games, and other study tools. FAA Test Questions: Chapter 1 Flashcards | Quizlet Chapter 1 Aircraft Structures Faa This chapter provides a brief introduction to the structure of aircraft and uses an airplane for most illustrations. Light Sport Aircraft (LSA), such as weight-shift control, balloon, glider, powered parachute, and gyroplane have their own handbooks to

include detailed information regarding aerodynamics and control. Chapter 2 Aircraft Structure Faa Par 1-1 Page 1-1 CHAPTER 1. WOOD STRUCTURE SECTION 1. MATERIALS AND PRACTICES 1-1. GENERAL. Wood aircraft construction dates back to the early days of certificated aircraft. Today only a limited number of wood aircraft structures are produced. However, many of the

older airframes remain in service. With proper care, airframes from the 1930's CHAPTER 1. WOOD STRUCTURE CHAPTER 1 Aircraft Structures A Brief History of Aircraft Structures The history of aircraft structures underlies the history of aviation in general. Advances in materials and processes used to construct aircraft have led to their evolution from simple wood truss structures to the sleek aerodynamic flying machines of today.
