This study of teacher
preparation policy and

practice in Ireland from Independence in 1921 to the present, highlights, within an international context, the extent to which the focus of preparation moved from nation-building until 1967, when free second-level education was introduced, to one concerned with improving the country's human capital.

A Study of Practices in Teacher-training Institutions Reimbursed from Federal Funds for Vocational Education
Springer
These new essays,

relevant for a variety of fields--history, women's studies, STEM, and family and consumer sciences itself--take current and historical perspectives on home economics philosophy, social responsibility, and public outreach; food and clothing; gender and race in career settings; and challenges to the field's identity and continuity.

Home Economics Education Courses

Springer Nature
What are the prerequisites for reforming education, and

how can these reforms be seen in school development and culture? How should teacher education support this reform process? What are the principles and practices underlying the functioning of the schools of tomorrow? These questions are examined in this unique volume. The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty-first century. According to this approach, the

competencies and skills needed in the future are not merely a new addition to school activities, but rather something requiring a comprehensive reform of school culture encompassing teacher education, curricula, and teaching methods. Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation, the result of which would be schools developing into organizations that are

both creative and imbued with a strong sense of community. A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out-of-school environments. This would link learning to its natural context, eventually leading to an ideal instruction that is actively problem oriented, holistic, and life centered. This reform-minded volume is divided into three parts. The first part focuses on the reform processes in

teacher education, the second on the reforms of pedagogics at schools and teacher education institutions, and the third on the processes of reculturing schools. New prospects for active schools in the United States and Europe, as well as in Japan and China, are discussed.

Women and the History of a Profession Emerald Group Publishing

Until recently, historians tended to dismiss home economics as little more than a conspiracy to keep women in the kitchen.

This landmark volume initiates collaboration among home economists, family and consumer science professionals, and women's historians. What knits the essays together is a willingness to revisit the subject of home economics with neither indictment nor apology. The volume includes significant new work that places home economics in the twentieth century within the context of the development of women's professions. Rethinking Home Economics documents the evolution

of a profession from the home economics movement launched by Ellen Richards in the early twentieth century to the modern field renamed Family and Consumer Sciences in 1994. The essays in this volume show the range of activities pursued under the rubric of home economics, from dietetics and parenting, teaching and cooperative extension work, to test kitchen and product development. Exploration of the ways in which gender, race, and class influenced women's

options in colleges and universities, hospitals, business, and industry, as well as government has provided a greater understanding of the obstacles women encountered and the strategies they used to gain legitimacy as the field developed.

Handbook on Education and the War W. W. Norton & Company

Volume for 1913/14 also includes the reports of the Commissioner of Elementary Schools (1914), Commissioner of Secondary Schools (1914)

and Commissioner of Industrial and Vocational Education (1914).

 Stir It Up explores the changing aims of home economics while putting

the phenomena of Martha Stewart, Rachael Ray, Ty Pennington, and the "Mommy Wars" into historical context.
Bulletin Cornell University Press
 This book draws together the perceptions and experiences from a range of international professionals with specific reference to food education. It presents a variety of teaching, learning and curriculum design approaches relating to food across primary, secondary and vocational school

education, undergraduate initial teacher education programs, and in-service professional development support contexts. Contributions from authors of a variety of background and countries offer insight into some of the diverse issues in food education internationally, lessons to be learned from successes and failures, including action points for the future. The book will be both scholarly and useful to teachers in primary and secondary schools.
Resourcefulness and

Innovation in Changing Times Routledge

An interdisciplinary effort of scholars from history, women's studies, and family and consumer sciences, *Remaking Home Economics* covers the field's history of opening career opportunities for women and responding to domestic and social issues. Calls to “bring back home economics” miss the point that it never went away, say Sharon Y. Nickols and Gwen Kay—home economics has been remaking itself, in study

and practice, for more than a century. These new essays, relevant for a variety of fields—history, women's studies, STEM, and family and consumer sciences itself—take both current and historical perspectives on defining issues including home economics philosophy, social responsibility, and public outreach; food and clothing; gender and race in career settings; and challenges to the field's identity and continuity. Home economics history offers a rich case study for exploring common

ground between the broader culture and this highly gendered profession. This volume describes the resourcefulness of past scholars and professionals who negotiated with cultural and institutional constraints to produce their work, as well as the innovations of contemporary practitioners who continue to change the profession, including its name and identity. The widespread urge to reclaim domestic skills, along with a continual

need for fresh ways to address obesity, elder abuse, household debt, and other national problems affirms the field's vitality and relevance. This volume will foster dialogue both inside and outside the academy about the changes that have remade (and are remaking) family and consumer sciences. Contributors: Elizabeth L. Andress, Rima D. Apple, Jorge H. Atilas, Susan F. Clark, Billie J. Collier, Caroline E. Crocoll, Stephanie M. Foss, Gwen

Kay, Emma M. Laing, Richard D. Lewis, Peggy S. Meszaros, Rachel Louise Moran, Virginia Moxley, Sharon Y. Nickols, Margarete Ordon, Linda Przybyszewski, Penny A. Ralston, Jane Schuchardt. Rethinking Home Economics University of Georgia Press
The surprising, often fiercely feminist, always fascinating, yet barely known, history of home economics. The term "home economics" may conjure traumatic memories of lopsided hand-sewn pillows or

sunken muffins. But common conception obscures the story of the revolutionary science of better living. The field exploded opportunities for women in the twentieth century by reducing domestic work and providing jobs as professors, engineers, chemists, and businesspeople. And it has something to teach us today. In the surprising, often fiercely feminist and always fascinating *The Secret History of Home Economics*, Danielle Dreilinger traces the

field's history from Black colleges to Eleanor Roosevelt to Okinawa, from a Betty Crocker brigade to DIY techies. These women—and they were mostly women—became chemists and marketers, studied nutrition, health, and exercise, tested parachutes, created astronaut food, and took bold steps in childhood development and education. Home economics followed the currents of American culture even as it shaped them. Dreilinger brings

forward the racism within the movement along with the strides taken by women of color who were influential leaders and innovators. She also looks at the personal lives of home economics' women, as they chose to be single, share lives with other women, or try for egalitarian marriages. This groundbreaking and engaging history restores a denigrated subject to its rightful importance, as it reminds us that everyone should learn how to cook a meal, balance their account, and fight for a

better world.
