the Japanese-Brazilians in Japan sought to fit into the culture of each country while confronting both prejudice and discrimination. The concepts of home and diaspora are engaged and debated throughout the volume. Drawing on numerous sources—oral histories, interviews, private papers, films, myths, and music—the contributors highlight the role ethnic minorities have played in

constructing Brazilian and Japanese national identities. The essayists consider the economic and emotional motivations for migration as well as a range of fascinating cultural outgrowths such as Japanese secret societies in Brazil. They explore intriguing paradoxes, including the feeling among many Japanese-Brazilians who have migrated to Japan that they are more "Brazilian" there than they were in Brazil. Searching for Home Abroad will be of

great interest to scholars of immigration and ethnicity in the Americas and Asia. Contributors. Shuhei Hosokawa, Angelo Ishi, Jeffrey Lesser, Daniel T. Linger, Koichi Mori, Joshua Hotaka Roth, Takeyuki (Gaku) Tsuda, Keiko Yamanaka, Karen Tei Yamashita

European trade unions are among the most influential and powerful institutions within Western economies, in many cases cooperating

with the government and employers' associations in socio-economic decision-making processes. Consequently they also play an important role in the formulation of policies relating to immigration and the migrant workers, who are arriving and becoming part of the workforce the unions are representing and protecting against employers and other authorities. However, trade unions have not always fulfilled their role as the most obvious organization to defend the

interests of foreign workers to the extent they could be expected. The reasons for this are complex and due to conflicts of interests that arise from their intermediary position between employers, government authorities, and indigenous workers. This volume offers a rich analysis of the situation in seven major European countries but also a comparison of the data found and an attempt to account for the differences established. It ends with some

conclusions on the prospects of trade unions within the European Union, and on the lessons to be learned from the present analysis.

**The Limits of Nativety  
in Social Anthropology**  
Springer

This book integrates four  
distinct topics: young  
people, citizenship, new

media, and learning  
processes. When taken  
together, these four topics  
merge to define an arena  
of social and research  
attention that has become  
compelling in recent  
years. The general  
international concern  
expressed of declining  
democratic engagement  
and the role of citizenship  
today becomes all the  
more acute when it turns  
to younger people. At the  
same time, there is  
growing attention being  
paid to the potential of  
new media – especially  
internet and mobile

telephony – to play a role  
in facilitating newer forms  
of political participation. It  
is clear that many of the  
present manifestations of  
'new politics' in the extra  
parliamentarian domain,  
not only make  
sophisticated use of such  
media, but are indeed  
highly dependent on  
them. With an impressive  
array of contributors, this  
book will appeal to those  
interested in a number of  
spheres, including media  
and cultural studies,  
political science,  
pedagogy, and sociology.

The UN Convention on Migrant Workers' Rights is the most comprehensive international treaty in the field of migration and human rights. Adopted in 1990 and entered into force in 2003, it sets a standard in terms of access to human rights for migrants. However, it suffers from a marked indifference: only forty states have ratified it and no major immigration country has done so. This highlights how migrants remain forgotten in terms

of access to rights. Even though their labour is essential in the world economy, the non-economic aspect of migration – and especially migrants' rights – remain a neglected dimension of globalisation. This volume provides in-depth information on the Convention and on the reasons behind states' reluctance towards its ratification. It brings together researchers, international civil servants and NGO members and relies upon an interdisciplinary

perspective that includes not only law, but also sociology and political science.

Duke University Press

This book examines the concept of 'community unionism', which argues that the future of the labour movement and industrial relations lies with the community and local labour markets. Providing a conceptual overview of the term, the book uses international

case studies and draws on faith-based organizations to explore the issue.

### **Living in Two Homes**

Routledge

This book explores the impact of transnational migration on the views, feelings, and practices of home among migrants. Home is usually perceived as what placidly lies in the background of everyday life, yet migrants' experience tells a different story: what happens to the notion of home, once migrants move far away from their "natural" bases and

search for new ones, often under marginalized living conditions? The author analyzes in how far migrants' sense of home relies on a dwelling place, intimate relationships, memories of the past, and aspirations for the future—and what difference these factors make in practice. Analyzing their claims, conflicts, and dilemmas, this book showcases how in the migrants' case, the sense of home turns from an apparently intimate and domestic concern into a major public question.

The pressures of globalization and diversity are increasingly requiring organizations to rethink their priorities and methods. In this collection, leading researchers examine the debates and developments on gender, diversity and democracy in trade unions in eleven countries. Offering an authoritative basis for comparative analysis, this

book is essential reading for researchers, teachers, trade unionists and students of industrial relations and equal opportunities, along with all those concerned with ensuring that modern organizations reflect and represent the needs and concerns of a diverse workforce.

 New York City boasts a  
 higher rate of unionization  
 than any other major U.S.  
 city—roughly double the  
 national average—but the  
 city’s unions have  
 suffered steady and  
 relentless decline,  
 especially in the private  
 sector. With higher levels  
 of income inequality than  
 any other large city in the  
 nation, New York today is  
 home to a large and  
 growing  
 precariat—workers with

little or no employment  
 security who are often  
 excluded from the basic  
 legal protections that  
 unions struggled for and  
 won in the twentieth  
 century. Community-  
 based organizations and  
 worker centers have  
 developed the most  
 promising approach to  
 organizing the new  
 precariat and to  
 addressing the crisis  
 facing the labor  
 movement. Home to some  
 of the nation’s very first  
 worker centers, New York  
 City today has the single  
 largest concentration of

these organizations in the United States, yet until now no one has documented their efforts. New Labor in New York includes thirteen fine-grained case studies of recent campaigns by worker centers and unions, each of which is based on original research and participant observation. Some of the campaigns documented here involve taxi drivers, street vendors, and domestic workers, as well as middle-strata freelancers—all of whom are excluded from basic

employment laws. Other cases focus on supermarket, retail, and restaurant workers, who are nominally covered by such laws but who often experience wage theft and other legal violations; still other campaigns are not restricted to a single occupation or industry. This book offers a richly detailed portrait of the new labor movement in New York City, as well as several recent efforts to expand that movement from the local to the national scale.

Throughout the world, governments and intergovernmental organizations, such as the International Organization for Migration are developing new approaches aimed at renewing migration policy-making. This book, now in paperback, critically analyzes the actors, discourses and practices of migration management.

No Shame in My Game

This timely book analyses the relationship between trade unions, immigration and migrant workers across eleven European countries in the period between the 1990s and 2015. It constitutes an extensive update of a previous comparative analysis – published by Rinus Penninx and Judith Roosblad in 2000 – that has become an important reference in the field. The book offers an overview of how trade unions manage issues of inclusion and solidarity in the current economic and political

context, characterized by increasing challenges for labour organizations and rising hostility towards migrants.

Based on document analysis, and on the evaluations, perceptions and judgments of people involved in framing, making, and applying foreign policy in both countries as foreign affairs officials, law makers, or think tanks'

associates, this book presents the differing worldviews and concepts for establishing an international order. It is argued that the differences between U.S. and French approaches to foreign policies and international affairs are historically entrenched in political cultures, and could transcend other elements such as economic interests, or the political inclinations of the individuals or parties who control their governments. Many of the findings could be applied

to the differences and similarities between the U.S. and other European countries.

Over the last two decades, international migration has become a global issue. It is perceived as an ongoing

challenge for governments, as well as an issue that is deeply related to other international challenges, such as development, climate change, security and public health. In this context, international organisations have become influential in the way in which migration is thought about and governed. They play an important role, steering states' behaviour and intervening on the ground, through the design and implementation of

immigration policy. International organisations tend to promote a positive view of migration, extolling its benefits for all parties. There often exists a contrast between this positivity and the public and political scepticism regularly expressed in Western receiving countries. According to their advocates, international organizations have the potential to improve the governance of migration, by supporting cooperation between states and

promoting balanced and comprehensive political strategies. However their detractors criticise them for aligning themselves with the interests of receiving states and for their political agenda. This book brings together analytical and empirical contributions that explore the role of international organisations in migration politics worldwide. This book was originally published as a special issue of the Journal of Ethnic and Migration Studies.

"By analyzing the process of work in both the electrical and the automobile industries, the supplies of male and female labor available to each, the varying degrees of labor-intensive work, the proportion of labor costs to total costs, and the extent of male resistance to female entry into the industry before, during, and after the war, Milkman offers a historically grounded and detailed examination of the evolution, function,

and reproduction of job segregation by sex." -- Journal of American History "Analytic sophistication is coupled with a powerfully rendered narrative: the reader strides briskly along, enjoying one provocative insight after another while simultaneously absorbed by the drama of the events." -- Women's Review of Books
