This book constitutes the refereed proceedings of the 6th International Conference on Runtime Verification, RV 2015, held in Vienna, Austria, in September 2015. The 15 revised full papers presented together with 4 short papers, 2 tool papers, 4 tutorials, 3 invited talks, and 2 software competition papers were carefully reviewed and selected from 45 submissions. The discussion of the conference centers around two main aspects. The first is to understand whether the runtime verification techniques can practically complement the traditional methods proving programs correct before their execution, such as model checking and theorem proving. The

second concerns with formal methods and how their application can improve traditional ad-hoc monitoring techniques used in performance monitoring, hardware design emulation and simulation, etc.

 The School of Pharmacy, University of London: Medicines, Science and Society, 1842-2012 represents the rich history of the University of London School of Pharmacy

through numerous color photographs, important advances in the pharmacy profession, cultural milestones, biographies and more. Written in an engaging and authoritative style, this book depicts the chronological history of the school from its establishment in 1842 to the present day with a nod toward its aspirations for the future. By highlighting key periods in the school's history and showing their connection to the wider world, this book truly commemorates the heritage of the School of Pharmacy and its cutting-edge role in pharmacy innovation, research and education. Highlights the history of the school, its buildings, courses, staff and

students Incorporates high-quality historical photographs, timelines, biography boxes and important pharmacy milestones, such as critical legislation, changes to educational standards, key developments and more in order to enrich the narrative Explores the interplay between the school and the developing pharmacy world to illustrate its involvement in important pharmacy innovation, educational development, research advances and much more Features a foreword from Her Royal Highness, Princess Anne, Chancellor of the University of London Competition Science Vision Springer The SAGE Encyclopedia of Pharmacology and Society explores the

social and policy sides of the pharmaceutical industry and its pervasive influence in society. While many technical STM works explore the chemistry and biology of pharmacology and an equally large number of clinically oriented works focus on use of illegal drugs, substance abuse, and treatment, there is virtually nothing on the immensely huge business (“Big Pharma”) of creating, selling, consuming, and regulating legal drugs. With this new Encyclopedia, the topic of socioeconomic, business and consumer, and legal and ethical issues of the pharmaceutical industry in contemporary society around the world are addressed. Key

Features: 800 signed articles, authored by prominent scholars, are arranged A-to-Z and published in a choice of electronic or print formats Although arranged A-to-Z, a Reader's Guide in the front matter groups articles by thematic areas Front matter also includes a Chronology highlighting significant developments in this field All articles conclude with Further Readings and Cross References to related articles Back matter includes an annotated Resource Guide to further research, a Glossary, Appendices (e.g., statistics on the amount and types of drugs prescribed, etc.), and a detailed Index The Index, Reader's Guide, and Cross References combine for search-and-browse

capabilities in the electronic edition The SAGE Encyclopedia of Pharmacology and Society is an authoritative and rigorous source addressing the

pharmacology industry and how it influences society, making it a must-have reference for all academic libraries as a source for both students and researchers to utilize.
