Handbook of Parenting Beginner's Guide

Tumors of the mediastinum are usually diagnosed in young patients, but they can develop at any age and form any tissue that exists in or passes through the chest cavity. The diagnosis and the accurate assessment of the mediastinum masses represents a challenge, given their clinical variability from asymptomatic to producing symptoms of cough, chest pain, and dyspnea. Mediastinal tumors encompass a wide range of various neoplasms. The localization of mediastinal masses is critical in the diagnosis: the anterior mediastinal masses are generally thymomas, teratomas, substernal thyroid/parathyroid tissue, or lymphomas; the middle mediastinum masses are typically pericardial and bronchogenic cysts; the posterior mediastinum masses are often neurogenic tumors and esophageal cysts. The wide variety of different entities demonstrates a heterogeneous spectrum of clinical and pathologic features, suggesting that a uniform "standard" management of these patients is not appropriate. In this context, the proposed book will provide a comprehensive review of the mediastinal tumors according to different sites of the diseases, including the masses of anterior, middle and posterior mediastinum. The handling of these tumors requires a multidisciplinary approach due to the complex anatomy of the mediastinum as well as the different clinical, radiographic, and prognostic features. This book has risen from the desire to provide to the specialists in the field an easy, updated and practical guidelines title to facilitate the clinical practice of mediastinic masses. This book will be a comprehensive guide to clinical best practices developed through the opinions of experts in the field.

The Enterobacteria Springer

Behaviour management in the classroom can be one of the most challenging aspects of teaching, but with the right approach it can be rewarding and enriching for both student and teacher. A Comprehensive Guide to Classroom Management provides a systematic overview of the major theories and styles of discipline in schools. Drawing on the latest international research, Porter outlines how teachers can develop a personal style in classroom management based on a sound understanding of theory. The emphasis is on proactive, authoritative approaches to discipline to engage students and facilitate the achievement of educational and social goals. Porter demonstrates how it is within the power of schools and teachers to create the conditions under which even disadvantaged or disenfranchised students strive to learn. A Comprehensive Guide to Classroom Management is the essential handbook for preservice teachers and a valuable reference for more experienced teachers who want to develop their approach to complex behavioural challenges. 'True to its title, this is an enormously ambitious - indeed, encyclopaedic - resource that makes a compelling, multilayered case for putting respect for children's needs ahead of our urge to control them.' - Alfie Kohn, author of *Beyond Discipline and Punished by Rewards* 'There is so much to admire and absorb in this impressive and highly readable blend of research, idealism and sound

sense - highly recommended for principals, aspiring school leaders and reflective practitioners teaching students with behavioural difficulties.' - Dr Ted Cole, lead editor of *The Routledge International Companion to Emotional and Behavioural Difficulties*

Sex and Gender Factors Affecting Metabolic Homeostasis, Diabetes and Obesity Flatiron Books

'Dr Gemma is one of the few brave voices in the medical community who is experienced, courageous and confident enough to talk openly about food and its significance in preventing disease to save lives.' Dr Rupy Aujla 'Packed full of leading science in a very accessible way and lots of beautiful recipes too.' The Happy Pear 'The Plant Power Doctor should be on bookshelves of everyone who wants to live a longer, better life.' Dan Buettner 'One of a new wave of GPs who prescribe lifestyle changes as well as drugs.' The Telegraph You can eat your way to a brighter future Just imagine if what you put on your plate could radically improve your health right now AND make you healthier in the future too... British family doctor Gemma Newman explores how a simple change in diet helps many common chronic illnesses - from diabetes and heart disease to obesity - and the science that explains why it works. Enjoy over 60 delicious meal ideas to kick-start your plant-powered eating, along with simple shopping lists and meal plans. This book contains everything you need to futureproof your body and mind. Are you ready to discover the power of plants? Let's dive in...

Surgical Decision Making E-Book Hachette Books

An inspiring collection of drawings and articles exploring the sketchbooks and artistic practices of 50 talented character artists.

Anatomy for Artists Academic Press

The ultimate guide to visual storytelling. Using his extensive experience of working in the comic book industry and for movie studios, Mateu-Mestre explains a step-by-step system for the best visual communication. From creating a single image, visual character development and environment, to composing steady shots, and establishing continuity, with practical examples, this book covers it all.

The Dark Knight Trilogy Penguin

In order for food businesses, scientists and policy makers to develop successful products, services and policies, it is essential that they understand food consumers and how they decide which products to buy. Food consumer behaviour is the result of various factors, including the motivations of different consumers, the attributes of specific foods, and the environment in which food choices occur. Recognising diversity between individual consumers, different stages of life, and different cultural contexts is increasingly important as markets become increasingly diverse and international. The book begins with a comprehensive introduction and analysis of the key drivers of consumer food choices, such as the environment and sensory product features. Part two examines the role of consumers' attitudes towards quality and marketing, and their views on food preparation and technology. Part three covers cultural and individual differences in food choice as well as addressing potentially influential factors such as age and gender. Important topics such as public

health and methods to change consumers' preferences for unhealthy foods are discussed in part four. The final section concludes with advice on developing coherent safety policies and the consumers' responsibility for food production and consumption. Understanding consumers of food products is a standard reference for all those in the food industry concerned with product development and regulation. - Develop an understanding of buyer behaviour to assist developing successful products - Recognise the diversity between consumers and learn how to cater for their needs - Covers cultural and individual differences in food choice

Understanding Consumers of Food Products Springer Science & Business Media

The book provides a reference for years to come, written by world-renowned expert investigators studying sex differences, the role of sex hormones, the systems biology of sex, and the genetic contribution of sex chromosomes to metabolic homeostasis and diseases. In this volume, leaders of the pharmaceutical industry present their views on sex-specific drug discovery. Many of the authors presented at the Keystone Symposium on "Sex and gender factors affecting metabolic homeostasis, diabetes and obesity" to be held in March 2017 in Lake Tahoe, CA. This book will generate new knowledge and ideas on the importance of gender biology and medicine from a molecular standpoint to the population level and to provide the methods to study them. It is intended to be a catalyst leading to gender-specific treatments of metabolic diseases. There are fundamental aspects of metabolic homeostasis that are regulated differently in males and females, and influence both the development of diabetes and obesity and the response to pharmacological intervention. Still, most preclinical researchers avoid studying female rodents due to the added complexity of research plans. The consequence is a generation of data that risks being relevant to only half of the population. This is a timely moment to publish a book on sex differences in diseases as NIH leadership has asked scientists to consider sex as a biological variable in preclinical research, to ensure that women get the same benefit of medical research as men.

Sketching from the Imagination Springer Nature

Taking an approach grounded in the media effects tradition, this book provides a comprehensive, research-oriented treatment of how children and adolescents interact with the media. Chapters review the latest findings as well as seminal studies that have helped frame the issues in such areas as advertising, violence, video games, sexuality, drugs, body image and eating disorders, music, and the Internet. Each chapter is liberally sprinkled with illustrations, examples from the media, policy debates, and real-life instances of media impact.

Fertility Preservation in Male Cancer Patients Amer Society for Microbiology

Using a proven, practical, algorithmic approach, *Surgical Decision Making* summarizes evidence-based guidelines and practice protocols in an easy-to-follow format. Designed to sharpen the decision-making skills of both trainees and practicing surgeons, the 6th Edition directs your focus to the critical decision points in a wide range of clinical scenarios, helping you determine optimal evaluation and management to secure the best possible patient outcomes. Algorithms are accompanied by annotations that explain all critical factors affecting decisions in a concise, readable manner. Reflects the scope of practice of today's general surgeon, with fresh, expert perspectives from new editor Dr. Richard Schulick and numerous new contributors. Contains 58 new chapters and thoroughly revised content throughout. Includes new coverage of Preoperative Evaluation of the

Geriatric Patient, Pancreatic Cystic Neoplasm, Familial Breast Cancer, Resuscitative Endovascular Balloon Occlusion of the Aorta, Blunt Cerebrovascular Injury, and much more. Uses an easy-to-follow, consistent format, with an algorithm on one page and short descriptions explaining the various steps in the decision-making process on the opposite page. Includes explanatory notes that summarize presenting signs and symptoms, laboratory investigation, diagnostic modalities, surgical therapies, and adjuvant therapies for each condition. Encompasses both general surgery and surgical subspecialties—helping you directly manage a broad range of problems. Emphasizes information that frequently appears on board exams.

Competition Demystified Springer Nature

"In this book Harold L. Vogel comprehensively and holistically examines the business economics and investment aspects of major components of the travel industry, including airlines, hotels, casinos, amusement and theme parks, cruise lines, and tourism. The book is designed as an economics-grounded text that uniquely integrates reviews of each sector's history with economics, accounting, and financial aspects and analysis. As such, it provides a concise, up-to-date reference guide for financial analysts, economists, industry executives, legislators and regulators, advertisers, and journalists interested in the economics, financing, and marketing of travel and tourism-related goods and services. The fourth edition of this well-established text updates, refreshes, and significantly broadens the coverage of tourism economics. It includes new sections on travel law and applications of big data and artificial intelligence technologies as well as additional material on demographic spending patterns, the online travel agency business, the pandemic's effects and affects on industry finances, expanded coverage of the cruise line industry, and information on the damage to tourist destinations caused by excessive pollution and traffic."--

Children, Adolescents, and the Media Academic Press

Offering a balanced perspective, this text incorporates the latest research findings and statistics. It provides explanations of biological, psychological and social factors in health issues, reinforced with case studies.

The Blood Group Antigen FactsBook Academic Press

As the presence of genetically modified animal models in research laboratories has multiplied, the role of genetic factors in the pathogenesis of brain disorders has become particularly important. The refinement of molecular genetic methods has continued to broaden our understanding of the genetic factors associated with a variety of disorders. In "Transgenic and Mutant Tools to Model Brain Disorders", leading scientists specializing in this field contribute a timely collection of recent advances featuring a vast array of topics in order to contribute to the diverse approaches taken toward the evaluation of genetically modified models in biomedical research. Opening with several chapters covering general aspects of genetically modified animal models, the book then continues with detailed chapters on models of specific human brain disorders, including OCD, Rett Syndrome, anxiety disorders, depression, and schizophrenia. As a volume in the successful Neuromethods™ series, the chapters provide authoritative reviews covering the most commonly used approaches in the field. Cutting-edge and concise, "Transgenic and Mutant Tools to Model Brain Disorders" offers a comprehensive and descriptive overview on a variety of topics in neuroscience and biological psychiatry.

A Comprehensive Guide to Classroom Management Springer Science & Business Media

A unique clinical focus makes *Consultative Hemostasis and Thrombosis*, 3rd Edition your go-to guide for quick, practical answers on managing the full range of bleeding and clotting disorders.

Emphasizing real-world problems and solutions, Dr. Craig S. Kitchens, Dr. Barbara A. Konkle, and Dr. Craig M. Kessler provide all the clinical guidance you need to make optimal decisions on behalf of your patients and promote the best possible outcomes. Consult this title on your favorite e-reader with intuitive search tools and adjustable font sizes. Elsevier eBooks provide instant portable access to your entire library, no matter what device you're using or where you're located. Efficiently look up concise descriptions of each condition, its associated symptoms, laboratory findings, diagnosis, differential diagnosis, and treatment. Get the latest information on hot topics such as Disseminated Intravascular Coagulation, Thrombophilia, Clinical and Laboratory Assessment and Management, Thrombotic -Thrombocytopenic Purpura, and Heparin-Induced Thrombocytopenia. Apply today's newest therapies, including those that are quickly becoming standard in this fast-changing field. Meet the needs of specific patient groups with a new chapter on Bleeding and the Management of Hemorrhagic Disorders in Pregnancy and an extensively updated chapter on Thrombosis and Cancer. Zero in on key information with a new user-friendly design, and all-new full-color format, abundant laboratory protocols, and at-a-glance tables and charts throughout.

The selection and use of essential in vitro diagnostics Springer Science & Business Media

Current Advances for Development of Functional Foods Modulating Inflammation and Oxidative Stress presents the nutritional and technological aspects related to the development of functional foods with anti-inflammatory and antioxidant effects. Specifically, analytical approaches for the characterization of anti-inflammatory and antioxidant properties of healthy foods and functional constituents, as well as technological strategies for the extraction of compounds and fractions from raw materials to produce anti-inflammatory and antioxidant ingredients are addressed. In addition, the molecular mechanisms by which foods and their components can modulate inflammation and their oxidative stress effects on disease prevention are explored. Finally, clinical research addressing nutritional needs in pathological subjects with inflammatory diseases are considered. - Covers methods of analysis and extraction of anti-inflammatory and antioxidant compounds - Offers an overview of the main anti-inflammatory and antioxidant compounds in foods - Provides a guide on the mechanisms of action and health benefits of anti-inflammatory and antioxidant dietary bioactives

Thymic Tumors Elsevier Health Sciences

Ortner's Identification of Pathological Conditions in Human Skeletal Remains, Third Edition, provides an integrated and comprehensive treatment of the pathological conditions that affect the human skeleton. As ancient skeletal remains can reveal a treasure trove of information to the modern orthopedist, pathologist, forensic anthropologist, and radiologist, this book presents a timely resource. Beautifully illustrated with over 1,100 photographs and drawings, it provides an essential text and material on bone pathology, thus helping improve the diagnostic ability of those interested in human dry bone pathology. Presents a comprehensive review of the skeletal diseases encountered in archaeological human remains Includes more than 1100 photographs and line drawings illustrating skeletal diseases, including both microscopic and gross features Based on

extensive research on skeletal paleopathology in many countries Reviews important theoretical issues on how to interpret evidence of skeletal disease in archaeological human populations

Travel Industry Economics Springer

Regular physical activity is proven to help prevent and treat noncommunicable diseases (NCDs) such as heart disease stroke diabetes and breast and colon cancer. It also helps to prevent hypertension overweight and obesity and can improve mental health quality of life and well-being. In addition to the multiple health benefits of physical activity societies that are more active can generate additional returns on investment including a reduced use of fossil fuels cleaner air and less congested safer roads. These outcomes are interconnected with achieving the shared goals political priorities and ambition of the Sustainable Development Agenda 2030. The new WHO global action plan to promote physical activity responds to the requests by countries for updated guidance and a framework of effective and feasible policy actions to increase physical activity at all levels. It also responds to requests for global leadership and stronger regional and national coordination and the need for a whole-of-society response to achieve a paradigm shift in both supporting and valuing all people being regularly active according to ability and across the life course. The action plan was developed through a worldwide consultation process involving governments and key stakeholders across multiple sectors including health sports transport urban design civil society academia and the private sector.

Ortner's Identification of Pathological Conditions in Human Skeletal Remains MIT Press

A funny, highly personal, gorgeously written account of what it's like to be a 30-year-old man who is told he has an 80-year-old's disease. "Life is great. Sometimes, though, you just have to put up with a little more crap." -- Michael J. Fox In September 1998, Michael J. Fox stunned the world by announcing he had been diagnosed with Parkinson's disease -- a degenerative neurological condition. In fact, he had been secretly fighting it for seven years. The worldwide response was staggering. Fortunately, he had accepted the diagnosis and by the time the public started grieving for him, he had stopped grieving for himself. Now, with the same passion, humor, and energy that Fox has invested in his dozens of performances over the last 18 years, he tells the story of his life, his career, and his campaign to find a cure for Parkinson's. Combining his trademark ironic sensibility and keen sense of the absurd, he recounts his life -- from his childhood in a small town in western Canada to his meteoric rise in film and television which made him a worldwide celebrity. Most importantly however, he writes of the last 10 years, during which--with the unswerving support of his wife, family, and friends -- he has dealt with his illness. He talks about what Parkinson's has given him: the chance to appreciate a wonderful life and career, and the opportunity to help search for a cure and spread public awareness of the disease. He is a very lucky man, indeed. The Michael J. Fox Foundation Michael J. Fox is donating the profits from his book to the Michael J. Fox Foundation for Parkinson's Research, which is dedicated to fast-forwarding the cure for Parkinson's disease. The Foundation will move aggressively to identify the most promising research and raise the funds to assure that a cure is found for the millions of people living with this disorder. The Foundation's web site, MichaelJFox.org, carries the latest pertinent information about Parkinson's disease, including: A detailed description of Parkinson's disease How you can help find the cure Public Services Announcements that are aired on network and cable television stations across the country to

increase awareness Upcoming related Parkinson's disease events and meetings Updates on recent research and developments

American Jewish Year Book 2012 World Health Organization

The twenty-first century is a world in constant change. In *A New Culture of Learning*, Doug Thomas and John Seely Brown pursue an understanding of how the forces of change, and emerging waves of interest associated with these forces, inspire and invite us to imagine a future of learning that is as powerful as it is optimistic. Typically, when we think of culture, we think of an existing, stable entity that changes and evolves over long periods of time. In *A New Culture*, Thomas and Brown explore a second sense of culture, one that responds to its surroundings organically. It not only adapts, it integrates change into its process as one of its environmental variables. By exploring play, innovation, and the cultivation of the imagination as cornerstones of learning, the authors create a vision of learning for the future that is achievable, scalable and one that grows along with the technology that fosters it and the people who engage with it. The result is a new form of culture in which knowledge is seen as fluid and evolving, the personal is both enhanced and refined in relation to the collective, and the ability to manage, negotiate and participate in the world is governed by the play of the imagination. Replete with stories, this is a book that looks at the challenges that our education and learning environments face in a fresh way. **PRAISE FOR A NEW CULTURE OF LEARNING** "A provocative and extremely important new paradigm of a 'culture of learning', appropriate for a world characterized by continual change. This is a must read for anyone interested in the future of education." James J. Duderstadt, President Emeritus, University of Michigan "Thomas and Brown are the John Dewey of the digital age." Cathy Davidson, Professor of Interdisciplinary Studies, Duke University "A New Culture of Learning may provide for the digital media and learning movement what Thomas Paine's *Common Sense* did for the colonists during the American Revolution- a straightforward, direct explanation of what we are fighting for and what we are fighting against." Henry Jenkins, Provost's Professor, USC "A New Culture of Learning is at once persuasive and optimistic - a combination that is all too rare, but that flows directly from its authors' insights about learning in the digital age. Pearls of wisdom leap from almost every page." Paul

Courant, Dean of Libraries, University of Michigan "Brilliant. Insightful. Revolutionary." Marcia Conner, author of *The New Social Learning* "Douglas Thomas and John Seely Brown portray the new world of learning gracefully, vividly, and convincingly." Howard Gardner, Professor, Harvard Graduate School of Education "Thomas and Brown make it clear that education is too often a mechanistic, solo activity delivered to the young. It doesn't have to be that way-learning can be a messy, social, playful, embedded, constant activity. We would do well to listen to their message." Clay Shirky, author of *Cognitive Surplus* "Anyone who fears, as I do, that today's public schools are dangerously close to being irrelevant must read this book. The authors provide a road map-and a lifeline-showing how schools can prosper under the most difficult conditions. It is a welcome departure from all the school bashing." John Merrow, Education Correspondent, PBS NewsHour "American education is at a crossroads. By illuminating how play helps to transform both information networks and experimentation, and how collective inquiry unleashes the power of imagination, *A New Culture of Learning* provides an irresistible path to the future." Joel Myerson, Director, Forum for the Future of Higher Education.

Global Action Plan on Physical Activity 2018-2030 Woodhead Publishing

This book concisely describes the role of omics in precision medicine for cancer therapies. It outlines our current understanding of cancer genomics, shares insights into the process of oncogenesis, and discusses emerging technologies and clinical applications of cancer genomics in prognosis and precision-medicine treatment strategies. It then elaborates on recent advances concerning transcriptomics and translational genomics in cancer diagnosis, clinical applications, and personalized medicine in oncology. Importantly, it also explains the importance of high-performance analytics, predictive modeling, and system biology in cancer research. Lastly, the book discusses current and potential future applications of pharmacogenomics in clinical cancer therapy and cancer drug development.
