Down to Earth Sociology: 14th Edition SAGE Publications

This Fourth Edition of George Ritzer's *Introduction to Sociology* shows students the relevance of sociology to their lives. While providing a rock-solid foundation, Ritzer illuminates traditional sociological concepts and theories, as well as some of the most compelling contemporary social phenomena: globalization, consumer culture, the digital world, and the "McDonaldization" of society. With examples on every page from current events and contemporary research, and stories about "public" sociologists who are engaging with the critical issues of today, the text demonstrates the power of sociology to explain the world, and the diversity of questions that sociologists seek to answer. New to this Edition New "Trending" boxes focus on influential books written by sociologists that have become part of the public conversation about important issues. Replacing "Public Sociology" boxes, these boxes demonstrate the diversity of sociology's practitioners, methods, and subject matter, and feature such authors as: Michelle Alexander (*The New Jim Crow*) Elizabeth Armstrong and Laura Hamilton (*Paying for the Party*) Randol Contreras (*The Stick-Up Kids*) Matthew Desmond (*Evicted*) Kimberly Hoang (*Dealing in Desire*) Arlie Hochschild (*Strangers in Their Own Land*) Eric Klinenberg (*Going Solo*) C.J. Pascoe (*Dude, You're a Fag*) Lori Peek and Alice Fothergill (*Children of Katrina*) Allison Pugh (*The Tumbleweed Society*) Updated examples in the text and "Digital Living" boxes keep pace with changes in digital technology and online practices, including Uber, bitcoin, net neutrality, digital privacy, WikiLeaks, and cyberactivism. New or updated subjects apply sociological thinking to the latest issues including: the 2016 U.S. election Brexit the global growth of ISIS climate change President Trump's proposed Mexican border wall further segmentation of wealthy Americans in the "super rich" transgender people in the U.S. armed forces charter schools the legalization of marijuana the Flint water crisis fourth-wave feminism

Three basic premises guide this highly successful introductory text - first that theory and research must be both comprehensive

and clear, second that the text must show how sociology is relevant both to the study of society and to students' lives and third that sociology can play a valuable role in teaching critical thinking skills. To that end, this solid, well respected text combines a balanced three-perspective approach with excellent student oriented examples, and distinctive social policy sections in a concise presentation that offers an alternative to full length books.

This collection brings together a carefully curated selection of researchers from law, sociology, anthropology, philosophy, history, social ontology and international relations, in order to examine how law and custom interact within specific material and spatial contexts. Normativity develops within these contexts, while also shaping them. This complex relationship exists within all physical places from traditional agrarian spaces to the modern shifting post-industrial workplace. The contributions gathered together in this volume explore numerous examples of such spaces from different disciplinary perspectives to interrogate the dynamic relationship between custom and law, and the material spaces they inhabit. While there are a dynamic series of conclusions regarding this relationship in different material realities, a common theme is pursued throughout: a proper understanding of law and custom stems from their material locatedness within the power dynamics of particular spaces, which, in turn, are reflexively shaped by that same normativity. The book thus generates an account of the locatedness of law and custom, and, indeed, of custom as a source of law. In this way, it provides a series of linked explorations of normative spaces, but, more fundamentally, it also furnishes a cross-disciplinary toolkit of concepts and critical tools for understanding law and custom, and their relationship. As the diversity of the contributors indicates, this book will be of great interest to legal theorists of different traditions, also legal historians and anthropologists, as well as sociologists, historians, geographers and developmental economists.

The author approaches this subject with a desire to help students find and use sociology in everyday life.
