In Health Matters, contributors from a range of disciplinary and interdisciplinary traditions address

multiple dimensions of health care, such as nursing, midwifery, home care, pharmaceuticals, medical education, and palliative care. Through their explorations, the book poses questions about the role that the forms of expertise associated with evidence-based health care play in shaping how we understand and organize health services. Authors critique instrumental, managerial ways of knowing health care and focus on how such ways of knowing limit our understandings of and responses to health care problems and are linked with the growing commodification, individualization, and privatization of Canadian health services. Working with analytic perspectives such as feminism, Marxist political economy, critical ethnography, science and technology studies, governmentality studies, and institutional ethnography, the volume demonstrates how critical social science perspectives contribute alternative perspectives about what counts as health care problems and how to best to address them.

\*\*American Journal of Nursing (AJN) Book of the Year Awards, 1st Place in Informatics, 2023\*\*

\*\*Selected for Doody's Core Titles® 2024 in Informatics\*\* Learn how information technology intersects with today's health care! Health Informatics: An Interprofessional Approach, 3rd Edition, follows the tradition of expert informatics educators Ramona Nelson and Nancy Staggers with new lead author, Lynda R. Hardy, to prepare you for success in today's technology-filled healthcare practice. Concise coverage includes information systems and applications, such as electronic health records, clinical decision support, telehealth, mHealth, ePatients, and social media tools, as well as system implementation. New to this edition are topics that include analytical approaches to health informatics, increased information on FHIR and SMART on FHIR, and the use of health informatics in pandemics. - Chapters written by experts in the field provide the most current and accurate information on continually evolving subjects like evidence-based practice, EHRs, PHRs, mobile health, disaster recovery, and simulation. - Objectives, key terms, and an abstract at the beginning of each chapter provide an overview of what each chapter will cover. - Case studies and discussion questions at the end of each chapter encourage higher-level thinking that can be applied to real world experiences. - Conclusion and Future Directions discussion at the end of each chapter reinforces topics and expands on how the topic will continue to evolve. - Open-ended discussion questions at the end of each chapter enhance students' understanding of the subject covered. - mHealth chapter discusses all relevant aspects of mobile health, including global growth, new opportunities in underserved areas, governmental regulations on issues such as data leaking and mining, implications of patient-generated data, legal aspects of provider monitoring of patient-generated data, and increased responsibility by patients. - Important content, including FDA- and state-based regulations, project management, big data, and governance models, prepares students for one of nursing's key specialty areas. - UPDATED! Chapters reflect the current and evolving practice of health informatics, using real-life healthcare examples to show how informatics applies to a wide range of topics and issues. - NEW! Strategies to promote healthcare equality by freeing algorithms and decision-making from implicit and explicit bias are integrated where applicable. - NEW! The latest AACN domains are incorporated throughout to support BSN, Master's, and DNP programs. - NEW! Greater emphasis on the digital patient and the partnerships involved, including decision-making.

The Coast Guard (CG) is in the final stages of planning the largest procurement project in its history -- the modernization &/or replacement of over 90 cutters and 200 aircraft used for missions beyond 50 miles from shore. This project, called the Deepwater Capability Replacement Project, is expected to cost over \$10 billion and take 20+ years to complete. In 2001, the CG will be evaluating proposals now being developed by 3 contracting teams competing for a contract to build the deepwater system. The CG plans to award a contract to one of these teams early in 2002. This report monitors the project closely and provides info. for the Congress, as it considers funding for this project.

This synthesis will be of interest to transit agency staff responsible for advertising sales in their agencies. They can use this report to learn from the experiences of other transit agencies and to compare their experiences with those of others. The report documents and summarizes transit agency experiences with advertising sales and synthesizes current practices for advertising sales, contracting, and display.

*"Code of Massachusetts regulations, 1994"*

Despite its importance as an initial step in the development of major technical projects, the Request for Proposal (RFP) process rarely receives the professional attention it deserves. Used by government agencies and by private corporations to solicit proposals from contractors and vendors, the RFP document is the foundation for a successful project. A clearly written and properly organized RFP clarifies technical goals, communicates administrative and financial expectations, and sets the tone for good communication and a trusting and productive relationship between customer and contractor.

**Strategies for Obtaining Ship Services**

Supply Market Intelligence: A Managerial Handbook for Building Sourcing Strategies begins by defining supply market intelligence and discussing opportunities, the establishment of a project team, and conducting an internal business intelligence assessment. The book then examines the development of business and market intelligence, supplier evaluations, and sourcing strategies. It also explores how to execute a sourcing strategy, manage a strategic supplier relationship, and redesign an organization for effective supply-chain intelligence and strategic sourcing. This volume offers a benchmarking framework covering all facets of supply-chain management, and includes best practices and case studies of world-class companies.

Health Matters

Seamlessly bridging academic accounting with real-life applications, Crash Course in Accounting and Financial Statement Analysis, Second Edition is the perfect guide to a complete understanding of accounting and financial statement analysis for those with no prior accounting background and those who seek a refresher.

**Request for Proposal**

**Transit Advertising Sales Agreements**

Filling a gap in project management literature, this book supplies managers and administrators—at all levels of government—with expert guidance on all aspects of public sector project management. From properly allocating risks in drafting contracts to dealing with downsized staffs and privatized services, this book clearly explains the technical concepts and the political issues public managers need to understand. In line with the principles of Total Quality Management (TQM) and the PMBOK® Guide, David S. Kassel establishes a framework those in the public sector may follow to ensure the success of their public projects and programs. The book supplies more than 30 real-life examples to illustrate the concepts behind the framework—including reconstruction projects in Iraq, the Big Dig project in Boston, local sewer system and library construction projects, and software technology. This second edition includes all-new extended case studies examining recent issues including the rollout of healthcare.gov, the controversial California High Speed Rail system, and refurbishing the Harvard Town Hall. Contributing to critical discussions on budgeting for capital projects and cost-benefit analysis for preliminary planning, this authoritative new edition provides strategic recommendations for effective planning, execution, and maintenance of public projects. In an age of downsized government and in the face of a general distrust of public service, this book is a dependable guide for avoiding common pitfalls and for delivering projects on cost, on schedule, and of the highest quality.
