John Wiley & Sons  
BUSTLE BEST BOOK OF THE WEEK PICK NAMED A BOOKSHOP.ORG RECOMMENDED READING OF THE SEASON  
In this charming, deeply atmospheric novel set against the Amalfi Coast of the 1950s, two women form an intense and lasting friendship that embodies the paradoxes of Italian society. Inspired by her own adventurous, unconventional life,

actress and writer Goliarda Sapienza's recently rediscovered novel takes the reader to the sun-drenched town of Positano in southern Italy. There, while working on a film, Goliarda encounters the captivating Erica, a beautiful widow called "Princess" by the locals, who has been the object of much speculation. As the two women grow closer in spite of their different personalities, they gradually reveal more about their thoughts, feelings, and experiences, and the ghosts from their pasts that continue to hang over them. Writing the story of their transformative friendship thirty years later, Goliarda offers a profound reflection on love in its many forms, and opens a window onto an enchanting time and place that lingers in the mind. And this unlikely bond, forged between a leftist idealist and a traditional aristocrat, acts as a microcosm of Italy, illuminating its complex, competing impulses.

Risk Criticism is a study of literary and cultural responses to global environmental risk in an age of unfolding ecological catastrophe. In

2015, the Bulletin of the Atomic Scientists reset its iconic Doomsday Clock to three minutes to midnight, as close to the apocalypse as it has been since 1953. What pushed its hands was not just the threat of nuclear weapons, but also other global environmental risks that the Bulletin judged to have risen to the scale of the nuclear, including climate change and innovations in the life sciences. If we may once have believed that the end of days would come in a blaze of nuclear firestorm, we now suspect that the apocalypse may be much slower, creeping in as chemical toxins, climate change, or nano-technologies run amok. Taking inspiration from the questions raised by the Bulletin's synecdochical "nuclear," Risk Criticism aims to generate a hybrid form of critical practice that brings "nuclear criticism" into conversation with ecocriticism. Through readings of novels, films, theater, poetry, visual art, websites, news reports, and essays, Risk Criticism tracks the diverse ways in which environmental risks are understood and represented today. *Principles of Management (Collection)* Broken

Dimanche Press  
*The Truth About Managing People* offers real solutions for the make-or-break problems faced by every manager. Readers will discover: how to overcome the true obstacles to teamwork; why too much communication can be as dangerous as too little; how to improve hiring and employee evaluations; how to heal layoff survivor sickness; even how to learn charisma. This isn't someone's opinion; it's a definitive, evidence-based guide to effective management: a set of bedrock principles to rely on throughout an entire management career. *The Rules of Management: They're surprisingly easy to learn and live by.* Now, Richard Templar's brought them all together in one place. Templar covers everything from setting realistic targets to holding effective meetings; finding the right people to inspiring loyalty. Learn when and how to let your people think they know more than you (even if they don't) -- and recognize when they really do. The first edition of *The Rules of Management* became a global phenomenon, topping bestseller charts around the world. This

new, even better edition contains 10 brand new rules to take you further, faster. In *Wired to Care*, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are *Wired to Care*, and many of the world's best organizations are, too. *The Merchant Shipping Ordinance 1952* Penerbit UTM Press  
*Blood Sisters* tells the story of Jeong Yeoul, a young Korean college student in the 1980's, when the memory of President Chun Doo-hwan's violent suppression of student demonstrations against martial law was still fresh. Yideum captures with raw honesty the sense of dread felt by many

Korean women during this time as Jeong struggles in a swirl of misguided desires and hopelessness against a society distorted by competing ideologies, sexual violence, and cultural conservatism. Facing this helplessness, her impulse is to escape into the world of art.

*Blood Sisters* is a vivid, powerful portrayal of a woman's efforts to live an authentic life in the face of injustice.

International Shari'ah Research Academy for Islamic Finance (ISRA)

While Western economies generally display dispersed shareholding in listed companies, Asian economies commonly have concentrated shareholding also in publicly listed companies. The principal analysis in *Comparative Takeover Regulation* relates to the role of takeover regulation in different economies. In the Asian context, the nature of takeover regulation may necessitate a different approach, with greater emphasis on the mandatory bids and disclosure of substantial shareholding. The likelihood of hostile takeovers will be minimal. It is these differences among various

jurisdictions that strike at the heart of Varottil and Wan's new work. Ideal for educational institutions that teach corporate law, corporate governance, and mergers and acquisitions, as well as for law firms, corporate counsel and other practitioners, *Comparative Takeover Regulation* provides students and scholars with brand new analysis of this increasingly important field of study.

#### **Stories Business**

*LawBusiness LawBusiness LawCommercial Law in MalaysiaGeneral Principles of Malaysian LawGeneral Principles of Malaysian LawBanking LawThe Commercial Law of MalaysiaEconomic Success of Chinese Merchants in Southeast AsiaIdentity, Ethnic Cooperation and Conflict* With the impressive emergence of Islamic finance as a branch of Islamic economics, the need for a solid knowledge base that encompasses theories, thoughts and applications related to the subject increased in importance. However, writing about Islamic economics is a great challenge due to the differences in opinion on many of its issues. This includes methodologies

for determining the Islamic perspective on economic concepts and issues as well as applicable solutions for today's economic and social problems. It is further argued that Islamic economics topics are not as clear as those in conventional economics as they have their own religious, spiritual and social dimensions. The points of controversy have generated lengthy discussions. Moreover, Islamic economics encompasses a vast array of topics and approaches, from the purely theoretical, which may include philosophy or religious ideas, to mathematical and quantitative analyses. We tried our best throughout this textbook to simplify, clarify and summarise these concepts to make them accessible to all readers including students, practitioners, academics and even interested non-specialists. This textbook presents, discusses and analyses various topics and issues related to Islamic economics ranging from philosophical, epistemological and methodological to microeconomic and macroeconomic perspectives. In this

endeavour, the social aspect of Islamic economics—an essential part of the discipline—is not neglected. The textbook compares Islamic ideas and concepts related to economics with those in conventional economics to highlight Islamic economics as a distinct field of knowledge with an emphasis on the ethical and social aspects. The authors have tried their level best to explain the theoretical concepts as simply as possible without ignoring today's realities and without compromising Shari'ah principles and objectives. One of the main objectives of the book is to provide the reader with Islamic economic ideas and solutions that are realistic and applicable within the current highly globalised economic and business environment, which is largely dominated by conventional interest-based systems and institutions. Despite being written for an elementary-level audience, this textbook can also be beneficial to a wide range of specialist and non-specialist readers and seekers of knowledge. For those specialising in Islamic economics, it is an

appropriate source of reference to gain an overview on different topics relating to the foundations of Islamic economics. At this point, however, it must be mentioned that each topic deliberated upon, by its nature, would require a book on its own to cover all its aspects. Therefore, further exploration is required for Islamic economics specialists. A list of references and recommended readings is provided for that purpose at the end of each chapter. On the other hand, students of mainstream economics, finance and other academic majors will find this textbook an excellent resource for comprehensive knowledge of Islamic economics and its related issues. Universities may benefit from the different topics presented in this textbook in designing or preparing their economics courses at different levels based on their own curriculums and classes. This textbook could be used at the undergraduate level or even for a master's level economics or Islamic economics course, especially in an Islamic banking and finance programme or for an MBA

having a specialisation in Islamic banking and finance where an economics or Islamic economics course is offered. Furthermore, practitioners and interested readers who are seeking essential and simple knowledge about Islamic economics will also find this textbook to be a helpful guide. It is important to mention here that Islamic economics literature shows wide differences among the scholars in almost every subtopic. Presenting all opinions within a limited number of pages is almost impossible. However, with the great contribution of more than 60 scholars from a wide span of countries and from various economic schools, this book represents an important attempt to present the topics and issues from various perspectives with the maximum objectivity possible. Through comprehensive content editing, the editors have striven to improve the flow of arguments, remove inconsistencies and put the ideas together in as coherent a manner as possible. However, the editors acknowledge that some biases and overlaps may still persist.

“A good read for anyone who wants to understand what actually determines whether a developing economy will succeed” (Bill Gates, “Top 5 Books of the Year”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “should be named chief myth-buster for Asian business.” In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell’s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for

growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need “export discipline,” a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron’s stifling of reform to the explosive growth at a Korean steel mill.

“Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic.”

—The Economist

**Principles of the Law of Contract in Malaysia**

Princeton University Press  
Oksana Zabuzhko, author of "the most influential Ukrainian book in the fifteen years since independence," *Fieldwork in Ukrainian Sex*, returns with a gripping short story collection. Oksana Zabuzhko, Ukraine's

leading public intellectual, is called upon to make sense of the unthinkable reality of our times. In this breathtaking short story collection, she turns the concept of truth over in her hands like a beautifully crafted pair of gloves. From the triumph of the Orange Revolution, which marked the start of the twenty-first century, to domestic victories in matchmaking, sibling rivalry, and even tennis, Zabuzhko manages to shock the reader by juxtaposing things as they are--inarguable, visible to the naked eye--with how things could be, weaving myth and fairy tale into pivotal moments just as we weave a satisfying narrative arc into our own personal mythologies. At once intimate and worldly, these stories resonate with Zabuzhko's irreverent and prescient voice, echoing long after reading.

This book provides an original analysis of the economic success of Overseas Chinese merchants in Southeast Asia: The ethnically homogeneous group of Chinese middlemen is an

informal, low-cost organization for the provision of club goods, e.g. contract enforcement, that are essential to merchants' success. The author's theory - and various extensions, with emphasis on kinship and other trust relationships - draws on economics and the other social sciences, and beyond to evolutionary biology. Empirical material from her fieldwork forms the basis for developing her unique, integrative and transdisciplinary theoretical framework, with important policy implications for understanding ethnic conflict in multiethnic societies where minority groups dominate merchant roles.

Catcalling Oxford University Press, USA

Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas

far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Projects continue to grow larger, increasingly strategic, and more complex, with greater collaboration, instant feedback, specialization, and an ever-expanding list of stakeholders. Now more than ever, effective project management is critical for the success of any deliverable, and the demand for qualified Project Managers has leapt into nearly all sectors. Project Management provides a robust grounding in essentials of the field using a managerial approach to both fundamental concepts and real-world practice. Designed for business students, this text follows the project life cycle from beginning to end to demonstrate what successful project management looks like on the ground. Expert discussion details specific techniques and applications, while guiding students through the diverse skill set required to select, initiate, execute, and evaluate today's projects. Insightful coverage of change management provides clear guidance on

handling the organizational, interpersonal, economic, and technical glitches that can derail any project, while in-depth cases and real-world examples illustrate essential concepts in action.

*Financial Accounting and Reporting in Malaysia*

Prentice Hall

One of the outstanding problems of the biologist, whether he be beginning student or specialists, is that of understanding technical terms. The best way to understand and remember technical terms is to understand first their component parts, or roots. This dictionary has been designed primarily to meet the needs of the beginning student, the medical student, and the taxonomist, but it should be of value to all biologists.

### **Imagining Human Rights in Twenty-First Century Theater**

Open Road + Grove/Atlantic About Trees considers our relationship with language, landscape, perception, and memory in the Anthropocene. The book includes texts and artwork by a stellar line up of contributors including Jorge Luis Borges, Andrea Bowers, Ursula K. Le Guin, Ada Lovelace and dozens of others. Holten was artist in residence at Buro BDP. While working on the book she created an alphabet and used it to make a new typeface called Trees. She also made a series of limited edition offset prints based on her Tree Drawings.

**A Novel** University of Michigan Press

There is extraordinary diversity, depth, and complexity in the

encounter between theatre, performance, and human rights. Through an examination of a rich repertoire of plays and performance practices from and about countries across six continents, the contributors to this volume seek to open the way toward understanding the character and significance of this encounter. Divided into three interrelated sections, the book focuses on a range of critical and timely human rights questions as they relate to transitional justice, memory politics, citizenship, the 'War on Terror,' transnational spectatorship, and the global economic order. Authors ask what artists, audiences and readers imagine, expect, and desire from the engagement of theatre and performance with these crucial questions. Ultimately, this book aims to provide nuanced, global perspectives on the emerging and transformative aesthetics, ethics and effects of this encounter at the turn of the twenty-first century.
