Interview Questions and Answers

The book examines the well-established field of 'law and development' and asks whether the concept of development and discourses on law and development have outlived their usefulness.

The contributors ask whether instead of these amorphous and contested concepts we should focus upon social injustices such as patriarchy, impoverishment, human rights violations, the exploitation of indigenous peoples, and global heating? If we abandoned the idea of development, would we end up adopting another, equally problematic term to replace a concept which, for all its flaws, serves as a commonly understood shorthand? The contributors analyse the links between conventional academic approaches to law and development, neoliberal governance and activism

through historical and contemporary case studies. The book will be of interest to students and scholars of development, international law, international economic law, governance and politics and international relations.

Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. This book critically examines the practice and meanings of corporate social responsibility (CSR) and how the movement has facilitated a positive and somewhat unquestioned image of the global corporation. Drawing on extensive fieldwork material collected in Ghanaian communities located around the project sites of Newmont Mining Corporation and Kinross Gold Corporation, the monograph employs critical discourse analysis to accentuate how mining corporations use CSR as a discursive alibi to gain legitimacy and dominance over the social order, while determining their own spheres of responsibility and accountability. Hiding behind such notions as ‘social licence to operate’ and ‘best practice,’ corporations are enacted as entities that are morally conscious and socially responsible. Yet, this enactment is contested in host communities, as explored in chapters that examine corporate citizenship, gendered perspectives, and how global CSR norms institutionalize unaccountability.

This volume considers the challenges of democracy building in post-Soviet Armenia, and the role of civil society in that process. It argues that, contrary to the expectations of Western aid donors, who promoted civil society on the assumption that democratization would follow from the establishment of civil society, democratic regimes have failed to materialize, and, moreover, a backlash has emerged in various post-Soviet states. Armine Ishkanian explores how far the growth of civil society depends on a country's historical, political and socio-cultural context; and how far foreign aid, often provided with conditions which encouraged the promotion of civil society, had an impact on democratization. Based on extensive original research, including fieldwork interviews with participants, *Democracy Building and Civil Society in Post-Soviet Armenia* considers various democratization initiatives in recent years, and assesses how far the Armenian experience is similar to, or different from, the experiences of other post-Soviet states.

In the last decade or so, there has been a shift in the popular and academic discussion of our personal lives. Relationships – and not necessarily marriage – have gravitated to the center of our relational lives. Many of us feel entitled to seek intimacy, an emotionally depthful social bonding, rather than simply security or companionship from our relationships. Unlike in a marriage-centred culture, intimacy is today pursued in varied relationships, from familial to friends and to romances. And intimacies are being forged in multiple venues, from face-to-face to virtual, cyber contexts. A new scholarship has addressed this changing terrain of personal life – there is today a vast literature on cohabitation, parenthood without marriage, sex and love outside marriage, queer

families, cyber intimacies and friendships. However, much theorizing and research has focussed either on the interior, subjective or sociocultural aspects of intimacies, not their interaction. This volume aims to break new ground: *Intimacies* explores the psychological terrain of intimacy in depthful ways without abandoning its sociohistorical context and the centrality of power dynamics. Drawing on a rich archive that includes the social sciences, feminism, queer studies, and psychoanalysis, the contributors examine: changing cultures of intimacy fluid and solid attachments and intimacies from hook ups, to sibling bonds, to erotic love a politics of intimacy that may involve state enforced hierarchies, class, misrecognition, social exclusion and violence embodied experiences of intimacy and dynamics of endings and loss a pluralization of intimacies that challenge established ethical hierarchies This volume aims to define the cutting edge of this emerging field of scholarship and politics. It challenges existing paradigms that assume rigid hierarchical approaches to relational life. *Intimacies* will be of interest for psychoanalysts and for students or scholars in sexualities, gender studies, family studies, feminism studies, queer studies, social class, cultural studies, and philosophy.

This book explores the role of Catholic peacebuilding in addressing the global mining industry.

Mining is intimately linked to issues of conflict, human rights, sustainable development, governance, and environmental justice. As an institution of significant scope and scale with a large network of actors at all levels and substantial theoretical and ethical resources, the Catholic Church is well positioned to acknowledge the essential role of mining, while challenging unethical and harmful practices, and promoting integral peace, development, and ecology. Drawing together theology, ethics, and praxis, the volume reflects the diversity of Catholic action on mining and the importance of an integrated approach. It includes contributions by an international and interdisciplinary range of scholars and practitioners. They examine Catholic action on mining in El Salvador, Peru, Colombia, the Democratic Republic of the Congo, and the Philippines. They also address general issues of corporate social responsibility, human rights, development, ecology, and peacebuilding. The book will be of interest to scholars of theology, social ethics, and Catholic studies as well as those specializing in development, ecology, human rights, and peace studies. *Hearings Before the United States Senate Committee on Labor and Public Welfare, Subcommittee on Labor, Eighty-Ninth Congress, Second Session, on Mar 21, 22, 1966* Emerald Group Publishing Forensic Accounting provides comprehensive coverage of fraud detection and deterrence and includes the broader educational material of the forensic accounting field with all the necessary accompaniments. Humanity has extensively exploited natural and physical resources, since the Industrial Revolution in Europe. A geological era, now called the Anthropocene, has been coined in environmental and developmental circles, to mark the increased domination of humanity on Earth and its resources. Today, the ecological footprint on the fragile planet continues to increase. Mass industrialisation, like what China is doing and pushing for, is one of the drivers for increased urbanisation that results in increased demand for land. It is also the stimulus behind increased deforestation, overfishing, and pollution. As the fragility of the Earth increases, global bodies like the Intergovernmental Panel on Climate Change are pushing to reduce the Earth’s temperature. Human efforts to manage the problem cascade from a global to a regional, to a national, as well as to much localised scales. Missing though are nuanced contributions at national and community levels, which this book is an attempt to bridge. The nagging sense of responsibility is what this book explores under the label of “sustainability ethic”. As a case study, the book examines the use of sustainability ethic in the management of the physical, infrastructural and natural resources of Zimbabwe. This ethic is built on pillars that include participation of people (households) in their pursuit for sustainable livelihoods, appropriate technology, tools and techniques for environmental protection. It also hinges on stewardship and structures, institutions, policies and processes of governance and sustainability. There are also the aspects of ethics, laws and indigenous technical knowledge for sustainability, capacity building and education plans and programmes for sustainability and population and demographic determinants, processes and outcomes for

sustainability. The book is a timely contribution to an urgent global concern and climate change debate.

**Civil-Military Relations in Lebanon** Routledge

This volume examines Lebanon's post-2011 security dilemmas and the tenuous civil-military relations. The Syrian civil war has strained the Lebanese Armed Forces' (LAF) cohesion and threatens its neutrality – its most valued assets in a divided society. The spill-over from the Syrian

civil war and Hezbollah's military engagement has magnified the security challenges facing the Army, making it a target. Massive foreign grants have sought to strengthen its military capability, stabilize the country and contain the Syria crisis. However, as this volume demonstrates, the real weakness of the LAF is not its lack of sophisticated armoury, but the fragile civil-military relations that compromise its fighting power, cripple its neutrality and expose it to accusations of partisanship and political bias. This testifies to both the importance of and the challenges facing multi-confessional armies in deeply divided countries.
