 This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production

concepts, and whether we now see an end of an alternative to Japanese lean production.

'Shourie has the anecdotal reasoning of Nirad Chaudhuri married to the writing style of Robert Ludlum. Both are in ample evidence in this book.' - India Today
In this incisive commentary, Arun Shourie documents the ways in which our history textbooks have been doctored by leftist historians. Thoroughly researched and riveting, this study brings to light the techniques and frauds that a cabal of some of our best-known academicians has used to promote themselves, and to acquire control over institutions. And then to put these supposedly academic institutions to use. Shourie shows how, in the process, this cabal has perverted India's historical narrative, and thereby vitiated the country's public discourse. Two new chapters bring to light recent developments in the field: how, with their holy scriptures having been repudiated in their holy cities, these 'historians' strive to retain their perches by dominating niche domains; how these efforts are bound to fail; but how their trajectory holds vital lessons for those who seek to replace them. A must read for every Indian who has an interest in the country's history and a stake in its future.

When Lexus launched fifteen years ago, the idea of a Japanese brand that would compete fender to fender with Mercedes-Benz, BMW, and Cadillac seemed preposterous. But Lexus' first sedan shocked the world. The result of hundreds of prototypes, the work of more than 1,000 engineers, and some \$1 billion, the Lexus LS 400 pioneered new ground. Within just a few years, Lexus had transformed itself from an unlikely outsider into one of the industry's leaders as it redefined the idea of the luxury vehicle while also building a dealer network that gave unprecedented attention to service. The Lexus Story describes the brand's rapid ascent-and its travails along the way. The Lexus Story is the first journalistic telling of the history of this extraordinary company. And it is the only account afforded full access to the designers, engineers, dealers, and company leaders who molded the cars and the brand. The Lexus Story takes readers deep inside the making of first-class automobiles, from the creative sparks kindled in Lexus' far-flung design studios to the engineering refinements that translate ideals of performance and luxury into steel, glass, and rubber. Designed to be both readable and visually welcoming with more than 200 full-color photographs, The Lexus Story is a compelling history of a world-class brand.

A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition
In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. Lexus: The Relentless Pursuit reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue
