Make workplace conflict resolution a game that EVERYBODY wins! Recent studies show that typical managers devote more than a quarter of their time to resolving coworker disputes. The Big Book of Conflict-Resolution Games offers a wealth of activities and exercises for groups of any size that let you manage your

business (instead of managing personalities). Part of the acclaimed, bestselling Big Books series, this guide offers step-by-step directions and customizable tools that empower you to heal rifts arising from ineffective communication, cultural/personality clashes, and other specific problem areas—before they affect your organization's bottom line. Let The Big Book of Conflict-Resolution Games help you to: Build trust Foster morale Improve processes Overcome diversity issues And more Dozens of physical and verbal activities help create a safe environment for teams to explore several common forms of conflict—and their resolution. Inexpensive, easy-to-implement, and

proved effective at Fortune 500 corporations and mom-and-pop businesses alike, the exercises in The Big Book of Conflict-Resolution Games delivers everything you need to make your workplace more efficient, effective, and engaged.

Technology of the Gods Bookbaby
 Whatever your favourite tippie, when you pour yourself a drink, you have the past in a glass. You can likely find them all in your own kitchen — beer, wine, spirits, coffee, tea, cola. Line them up on the counter, and there you have it: thousands of years of human history in six drinks. Tom Standage opens a window onto the past in this tour of six beverages that remain essentials today. En route he makes

fascinating forays into the byways of western culture: Why were ancient Egyptians buried with beer? Why was wine considered a “classier” drink than beer by the Romans? How did rum grog help the British navy defeat Napoleon? What is the relationship between coffee and revolution? And how did Coca-Cola become the number one poster-product for globalization decades before the term was even coined?

The Giza Death Star Deployed Simon and Schuster

After four decades of research and multiple trips to Egypt, Brown believes he has solved the mystery of the Great Pyramid of Giza. He has concluded that the pyramid fits the profile of a type of chemical laser and that the Giza Plateau functioned as a massive industrial complex. Following the architectural principle that form follows function, Brown recognized it was impossible to enter the so-called burial chamber in the Great Pyramid because of the small size of the passage (less than four-feet square) and the extreme angle of the interior passages. This huge stone structure did not align with the supposed purpose, or with ancient Egyptian burial practices. Recently, a man-made tunnel was discovered under the Giza Plateau that connects the Great Pyramid to the Nile. In ancient times the annual flood waters from the Nile coursed through the Great Pyramid, and through a powerful chemical process created what Brown calls Earthmilk, electrified water. This enhanced elixir served many purposes, including enlivening the human body and flowing into the river to enrich animal life and soil on the banks, resulting in rich and abundant crops. Fire in Middle outlines Brown's compelling research and his journey of discovery. The book includes more than 350 stunning full-color images and diagrams. This is the second in a series of three volumes of research and evidence gathered from grassroots expeditions to Giza, Luxor, Saqqara, Abydos and Abu Simbel. This groundbreaking and ongoing research presents compelling evidence that the traditional interpretations of ancient Egyptian pyramids need to be reconsidered and re-evaluated.

A History of the World in Six Glasses Simon and Schuster

New research and evidence that the Sphinx is thousands of years older than previously thought • Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering

research and Bauval's Orion Correlation Theory • Examines how the Sphinx is contemporaneous with Göbekli Tepe, aligned with the constellation Leo, and was recarved during the Old Kingdom era of Egypt • Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt, the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza. It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone. According to orthodox Egyptology, the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre. Yet this “fact” has scant to no supportive evidence. When was the Sphinx really built and, most importantly, why? In this provocative collaboration from two Egyptology outsiders, Robert M. Schoch, Ph.D., and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre-Pharaonic civilization. They examine the known history of the Sphinx, contrasting what Egyptologists claim with prominent historical accounts and new research, including updates to Schoch's geological water weathering research and reanalysis of seismic studies. Building on Bauval's Orion Correlation Theory, they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo. Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era, they assert that the Sphinx was first built by an advanced pre-Pharaonic civilization that existed circa 12,000 years ago on the Giza Plateau, contemporaneous with the sophisticated Göbekli Tepe complex. The authors examine how the monuments at Giza memorialize Zep Tepi, the Golden Age of legend shown here to be an actual historical time period from roughly 10,500 BCE through 9700 BCE. Moving us closer to an understanding of the true age and purpose of the Great Sphinx, Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age.

The Spiritual Technology of Ancient Egypt Anchor Canada

This is physicist Joseph Farrellis' amazing book on the secrets of the Great Pyramid of Giza. Among the topics discussed in detail in this fantastic book are: An Archaeology of Mass Destruction, Thoth and Theories; The Machine Hypothesis;

Pythagoras, Plato, Planck, and the Pyramid; The Weapon Hypothesis; Encoded Harmonics of the Planck Units in the Great Pyramid; The Grand Gallery and its Crystals: Gravito-acoustic Resonators; The Other Two Large Pyramids, the 'Causeways', and the 'Temples'. Also: A Phase Conjugate Howitzer Evidence of the Use of Weapons of Mass Destruction in Ancient Times; High Frequency Direct Current 'Impulse' Technology; How the Giza Death Star worked. This book takes off where Christopher Dunn's 'The Giza Power Plant' left off. It is a rollicking ride into the world of fantastic science and an even more fantastic past that is just beginning to be imagined!

Pyramid Power Ternary Publishing LLC

From posters to cars, design is everywhere. While we often discuss the aesthetics of design, we don't always dig deeper to unearth the ways design can overtly, and covertly, convince us of a certain way of thinking. How Design Makes Us Think collects hundreds of examples across graphic design, product design, industrial design, and architecture to illustrate how design can inspire, provoke, amuse, anger, or reassure us. Graphic designer Sean Adams walks us through the power of design to attract attention and convey meaning. The book delves into the sociological, psychological, and historical reasons for our responses to design, offering practitioners and clients alike a new appreciation of their responsibility to create design with the best intentions. How Design Makes Us Think is an essential read for designers, advertisers, marketing professionals, and anyone who wants to understand how the design around us makes us think, feel, and do things.

And Feel and Do Things Simon and Schuster

The history of Egypt is of course a rich one dating back at least 5000 years to the first of the Pharaohs who created what was to be remembered through their works and deeds, especially in stone. Among their most famous achievements are the Great Pyramids of the Giza Plateau and the Sphinx. However, what if evidence strongly suggests that some of these great works were in fact created thousands of years before the dynastic Egyptians, and that the Pharaohs simply inherited and renamed them? This book is a journey from the southern most area of Egypt all the way to the Giza Plateau. Along the way many stone structures were examined that appeared to have been at least partially created using advanced technologies that the Pharaohs simply did not have; technologies that in some cases

appear superior to our own. Geologists, stone masons, engineers and other professionals were consulted in order to create this work, along with experts on the oral traditions of this extremely ancient land, and the results will surprise you. Clearly there was a civilization before the Pharaohs who had advanced technologies, and these people were called the Khemitians.

The Big Book of Conflict Resolution Games: Quick, Effective Activities to Improve Communication, Trust and Collaboration Simon and Schuster

In the late 1960s, Brazilian artists forged a watershed cultural movement known as Tropicalia. Music inspired by that movement is today enjoying considerable attention at home and abroad. Few new listeners, however, make the connection between this music and the circumstances surrounding its creation, the most violent and repressive days of the military regime that governed Brazil from 1964 to 1985. With key manifestations in theater, cinema, visual arts, literature, and especially popular music, Tropicalia dynamically articulated the conflicts and aspirations of a generation of young, urban Brazilians. Focusing on a group of musicians from Bahia, an impoverished state in northeastern Brazil noted for its vibrant Afro-Brazilian culture, Christopher Dunn reveals how artists including Caetano Veloso, Gilberto Gil, Gal Costa, and Tom Ze created this movement together with the musical and poetic vanguards of Sao Paulo, Brazil's most modern and industrialized city. He shows how the tropicalists selectively appropriated and parodied cultural practices from Brazil and abroad in order to expose the fissure between their nation's idealized image as a peaceful tropical "garden" and the daily brutality visited upon its citizens.

Artists, Antiquarians and Archaeologists at the Old Stone Monuments CreateSpace
Technology of the Gods lays out the mind-bending evidence that long-lost civilizations had attained and even exceeded our "modern" level of advancement. Westerners have been taught that humankind has progressed along a straight-line path from the primitive past to the proficient present, but the hard, fast evidence (literally written in stone!) proves that the ancients had technologies we cannot even replicate today.

Empathy Elly's motto is "You can walk in someone else's shoes, if you choose." This fun and entertaining book inspires children to learn to see what others see, and to

value the power of empathy.

The Mystery of Ed Leedskalnin and His American Stonehenge Adventures Unlimited Press

Egyptian pyramid was not a tomb. Unless someone reads the book he may not believe that the Great Pyramid of Giza was actually a power plant, which used to generate electricity 4500 years ago. In this book, the ancient history and working principles of the great pyramid of Giza are described in the light of scientific theories and evidence. This is the first book on such a subject in the Bengali language. The main idea of the book is influenced by the hypothesis of famous technologist, Pyramid researcher, and writer Mr. Christopher Dunn.

Earth Frequency Chronicle Books

Proposes that the Great Pyramid at Giza was constructed using water impoundments within the stone facing blocks of the pyramid, and its stones were raised and moved by means of locks and barges.

The Resonance of Unseen Things

Simon and Schuster

- Updated throughout with recent developments and additional illustrations • Reveals how solar outbursts caused the end of the last ice age, unleashed catastrophe upon ancient advanced civilizations, and led to six millennia of a Solar-Induced Dark Age • Includes evidence from solar science, geology, oceanic circulation patterns, the Sphinx, the underground cities of Cappadocia, the Easter Island rongorongo glyphs, and the Göbekli Tepe complex in Turkey In this newly revised and expanded edition, updated throughout with recent developments, geologist Robert Schoch builds upon his revolutionary theory that the origins of the Sphinx date back much further than 2500 BCE and examines scientific evidence of the catastrophe that destroyed early high culture nearly 12,000 years ago. Combining evidence from multiple scientific disciplines, Schoch makes the case that the abrupt end of the last ice age, circa 9700 BCE, was due to an agitated Sun. Solar outbursts unleashed electrical/plasma discharges upon Earth, triggering dramatic climate change as well as increased earthquake and volcanic activity, fires, high radiation levels, and massive floods. Schoch explains how these events impacted the civilizations of the time, set humanity back thousands of years, and led to six millennia of a Solar-Induced Dark Age (SIDA). Applying the SIDA framework to ancient history, he explores how many megalithic monuments, petroglyphs, indigenous traditions, and legends fall logically into

place, including the underground cities of Cappadocia, the Easter Island rongorongo glyphs, and the Göbekli Tepe complex in Turkey. He also reveals that our Sun is a much more unstable star than previously believed, suggesting that history could repeat itself with a solar outburst powerful enough to devastate modern society. Weaving together a new view of the origins and antiquity of civilization and the dynamics of the planet we live on, Schoch maintains we must heed the megalithic warning of the past and collectively prepare for future events.

Lost Technologies of the Great Pyramid Ingram

The Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth • Investigates the Moon as the home of an alien intelligence who controls humanity • Examines several of NASA's Apollo missions and the findings they concealed • Reveals the many holes in the "Giant Impact" theory about the Moon's origins and the evidence for a hollow, artificial Moon • Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabalah, tarot, and other sources Despite being the most prominent celestial body after the Sun, the Moon has many qualities that science has yet to explain. Lunar rock samples reveal the Moon once had a magnetic field like the Earth, and seismic experiments by NASA suggest the Moon is at least partially hollow. For centuries people have observed lights, moving clouds and shadows, and even the disappearance of entire craters via telescope. Apollo astronauts repeatedly felt the presence of a "non-human intelligence" during their Moon visits, and many indigenous traditions speak of malevolent visitors from the Moon. A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world--that someone or something altered it long ago. Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features--its craters, maria, rilles, tunnels, and domes. He examines several of NASA's Apollo missions, showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there. He explains the many holes in the commonly accepted "Giant Impact" theory of the Moon's origins and reveals the evidence for a hollow, artificial Moon placed in orbit eons ago to observe Earth. Examining the deep influence of the Moon on the collective mind of humanity, Proud looks at what the Qabalah, the tarot, and other occult traditions say about the Moon

and interprets G. I. Gurdjieff's teachings that "we are food for the Moon." He investigates the Moon as a gateway to another realm, as the Purgatory of Christianity, and as the home of an alien intelligence who controls and exploits humanity. Examining the Moon from both scientific and esoteric perspectives, Proud shows the Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth.

Poetics, Power, Captivity, and UFOs in the American Uncanny CreateSpace

Clean, sustainable energy solutions from the geniuses of our past and the visionaries of our future • Explores five great but nearly forgotten minds of the past--John Worrell Keely, Nikola Tesla, Viktor Schauberger, Royal Raymond Rife, and T. Townsend Brown--and their revolutionary discoveries • Reveals information from leading experts on cold fusion, zero-point energy, power from water, antigravity, and the free-energy potential of the Searl Effect Generator As the global need for clean, renewable energy grows and the shortage of viable large-scale solutions continues, it is time to look to the geniuses of our past and the visionaries of our future for answers. Taking inspiration from Albert Einstein's statement that "Problems cannot be solved by the same level of thinking that created them," Finley Eversole explains that the key to a pollution- and poverty-free future of infinite energy lies not in pursuing one single method, but in investigating all the possibilities--in uniting as a world in creative pursuit of global transformation. Exploring five nearly unknown geniuses of our past--John Worrell Keely, Nikola Tesla, Viktor Schauberger, Royal Raymond Rife, and T. Townsend Brown--and their revolutionary discoveries about free energy, electricity, water vortex motion, electric ray and super-microscope technology, and antigravity, this book helps to restore their long-suppressed scientific legacies and bring us one step closer to the destiny they foresaw. Eversole has gathered research from leading experts on cold fusion, zero-point energy, power from water, and the free-energy potential of the Searl Effect Generator to reveal technologies that work with Nature's laws and that, if fully implemented, could establish sustainable energy systems in a single generation.

Unlocking the secrets of the pyramids. For thousands of years the pyramids have stood, imposing and enigmatic, refusing to give up their secrets. Why did the Egyptians really build pyramids? What lies

inside the Great Pyramid's hidden chamber and what a

Infinite Energy Technologies Adventures Unlimited Press

A unique study of the engineering and tools used to create Egyptian monuments

• Presents a stone-by-stone analysis of key Egyptian monuments, including the statues of Ramses II and the tunnels of the Serapeum • Reveals that highly refined tools and mega-machines were used in ancient Egypt From the pyramids in the north to the temples in the south, ancient artisans left their marks all over Egypt, unique marks that reveal craftsmanship we would be hard pressed to duplicate today. Drawing together the results of more than 30 years of research and nine field study journeys to Egypt, Christopher Dunn presents a stunning stone-by-stone analysis of key Egyptian monuments, including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet. His modern-day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments in prehistoric times. Using modern digital photography, computer-aided design software, and metrology instruments, Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them. His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other, and his examination of the mysterious underground tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet. Providing never-before-seen evidence in the form of more than 280 photographs, Dunn's research shows that while absent from the archaeological record, highly refined tools, techniques, and even mega-machines must have been used in ancient Egypt.

The Giza Death Star The Giza Power Plant Technologies of Ancient Egypt

Challenges the scientific theories on the establishment of civilization and technology • Contains 42 essays by 17 key thinkers in the fields of alternative science and history, including Christopher Dunn, Frank Joseph, Will Hart, Rand Flem-Ath, and Moira Timmes • Edited by Atlantis Rising publisher, J. Douglas Kenyon In *Forbidden History* writer and editor J. Douglas Kenyon has chosen 42 essays that have appeared in the bimonthly journal *Atlantis Rising* to provide readers with an overview of the core positions of key thinkers in the field of ancient mysteries and alternative history. The 17 contributors include among

others, Rand Flem-Ath, Frank Joseph, Christopher Dunn, and Will Hart, all of whom challenge the scientific establishment to reexamine its underlying premises in understanding ancient civilizations and open up to the possibility of meaningful debate around alternative theories of humanity's true past. Each of the essays builds upon the work of the other contributors. Kenyon has carefully crafted his vision and selected writings in six areas: Darwinism Under Fire, Earth Changes--Sudden or Gradual, Civilization's Greater Antiquity, Ancestors from Space, Ancient High Tech, and The Search for Lost Origins. He explores the most current ideas in the Atlantis debate, the origins of the Pyramids, and many other controversial themes. The book serves as an excellent introduction to hitherto suppressed and alternative accounts of history as contributors raise questions about the origins of civilization and humanity, catastrophism, and ancient technology. The collection also includes several articles that introduce, compare, contrast, and complement the theories of other notable authors in these fields, such as Zecharia Sitchin, Paul LaViolette, John Michell, and John Anthony West.

Mystery of the Great Pyramid Solved UNC Press Books

Presents conclusive evidence that ancient Egypt was originally the remnant of an earlier, highly sophisticated civilization • Supports earlier speculations based on myth and esoteric sources with scientific proof from the fields of genetics, engineering, and geology • Provides further proof of the connection between the Mayans and ancient Egyptians • Links the mystery of Cro-Magnon man to the rise and fall of this ancient civilization In the late nineteenth century, French explorer Augustus Le Plongeon, after years of research in Mexico's Yucatán Peninsula, concluded that the Mayan and Egyptian civilizations were related--as remnants of a once greater and highly sophisticated culture. The discoveries of modern researchers over the last two decades now support this once derided speculation with evidence revealing that the Sphinx is thousands of years older than Egyptologists have claimed, that the pyramids were not tombs but geomechanical power plants, and that the megaliths of the Nabta Playa reveal complex astronomical star maps that existed 4,000 years before conventional historians deemed such knowledge possible. Much of the past support for prehistoric civilization has relied on esoteric traditions and mythic narrative. Using hard scientific evidence from the

fields of archaeology, genetics, engineering, and geology, as well as sacred and religious texts, Malkowski shows that these mythic narratives are

based on actual events and that a highly sophisticated civilization did once exist prior to those of Egypt and Sumer. Tying

its cataclysmic fall to the mysterious disappearance of Cro-Magnon culture, Before the Pharaohs offers a compelling new view of humanity's past.
