T.A.Z.

Written by a Russian prince who renounced his title, this work promotes an anarchist market economy — a system of autonomous cooperative collectives. A century after its initial publication, it remains fresh and relevant.

**Humankind** Farrar, Straus and Giroux  
Anarchist, journalist, drama critic, advocate of birth control and free love, Emma Goldman was the most famous—and notorious—woman in the early twentieth century. This abridged version of her two-volume autobiography takes her from her birthplace in czarist Russia to the socialist enclaves of Manhattan's Lower East Side. Against a dramatic backdrop of political argument, show trials, imprisonment, and tempestuous romances, Goldman chronicles the epoch that she helped shape: the reform movements of the Progressive Era, the early years of and later disillusionment with Lenin's Bolshevik experiment, and more. Sounding a call still heard today, *Living My Life* is a riveting account of political ferment and ideological turbulence. First time in Penguin Classics Condensed to half the length of Goldman's original work, this edition is accessible to those interested in the activist and her extraordinary era

**Time of Anarchy** Yale University Press  
This anthology of Sakolsky's essays contains 20 chapters in a dynamic collage of ideas and action. Born at the beginning of a new century, this vibrant collection glows with flames of discontent and defiance and flows with waves of laughter and possibility. Ranging widely from Mayday to Utopia, from Refusal to Autonomy, and from Insurrection to Imagination, this compilation is in turn defiant, reflective, and playful & -a brick for hurling through

the windows of despair and a doorway to creating an anarchy that is not afraid to dream. Most of these new and selected writings have been published before in a diverse array of dissident publications (before being reworked and remixed for this book) including: *Alternative Press Review*, *Anarchy: A Journal of Desire Armed*, *Black Sun*, *Confluence*, *Fifth Estate*, *Green Anarchy*, *Je Ne Sais Quoi*, *Lip* (on-line), *Minus Tides*, *The Oystercatcher*, *Social Anarchism*, and *Utopian Studies*. Two are culled from previously published volumes (one written for *Rebel Musics*, edited by Daniel Fischlin and Ajay Heble, and the other from the introduction to the *Autonomedia* anthology which Ron Sakolsky edited, *Surrealist Subversions*). All are bathed in the subversive light of anarchy and mad love. A much needed collection from a vastly underappreciated contemporary anarchist writer, teacher, thinker, and organizer.

*The Art of Not Being Governed* The Gospel of Anarchy  
THE SHADOW WATCHERS RETURN! In Seagrove Village, former Shadow Watcher, Tim, receives a stunning text from his ex-fiancé, Mandy, on their secure phone. She's in trouble and needs help. Against objections-she'd broken their engagement to marry another man-Tim responds, and discovers NINA, Nihilists in Anarchy, an international terrorist group the Shadow Watchers have faced before, is after the team again. This time, through Mandy. The breakup had devastated Tim, but what he discovers now forces him to work with Mandy to reveal yet another layer of operatives in the NINA organization. A layer that, for Mandy, strikes close to home and makes her The Marked Bride. Few are who they seem.

Facts are mercurial. And even those fighting this enemy on the Shadow Watchers' side are withholding vital information that endangers all the Shadow Watchers' lives, leaving Tim and Mandy wondering. Can they reveal the truth and protect the nation's interests? Can the team succeed at fighting the enemy and its own side? When all is done, who will survive? And of the survivors, if Tim and Mandy are among them, will they stand together or be robbed of their future once again and be forced apart forever? The Shadow Watchers were introduced in Crossroads Crisis Center series: Book 1: Forget Me Not (Ben) Book 2: Deadly Ties (Mark) Book 3: Not This Time (Joe) And continue in their own Shadow Watchers series: Book 1: The Marked Bride (Tim) Coming Next: Book 2: The Marked Star (Nick)

**Acheron** Penguin Books  
 England, 1191. Richard Lionheart has left the realm bankrupt and leaderless in his quest for glory. Only Prince John seems willing to fight back the tide of chaos threatening England - embodied by the traitorous 'Hood.' But John has a secret weapon: Guy of Gisburne, outcast, mercenary, and now knight. From intercepting the jewel-encrusted skull of John the Baptist to investigating a string of grisly deaths linked to the Prince's own past, Guy is John's hound, combating chaos and fighting the enemies of England wherever they may be found. From Ireland to Marseilles and as far as the Levant, aided by his faithful squire Galfrid and the beautiful and secretive Mélisande, Gisburne battles his way with sword, lance and bow in England's name, drawing ever nearer the day he will have to confront his oldest and greatest foe... Collects the novels Knight of Shadows and The Red

Hand.

*The Accumulation of Freedom* Vintage  
 INSTANT NEW YORK TIMES BESTSELLER  
 A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of

playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action.

Includes Black-and-White Illustrations  
**Dawn of Empire** Harvard University Press

The heartrending story of the Griffiths family, whose devotion allows them to succeed where others fail. Fleeing the hardship and poverty of Wales in 1890, they embrace the optimism and opportunities of America.

**The Enemies of Anarchy** Fifth Estate Incorporated

Translating Anarchy tells the story of the anti-capitalist anti-authoritarians of Occupy Wall Street who strategically communicated their revolutionary politics to the public in a way that was both accessible and revolutionary. By “translating” their ideas into everyday concepts like community empowerment and collective needs, these anarchists sparked the most dynamic American social movement in decades.

**Hunter-Gatherers** Columbia Alternative Library

AN INSTANT NEW YORK TIMES BESTSELLER The “lively” (The New Yorker), “convincing” (Forbes), and “riveting pick-me-up we all need right now” (People) that proves humanity thrives in a crisis and that our innate kindness and cooperation have been the greatest factors in our long-term success as a species. If there is one belief that has united the left and the right, psychologists and philosophers, ancient thinkers and modern ones, it is the tacit

assumption that humans are bad. It's a notion that drives newspaper headlines and guides the laws that shape our lives. From Machiavelli to Hobbes, Freud to Pinker, the roots of this belief have sunk deep into Western thought. Human beings, we're taught, are by nature selfish and governed primarily by self-interest. But what if it isn't true?

International bestseller Rutger Bregman provides new perspective on the past 200,000 years of human history, setting out to prove that we are hardwired for kindness, geared toward cooperation rather than competition, and more inclined to trust rather than distrust one another. In fact this instinct has a firm evolutionary basis going back to the beginning of Homo sapiens. From the real-life Lord of the Flies to the solidarity in the aftermath of the Blitz, the hidden flaws in the Stanford prison experiment to the true story of twin brothers on opposite sides who helped Mandela end apartheid, Bregman shows us that believing in human generosity and collaboration isn't merely optimistic—it's realistic. Moreover, it has huge implications for how society functions. When we think the worst of people, it brings out the worst in our politics and economics. But if we believe in the reality of humanity's kindness and altruism, it will form the foundation for achieving true change in society, a case that Bregman makes convincingly with his signature wit, refreshing frankness, and memorable storytelling. "The Sapiens of 2020." —The Guardian "Humankind made me see humanity from a fresh perspective." —Yuval Noah Harari, author of the #1 bestseller Sapiens Longlisted for the 2021 Andrew Carnegie Medal for Excellence in Nonfiction One of the Washington Post's 50 Notable Nonfiction Works in 2020

**Contemporary Anarchist Studies**

Routledge

Where did the state come from? Where is it going? This study in politogenesis shakes up the status quo. "Worshipping Power" cuts through inadequate theories of early state formation to offer a new analysis of the roles that kinship, religious practice, and commerce have played in stifling self-organization. Gelderloos's partisan approach to human social complexity is highly innovative, yet comprehensible to the layperson. A formidable assault on a social institution whose contemporary ubiquity renders it almost invisible. Peter Gelderloos is an anarchist writer originally from Virginia. He is author of "How Nonviolence Protects the State," "Consensus," and "Anarchy Works."

Infinity Macmillan

Five millennia ago, on the eastern bank of the river Tigris, the course of human history changed forever. . . . The people of Orak cherish their peaceful village and the life they have made. Though not proficient with the bow or sword, they possess a weapon far stronger: the ability to coax food from the ground. This is why the barbarian leader Thutmose-sin hates and fears them. As his marauding clan of bloodthirsty warriors readies itself for the plunder and the kill, the fate of the village rests with the outcast barbarian Eskkar and the woman he loves, the wise and beautiful slave girl Trella—and on a bold, remarkable, never-before-tested plan of defense. For those who have known peace must turn their hands to war, to save from the savage invaders not only their families but their way of life. *A Rule is to Break* Abaddon Books Documents the processes of social disintegration and environmental collapse.

**Living My Life** John Hunt Publishing

The New York Times bestselling Brit in the FBI series continues with this thrilling "popcorn movie in print form"

(Associated Press) pitting special agents Nicholas Drummond and Michaela Caine against a private French space agency that has the power to end the world as we know it. Galactus, France's answer to SpaceX, has just launched a communications satellite into orbit, but the payload actually harbors a frightening weapon: a nuclear bomb that can trigger a massive electromagnetic pulse (EMP). When the satellite is in position, Galactus's second-in-command, Dr. Nevaeh Patel, will have the power to lay waste to the world. A former astronaut, Patel believes she is following the directions of the Numen, aliens who saved her life when she space-walked outside the International Space Station. She is convinced that with the Holy Grail—just discovered by the owner of Galactus, eccentric treasure hunter Jean-Pierre Broussard—she can be reunited with the Numen, change the world's destiny, and become immortal with them. The countdown has begun when Special Agents Nicholas Drummond and Michaela Caine are thrown into the pending disaster. They must stop the EMP that would wreak havoc on communication and electronic systems on Earth, resulting in chaos and anarchy. With their high-octane and suspenseful prose, "Coulter and Ellison are a thriller writer's dream team, and *The Last Second* is some of their best work yet" (The Real Book Spy).

**Creating Anarchy** Manic D Press

In *Black to Nature: Pastoral Return and African American Culture*, author Stefanie K. Dunning considers both popular and literary texts that range from Beyoncé's *Lemonade* to Jesmyn

Ward's *Salvage the Bones*. These key works restage Black women in relation to nature. Dunning argues that depictions of protagonists who return to pastoral settings contest the violent and racist history that incentivized Black disavowal of the natural world. Dunning offers an original theoretical paradigm for thinking through race and nature by showing that diverse constructions of nature in these texts are deployed as a means of rescrambling the teleology of the Western progress narrative. In a series of fascinating close readings of contemporary Black texts, she reveals how a range of artists evoke nature to suggest that interbeing with nature signals a call for what Jared Sexton calls "the dream of Black Studies"—abolition. *Black to Nature* thus offers nuanced readings that advance an emerging body of critical and creative work at the nexus of Blackness, gender, and nature. Written in a clear, approachable, and multilayered style that aims to be as poignant as nature itself, the volume offers a unique combination of theoretical breadth, narrative beauty, and broader perspective that suggests it will be a foundational text in a new critical turn towards framing nature within a cultural studies context.

**The Conquest of Bread** Courier Corporation

We live in a highly connected world with multiple self-interested agents interacting and myriad opportunities for conflict and cooperation. The goal of game theory is to understand these opportunities. This book presents a rigorous introduction to the mathematics of game theory without losing sight of the joy of the subject. This is done by focusing on theoretical highlights (e.g., at least six Nobel Prize winning results are developed from scratch) and by

presenting exciting connections of game theory to other fields such as computer science (algorithmic game theory), economics (auctions and matching markets), social choice (voting theory), biology (signaling and evolutionary stability), and learning theory. Both classical topics, such as zero-sum games, and modern topics, such as sponsored search auctions, are covered. Along the way, beautiful mathematical tools used in game theory are introduced, including convexity, fixed-point theorems, and probabilistic arguments. The book is appropriate for a first course in game theory at either the undergraduate or graduate level, whether in mathematics, economics, computer science, or statistics. The importance of game-theoretic thinking transcends the academic setting—for every action we take, we must consider not only its direct effects, but also how it influences the incentives of others.

*A Million Tears* Penguin

Hunter-gatherers are the quintessential anthropological topic. They constitute the subject matter that, in the last instance, separates anthropology from its sister social science disciplines: psychology, sociology, economics, and political science. In that central position, hunter-gatherers are the acid test to which any reasonably comprehensive anthropological theory must be applied. Several such theories—some narrow, some broad—are examined in light of the hunter-gatherer case in this book. My purpose, then, is that of a review of ideas rather than of a literature. I do not—probably could not—survey all that has been written about hunter-gatherers: Many more works are ignored than considered. That is not because the ones ignored are uninteresting, but because it is my broader purpose to concentrate on

certain theoretical contributions to anthropology in which hunter-gatherers figure most prominently. The book begins with two chapters that deal with the history of anthropological research and theory in relation to hunter-gatherers. The point is not to present a comprehensive or even-handed accounting of developments. Rather, I sketch a history of selected ideas that have determined the manner in which social scientists have viewed, and thus studied, hunter-gatherers. This lays the groundwork for subjects subsequently addressed and establishes two fundamental points. First, the social sciences have always portrayed hunter-gatherers in ways that serve their theories; in short, hunter-gatherer research has always been a theoretical enterprise. Second, these theoretical treatments have generally been either evolutionary or materialist-or both-in perspective.

The Better Angels of Our Nature Little, Brown

This set of 44 volumes, originally published between 1924 and 1995, amalgamates a wide breadth of research on the Labour Movement, including labour union history, the early stages and development of the Labour Party, and studies on the working classes. This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time, and will be of particular interest to students of political history.

*The Spectator* AK Press

At fourteen, Nick Gautier thinks he knows everything about the world around him. Streetwise, tough, and savvy, his quick sarcasm is the stuff of legends. . .until the night when his best friends try to kill him. Saved by a mysterious warrior who has more

fighting skills than Chuck Norris, the teenaged Nick is sucked into the realm of the Dark-Hunters: immortal vampire slayers who risk everything to save humanity. Nick quickly learns that the human world is only a veil for a much larger and more dangerous one: a world where the captain of the football team is a werewolf and the girl he has a crush on goes out at night to stake the undead. But before he can even learn the rules of this new world, his fellow students are turning into flesh-eating zombies--and he's next on the menu. As if starting high school isn't hard enough. . .now Nick has to hide his new friends from his mom, his chain saw from the principal, and keep the zombies and the demon Simi from eating his brains, all without getting grounded or suspended. How in the world is he supposed to do that?

Ecodefense Spatterlight Press

From the acclaimed author and scholar James C. Scott, the compelling tale of Asian peoples who until recently have stemmed the vast tide of state-making to live at arm's length from any organized state society For two thousand years the disparate groups that now reside in Zomia (a mountainous region the size of Europe that consists of portions of seven Asian countries) have fled the projects of the organized state societies that surround them—slavery, conscription, taxes, corvée labor, epidemics, and warfare. This book, essentially an “anarchist history,” is the first-ever examination of the huge literature on state-making whose author evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; agricultural practices that enhance mobility; pliable ethnic identities; devotion to prophetic,

millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. In accessible language, James Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. He redefines our views on Asian politics, history, demographics, and even our fundamental ideas about what constitutes civilization, and challenges us with a radically different approach to history that presents events from the perspective of stateless peoples and redefines state-making as a form of "internal colonialism." This new perspective requires a radical reevaluation of the civilizational narratives of the lowland states. Scott's work on Zomia represents a new way to think of area studies that will be applicable to other runaway, fugitive, and marooned communities, be they Gypsies, Cossacks, tribes fleeing slave raiders, Marsh Arabs, or San-Bushmen.

**Mutual Aid** Pocket Books

"A Rule Is To Break says: Go ahead and throw your best self a party! So glad it exists."—Kristin Hersh, *Throwing Muses*  
 "After encountering the lively little anarchist in John and Jana's delightful A

Rule is To Break, I will always remember the playful little devil with a mind of her own. A children's book on anarchy seems somehow just right: an instinctive, intuitive sense of fairness, community, and interdependence sits naturally enough with a desire for participatory democracy, self-determination, and peace and global justice."—Bill Ayers, author of *To Teach: The Journey in Comics and Fugitive Days*  
 Simply celebrating childhood: the joy, the wonder of discovery, the spontaneity, and strong emotions. . . . Wild Child is free to do as she pleases. A Rule Is To Break: A Child's Guide to Anarchy follows Wild Child as she learns about just being herself and how that translates into kid autonomy. It presents the ideas of challenging societal expectations and tradition and expressing yourself freely in kid-terms that are both funny and thought provoking—it even functions as a guidebook for adults to understand what it is to be a critically thinking, creative individual. Wild Child is the role model for disobedience that is sometimes civil. John Seven and Jana Christy's previous collaboration *The Ocean Story* won Creative Child magazine's 2011 Creative Child Award Seal of Excellence and was shortlisted for the 2012 Green Earth Book Award.
