Microbiology, Biology, and other science students have been coloring for years in their quest to understand and memorize complex systems. Have fun learning!

*The Biology Coloring Book* Addison Wesley Publishing Company

BACTERIA GERMS COLORING BOOK - PERFECT GIFT FOR KIDS AND ADULTS! This book was created for those who love to relax and color, while also appreciating everything there is to love in life! This coloring book is unlike any other on the market, as it's all about coloring in fun designs and caricatures while also having a wonderful mandala pattern design behind each of them. Take a moment to slow things down and bring some relaxation and imagination into your daily life by

coloring in our amazing assortment design color pages that are just looking for some color in their lives. These adorable character designs and cartoons are filling up every page of the book and just waiting for you to color them in with your favorite pens, pencils, crayons or markers. Even better, you won't just be coloring in cute and cuddly designs of your favorite things, but also a whole set of detailed and original mandala patterns that each cartoon is placed on as well. To make this adorable and humor filled inspiration color book even better, it's not only loaded with a complete set of original coloring pages of your favorite cartoons and art work, it also has 30 original and custom created mandalas to color in as well. Some characters are rotated in different directions and might repeat throughout the book, however, their back pattern design is always unique. Another added bonus within this coloring book, is that each page is on a sheet of it's own, so you won't have to worry about color bleeding through to the other site. On the back of each page you will also find a faint "OriginalColoringPages" message and logo design to keep the inspiration going as you make your way through each of the unique designs and pages in the book. Details of the Coloring Book: SIZE: 8.5x11 PAPER: Black and White Coloring Pages FEATURES: Character Designs with Mandala Background PAGES: 59 Pages COVER: Soft Cover (Matte) Order your copy today!

*The Microbiology Coloring Book* Elsevier Health Sciences

A simplified and effective approach to learning about microbes. Uses the same color-coding techniques found in the series to help students learn and retain more information on standard microbiological concepts such as immune response and viral replication.

**Microbiology For Dummies** Benjamin-Cummings Publishing Company

Color your way to a better understanding of anatomy and physiology with Mosby's Anatomy and Physiology Coloring Book, 2nd Edition. Featuring over 250 colorable anatomy and physiology illustrations, this creative study tool helps you learn to identify anatomical features and remember physiological concepts. Chapters cover body systems individually, with additional chapters on the senses, cells, tissues, and body orientation. Whether you are taking an anatomy course or are just curious about how the body works, this illustrated resource will help you master anatomy and physiology with ease, and have fun doing it. 250 detailed line drawings of anatomy and physiology pictures that are designed to be colored in provide fun tactile exercises to strengthen students' understanding of anatomy. Activities and case studies are linked to the coloring exercises throughout the book to enhance study efforts.

*The Infectious Disease Coloring Book, Instructive Guide, Microbiology Study, Medical and Nursing Students, Infectious Diseses* John Wiley & Sons

Learn biology while having fun with The Biology Student's Self-Test Coloring Book. Instead of reading lecture notes or textbooks, Barron's guide helps you learn biology interactively and retain information more effectively. Useful as a supplement to a biology class or on its own as a self-study guide, Barron's biology coloring book will help you master key concepts and structures. Harper Collins

This custom edition is specifically published for the University of Queensland.

Genetic Reflections - A Coloring Book aims to inspire young students and the public to explore the beauty of science and genetics. The organisms in this book are considered 'model' organisms, as they are widely studied in laboratories with hopes to understand human biology, disease pathologies, and ways to improve agricultural crops. Despite the great differences in shape and size, on the genetic level there are lots of similarities. In every species, DNA sequences consist of the same four building blocks (G, C, A, and T). However, slight changes in their use, even in the same gene, can occur in each species. The way our bodies and cells work are well conserved throughout evolution, even in species that may look very different from us. The beauty of our world, even on the cellular level, is apparent. Genetic Reflections - A Coloring Book is a collaboration between Ahna Skop, Elif Kurt and Caitlin Marks; two UW-Madison undergraduate Skop Lab members. This coloring

book is the outcome of a year-long independent study in Life Sciences Communication with goals to broadly disseminate the Genetic Reflections scientific glass art installation created by Angela Johnson and Ahna Skop. Part of the proceeds of this book will be donated to charities and programs that support STEAM (Science, Technology, Engineering, Arts, and Mathematics) educational innovations or public outreach events.
