Learn ...Case Studies :: Capstone Turbine Corporation (CPST) Case Study A Cure for the Common Cold - in Turbines A steam turbine at a waste-to-energy facility in the Northeast underwent a scheduled repair, at which time the turbine bearings were reworked, after which the turbine periodically experienced very high amplitude shaft vibrations. Read the Case Study Case Study | Aeroderivative Gas Turbine Vibration Problem ... This study for the Central Research Institute of Electric Power Industry (CRIEPI) details the MIT Energy Laboratory case study on gas turbines to help us better understand energy R&D performance. The

project included three main tasks:

- Performing a rigorous, documented study of gas and combined cycle turbine improvements. Comparative Study on Energy R&D Performance: Gas Turbine ... A liquid natural gas (LNG) plant in a tropical climate has had four years of success with watertight air filtration from Donaldson Gas Turbine Systems. This case study is applicable to other humid, tropical, and coastal oil refineries and power plants that struggle with moisture and airborne contaminants. Lessons from Humid Coastal Conditions | Donaldson Gas ... The gas turbine can be used in combination with a steam turbine—in a combined-cycle power

plant—to create power extremely efficiently. Air-fuel mixture ignites. The gas turbine compresses air and mixes it with fuel that is then burned at extremely high temperatures, creating a hot gas. Hot gas spins turbine blades. What is a Gas Turbine | Knowledge Base | GE Power Generation Diagnostic results for case 10. Conclusion and discussion. In this study, in order to improve the robustness of gas turbine gas-path fault diagnosis, a hybrid GPA approach (GRA-GPA) integrating gray relation algorithm (GRA) into GPA method has been proposed to isolate and quantify gas-path component degradations. Study on gas turbine engine
