Mao: The Unknown Story
by Jung Chang and Jon Halliday was published in 2005 to a great fanfare. The book portrays Mao as a monster – equal to or worse than Hitler and

Stalin – and a fool who won power by native cunning and ruled by terror. It received a rapturous welcome from reviewers in the popular press and rocketed to the top of the worldwide bestseller list. Few works on China by writers in the West have achieved its impact. Reviews by serious China scholars, however, tended to take a different view. Most were sharply critical, questioning its authority and the authors' methods, arguing that Chang and Halliday's book is not a

work of balanced scholarship, as it purports to be, but a highly selective and even polemical study that sets out to demonise Mao. This book brings together sixteen reviews of Mao: The Unknown Story – all by internationally well-regarded specialists in modern Chinese history, and published in relatively specialised scholarly journals. Taken together they demonstrate that Chang and Halliday's portrayal of Mao is in many places woefully inaccurate. While

agreeing that Mao had many faults and was responsible for some disastrous policies, they conclude that a more balanced picture is needed.

A lively, inviting account

of the history of economics, told through events from ancient to modern times and the ideas of great thinkers in the field What causes poverty? Are economic crises inevitable under capitalism? Unscaled identifies the forces that are reshaping the global economy and turning one of the fundamental laws of business and society --

the economies of scale -- on its head. An innovative trend combining technology with economics is unraveling behemoth industries -- including corporations, banks, farms, media conglomerates, energy systems, governments, and schools--that have long dominated business and society. Size and scale have become a liability. A new generation of upstarts is using artificial intelligence to automate tasks that once required expensive investment, and "renting"

technology platforms to build businesses for hyper-focused markets, enabling them to grow big without the bloat of giant organizations. In Unscaled, venture capitalist Hemant Taneja explains how the unscaled phenomenon allowed Warby Parker to cheaply and easily start a small company, build a better product, and become a global competitor in no time, upending entrenched eyewear giant Luxottica. It similarly enabled Stripe to take on established payment

processors throughout the world, and Livongo to help diabetics control their disease while simultaneously cutting the cost of treatment. The unscaled economy is remaking massive, deeply rooted industries and opening up fantastic possibilities for entrepreneurs, imaginative companies, and resourceful individuals. It can be the model for solving some of the world's greatest problems, including climate change and soaring health-care costs,

but will also unleash new challenges that today's leaders must address. Managing Your Money All-in-One For Dummies Penguin UK

 Today we need a new type of leader. As we enter the fourth industrial revolution, we need leaders with the wisdom to address new ways of working, to make positive change in the world. One of the key premises of

Mindfulness-Based Leadership is that leadership is about being, not becoming. We make a bigger difference by looking within ourselves than by striving to become what we are not. While mindfulness has often been perceived as a solitary activity, this book reveals how it is applicable on a wider scale - in groups, businesses and the wider community. Mindfulness-

Based Leadership shows us how to balance self and organisational goals, to erase the real and imagined internal conflicts between what we believe in and what we do in reality. Mindfulness expert Kathirasan K presents a unique 56-day course on Mindfulness-Based Leadership. Each day introduces a new facet of mindfulness - through guided introspection,

acceptance and mindful practice - illuminating the ways in which we can unlock the leader within ourselves.
