Microbes are the most abundant organisms in the biosphere and regulate many critical elemental and biogeochemical phenomena. Because microbes are the key players in the carbon cycle and in related biological reactions, microbial ecology is a vital research area for understanding the contribution of the biosphere in global warming and the response of the natural environment to climate variations. The beneficial uses of microbes have enabled constructive and cost-effective responses that have not been possible through physical or chemical methods. This new volume reviews the multifaceted interactions among microbes, ecosystems, and their pivotal role in maintaining a more balanced environment, in order to help facilitate living organisms coexisting

with the natural environment. With extensive references, tables, and illustrations, this book provides valuable information on microbial utilization for environmental sustainability and provides fascinating insights into microbial diversity. Key features include: Looks at enhancing plant production through growth-promoting arbuscular mycorrhizae, endophytic bacteria, and microbiome networks Considers microbial degradation and environmental management of e-wastes and azo dyes Explores soil-plant microbe interactions in metal-contaminated soils Examines radiation-resistant thermophiles for engineered bioremediation Describes potential indigenous/effective microbes for wastewater treatment processes Presents research on earthworms and microbes for organic farming  
Beneficial Microbes for Sustainable Agriculture and Environmental Management Hachette UK

The first book in the Kay Scarpetta series, from No. 1 bestselling author Patricia Cornwell. Scarpetta is coming to the screen soon,

starring Nicole Kidman and Jamie Lee Curtis. 'America's most chilling writer of crime fiction' The Times A serial killer is on the loose in Richmond, Virginia. Three women have died, brutalised and strangled in their own bedroom. There is no pattern: the killer appears to strike at random - but always early on Saturday mornings. So when Dr Kay Scarpetta, chief medical officer, is awakened at 2.33 am, she knows the news is bad: there is a fourth victim. And she fears now for those that will follow unless she can dig up new forensic evidence to aid the police. But not everyone is pleased to see a woman in this powerful job. Someone may even want to ruin her career and reputation . . . If you're a fan of Patricia Cornwell's ground-breaking Kay Scarpetta series, don't miss her brand-new thriller *Livid* - out now. Praise for the groundbreaking series: 'One of the best crime writers writing today' Guardian 'Devilishly clever' Sunday Times 'The top gun in this field' Daily Telegraph 'Forget the pretenders. Cornwell reigns' Mirror 'The Agatha Christie of the DNA age' Express
