How strong is your food safety culture? - HACCP Mentor
 Food Safety Culture
 A strong food safety culture comes from people understanding the importance of making safe food and committing to doing whatever it takes, every time. It starts at the top but needs everyone's support across the business. Read more information on characteristics of a strong culture in our poster (PDF 85 kb).
 Food safety culture - Food Standards Australia New Zealand
 Food Safety Culture refers to the specific culture of a facility: the attitudes, beliefs, practices, and values that determine what is happening when no one is watching. If you want to gauge a site's Food Safety Culture, try asking yourself how the site typically responds to food safety concerns.
 The Importance of Food Safety Culture - Safe Food Alliance
 The Ecolab Food Safety Culture Assessment was developed by renowned food safety expert Frank Yiannas, a leader in food safety and behavior to measure and advance the food safety culture discussion. In today's world, ensuring food safety is more critical than ever.

 In the context of a food safety culture, the C-suite must make decisions and exhibit practices that clearly demonstrate a commitment to the quality and safety of the product. When executives make decisions that value the safety and quality of shipped product over revenues, this is the culture that will boost employee morale and commitment, protect the public interest, and the company's ...
 Building a Food Safety Culture - Global Food Safety Resource
 This is called a Food Safety Culture. Let's get it measured! In the last decade, some authors have already addressed this topic (Griffith, Livesey, & Clayton, 2010; Powell, Jacob, & Chapman, 2011; Yiannas, 2009) even arguing that the Food Safety Culture (or its absence) is a risk factor associated with foodborne diseases.
 Food Safety Culture: How can you measure it? - Nuno F. Soares
 Food safety culture is the essence of food safety practice and goes beyond checklists and science. Food safety culture is how the organization not only adopts and incorporates processes to protect products but extends to how employees view their roles and the organization's role in food safety.
