The book presents case studies from Africa, Asia and Latin America addressing global development issues in the fields of health, energy, ICT and urbanism in an interdisciplinary way. The book illustrates key issues at the interface of technology, human, social, and economic development. Bringing together the best papers of the 2014 EPFL-UNESCO Conference on Technologies for Development, this book explores innovative technologies in the global South. It will be a valuable reference for researchers from engineering, natural sciences, information management, quantitative social sciences, and business faculties, as well as for development practitioners and policy makers. It shows the development potential of technologies, and discusses successful processes to develop and deploy them, as well how to evaluate their impact. The introduction to the book begins with a reflection on key issues regarding technologies for development. The following four sections focus on; (i) Innovative Technologies for Development, (ii) Open Source-Open Access-Open Innovation, (iii) Medical Technologies for the Global South, and (iv) Impact Assessment of Technologies for Development. Individual chapters explore issues such as a need for solid standards for newly developed technologies, how to successfully up-scale technology to a larger region, and how to involve private industry in the development of a technology.

Digital Participation through Social Living Labs connects two largely separate debates: On the one hand, high speed internet access and associated technologies are often heralded as a means to bring about not only connectivity, but also innovation, economic development, new jobs, and regional prosperity. On the other hand, community development research has established that access by itself is necessary but not sufficient to foster digital participation for the broadest possible

range of individuals. Edited by leading scholars from the fields of education, youth studies, urban informatics, librarianship, communication technology, and digital media studies, this book is positioned as a link to connect these debates. It brings together an international collection of empirically grounded case studies by researchers and practitioners from diverse backgrounds. They advance knowledge that fosters digital participation by identifying the specific digital needs, issues and practices of different types of communities as they seek to take advantage of access to digital technologies. Collectively, these cases propose new ways for enabling residents to develop their digital confidence and skills both at home and in their local community, particularly through a 'social living labs' approach. The book is organised around key focus areas: digital skills enhancement, youth entrepreneurship, connected learning, community digital storytelling, community-led digital initiatives and policy development.
