The Owner-Builder Book Elsevier Health Sciences

A comprehensive learning tool to aid preparation for undergraduate pharmacology examinations, this study guide focuses on reinforcing core concepts, improving technique and developing confidence in answering the style of questions used in the examination. Its aim is to provide an aid to learning and self-assessment for undergraduates in medicine and other health professionals about to find work as independent prescribers. The importance of ensuring patient safety and the quality of patient care is becoming more important nationally and internationally, after a period when it was perhaps somewhat neglected in some academic centres. Though this study guide is not a substitute for a comprehensive text on the subject, it will be a useful aid for revision. There is no current single best answer book available to final year medical students to help them prepare for their final exams. A strong understanding of clinical pharmacology and therapeutics is an essential foundation necessary in the development of a medical career and this book highlights core concepts through a systematic approach, giving students the confidence they need to answer pertinent questions.

Atlantic Publishing Company

Medical Pharmacology & Therapeutics, now in its fifth edition, offers medical students all they need to know to become safe and effective prescribers. It forms a complete, integrated resource for basic pharmaceutical science, pathophysiology, clinical pharmacology, and therapeutics. The fifth edition has been extensively revised and updated throughout. Key features include: Clear, disease-based approach. Presentation of how drugs are used in clinical practice. Succinct explanations of the major pathogenic mechanisms of each disease and consequent clinical signs and symptoms.

Comprehensive reviews of major drug classes relevant to each disease. Structured approach to the principles of disease management - outlining core principles of drug choice and planning a therapeutic regimen for common diseases. Quick-reference drug compendia illustrating key similarities and differences among all BNF-listed drugs in each class. Comes with free e-book on StudentConsult. New sections on key and evolving topics, including prescribing safety and pharmacovigilance. Updated figures to further clarify complex areas. Revised multiple-choice and case-based questions for self-assessment.

The Final Hurdle PasTest Ltd

The questions are divided into two sections - 100 scenario-based questions present clinical vignettes with questions to test students' knowledge within a specific context and 200 knowledge-based questions offering a wide mix and variety of questions encompassing all of the major medical and surgical specialties. Detailed answers and explanations will help to develop students' learning and understanding.
