Ethics of business managers vs. entrepreneurs CRC Press
 Nuclear material accounting and control (NMAC) works in a complementary fashion with the international safeguards programme and physical protection systems to help prevent, deter or detect the unauthorized acquisition and use of nuclear materials. These three methodologies are employed by Member States to defend against external threats, internal threats and both State actors and non-State actors. This publication offers guidance for implementing NMAC measures for nuclear security at the nuclear facility level. It focuses on measures to mitigate the risk posed by insider threats and describes elements of a programme that can be implemented at a nuclear facility in coordination with the physical protection system for the purpose of deterring and detecting unauthorized removal of nuclear material.

Managing Educational Tourism Penguin

Published in Indonesia in 2005, The Rainbow Troops, Andrea

Hirata's closely autobiographical debut novel, sold more than five million copies, shattering records. Now it promises to captivate audiences around the globe. Ikal is a student at the poorest village school on the Indonesian island of Belitong, where graduating from sixth grade is considered a remarkable achievement. His school is under constant threat of closure. In fact, Ikal and his friends—a group nicknamed the Rainbow Troops—face threats from every angle: skeptical government officials, greedy corporations hardly distinguishable from the colonialism they've replaced, deepening poverty and crumbling infrastructure, and their own low self-confidence. But the students also have hope, which comes in the form of two extraordinary teachers, and Ikal's education in and out of the classroom is an uplifting one. We root for him and his friends as they defy the island's powerful tin mine officials. We meet his first love, the unseen girl who sells chalk from behind a shop screen, whose pretty hands capture Ikal's heart. We cheer for Lintang, the class's barefoot math genius, as he bests the students of the mining corporation's school in an academic challenge. Above all, we gain an intimate acquaintance with the customs and people of the world's largest Muslim society. This is classic storytelling in

the spirit of Khaled Hosseini's *The Kite Runner*: an engrossing depiction of a milieu we have never encountered before, bursting with charm and verve.

Guesstimation is a book that unlocks the power of approximation--it's popular mathematics rounded to the nearest power of ten!

The ability to estimate is an important skill in daily life. More and more leading businesses today use estimation questions in interviews to test applicants' abilities to think on their feet.

Guesstimation enables anyone with basic math and science skills to estimate virtually anything--quickly--using plausible

assumptions and elementary arithmetic. Lawrence Weinstein and John Adam present an eclectic array of estimation problems that range from devilishly simple to quite sophisticated and from

serious real-world concerns to downright silly ones. How long would it take a running faucet to fill the inverted dome of the Capitol? What is the total length of all the pickles consumed in the US in one year? What are the relative merits of internal-

combustion and electric cars, of coal and nuclear energy? The problems are marvelously diverse, yet the skills to solve them are the same. The authors show how easy it is to derive useful

ballpark estimates by breaking complex problems into simpler, more manageable ones--and how there can be many paths to the

right answer. The book is written in a question-and-answer format with lots of hints along the way. It includes a handy appendix

summarizing the few formulas and basic science concepts needed, and its small size and French-fold design make it

conveniently portable. Illustrated with humorous pen-and-ink sketches, Guesstimation will delight popular-math enthusiasts

and is ideal for the classroom.

Winner, 2021 Reference & Bibliography Award in the 'Reference' Section, given by the Association of Jewish Libraries An

unprecedented treasury of Yiddish children's stories and poems enhanced with original illustrations While there has been a recent

boom in Jewish literacy and learning within the US, few resources exist to enable American Jews to experience the rich primary

sources of Yiddish culture. Stepping into this void, Miriam Udel has crafted an exquisite collection: *Honey on the Page* offers a

feast of beguiling original translations of stories and poems for children. Arranged thematically--from school days to the

holidays--the book takes readers from Jewish holidays and history to folktales and fables, from stories of humanistic ethics

to multi-generational family sagas. Featuring many works that are appearing in English for the first time, and written by both

prominent and lesser-known authors, this anthology spans the Yiddish-speaking globe--drawing from materials published in

Eastern Europe, New York, and Latin America from the 1910s, during the interwar period, and up through the 1970s. With its

vast scope, *Honey on the Page* offers a cornucopia of delights to families, individuals and educators seeking literature that speaks

to Jewish children about their religious, cultural, and ethical heritage. Complemented by whimsical, humorous illustrations by

Paula Cohen, an acclaimed children's book illustrator, Udel's evocative translations of Yiddish stories and poetry will delight

young and older readers alike.

An innovation in learning improves upon the implementation of the standard practice or introduces a new practice, thus achieving greater learning outcomes. The Handbook on Innovations in Learning, developed by the Center on Innovations in Learning, presents commissioned chapters describing current best practices of instruction before embarking on descriptions of selected innovative practices which promise better methods of engaging and teaching students. Written by a diverse and talented field of experts, chapters in the Handbook seek to facilitate the adoption of the innovative practices they describe by suggesting implementation policies and procedures to leaders of state and local education agencies.

"A delightfully original take on...the prospects for liberal democracy in the broader Islamic Middle East."—Matthew Kaminski, *Wall Street Journal* As the Arab Spring threatens to give way to authoritarianism in Egypt and reports from Afghanistan detail widespread violence against U.S. troops and women, news from the Muslim world raises the question: Is Islam incompatible with freedom? In *Islam without Extremes*, Turkish columnist Mustafa Akyol answers this question by revealing the little-understood roots of political Islam, which originally included both rationalist, flexible strains and more dogmatic, rigid ones. Though the rigid traditionalists won out, Akyol points to a flourishing of liberalism in the nineteenth-century Ottoman Empire and the unique "Islam-liberal synthesis" in present-day Turkey. As he powerfully asserts, only by accepting a secular state can Islamic societies thrive. *Islam without Extremes* offers a desperately needed intellectual basis for the reconcilability of Islam and liberty.

Educational Dualism in Malaysia Lioncrest Publishing

In 1899 while serving in the 2nd Boer War, Robert Baden-Powell penned his sixth military book, *Aids To Scouting*. It was a non-typical training manual filled with personal stories of intrigue and even games. Its goal was to encourage the development of light reconnaissance scouting skills within the British Army. The book was well received by various armies of its time, including the French Army. His successful defense of Mafeking (1899-1900) in South Africa made Baden-Powell a well-known national hero in Britain. But what completely surprised Baden-Powell was that his book was eagerly taken up by teachers and youth groups to help organize outdoor activities and sport. He eventually embraced the idea of adapting his work into a new youth-oriented book, *Scouting for Boys* (1908) which went on to sell approx. 150 million copies to date. It was that follow-on book that firmly launched the international Boy Scouts movement. *Aids to Scouting* contains sections on the characters of a scout, as well as practical advice on observation, stealth/camouflage, map reading, sketching, tracking, reporting and care of horses. It presents these topics in a simple conversational style that makes it easy to read, and is illustrated with personal anecdotes of military adventures by the author. It gives scholars clear insights into his mindset and beliefs that served him well in the siege of Mafeking and shows a clear lineage to the formation of the tenets of his formation of the Boy Scouts. Anyone interested in the history of Boy Scouting will definitely want to read this interesting and formative book. (NOTE - Appendix C contents is missing in this Kindle version - but we hope to update the ebook with it once a suitable facsimile can be referenced).
