HEATH DIAZ

On the Move! Phaidon
Press
Reading Graphic
Design History uses a
series of key artifacts
from the history of
print culture in light of
their specific historical
contexts. It encourages

the reader to look
carefully and critically
at print advertising,
illustration, posters,
magazine art direction
and typography, often
addressing issues of
class, race and gender.
David Raizman's
innovative approach
intentionally
challenges the canon
of graphic design
history and various

traditional understandings of graphic design. He re-examines 'icons' of graphic design in light of their local contexts, avoiding generalisation to explore underlying attitudes about various social issues. He encourages new ways of reading graphic design that take into account a broader context for graphic design activity, rather than broad views that discourage the understanding of difference and the means by which graphic design communicates cultural values. With a foreword by Steven Heller.

Objects, Audiences,
and Literatures

Createspace
Independent Pub

An illustrated,
illuminating insight into

the world of illusion from the world's greatest and most successful magician, capturing its audacious and inventive practitioners, and showcasing the art form's most famous artifacts housed at David Copperfield's secret museum. In this personal journey through a unique and remarkable performing art, David Copperfield profiles twenty-eight of the world's most groundbreaking magicians. From the 16th-century magistrate who wrote the first book on conjuring to the roaring twenties and the man who fooled Houdini, to the woman who levitated, vanished, and caught bullets in her teeth, David Copperfield's History of Magic takes you on a

wild journey through the remarkable feats of the greatest magicians in history. These magicians were all outsiders in their own way, many of them determined to use magic to escape the strictures of class and convention. But they all transformed popular culture, adapted to social change, discovered the inner workings of the human mind, embraced the latest technological and scientific discoveries, and took the art of magic to unprecedented heights. The incredible stories are complimented by over 100 never-before-seen photographs of artifacts from Copperfield's exclusive Museum of Magic, including a 16th-century manual on

sleight of hand, Houdini's straightjackets, handcuffs, and water torture chamber, Dante's famous sawing-in-half apparatus, Alexander's high-tech turban that allowed him to read people's minds, and even some coins that may have magically passed through the hands of Abraham Lincoln. By the end of the book, you'll be sure to share Copperfield's passion for the power of magic.

Penguin

Covering the period 1879 to 1959, and taking in everything from Ibsen to Beckett, this book is volume one of a two-part comprehensive examination of the plays, dramatists, and movements that

comprise modern world drama. Contains detailed analysis of plays and playwrights, connecting themes and offering original interpretations Includes coverage of non-English works and traditions to create a global view of modern drama Considers the influence of modernism in art, music, literature, architecture, society, and politics on the formation of modern dramatic literature Takes an interpretative and analytical approach to modern dramatic texts rather than focusing on production history Includes coverage of the ways in which staging practices, design concepts, and acting styles informed the construction of the dramas
An Oral History as Told

by Jon Stewart, the Correspondents, Staff and Guests Yale University Press
An "innovative" (The New Yorker) retelling of the story of Dracula. Told with the flourish and poise of a talented storyteller, Kostova turns the age-old tale into a compelling "late night page-turner" (San Francisco Chronicle) When a young woman discovers a cache of ancient letters, she is thrown into the turbulent history of her parents' dark pasts. Uncovering a labyrinthine trail of clues, she begins to reconstruct a staggering history of deceit and violence. Debut novelist Elizabeth Kostova creates an adventure of monumental proportions, a

relentless tale that blends fact and fantasy, history and the present, with an assurance that is almost unbearably suspenseful and utterly unforgettable.

MIT Press

A survey of spectacular breadth, covering the history of decorative arts and design worldwide over the past six hundred years

Gone to America MIT Press

Steeped in authentic cultural traditions and spiritual beliefs, this rich and wonderful historical novel follows the times and trials of a family band of the Schi'tsu'umsh Indians, now called the Coeur d'Alene Tribe in northern Idaho.

Through a boy named Sun Bear and his sister, Rainbow Girl, the

band's oral stories are told as it struggles to hold onto what is precious and sacred about life.

Looks at the history of design from the eighteenth century to the present day.

A History of Modern

Drama Gibbs Smith

INSTANT NEW YORK

TIMES BESTSELLER A

dramatically new

understanding of

human history,

challenging our most

fundamental

assumptions about

social evolution—from

the development of

agriculture and cities

to the origins of the

state, democracy, and

inequality—and

revealing new

possibilities for human

emancipation. For

generations, our

remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery,

and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full

of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

What Modern Was
University of Illinois Press

This is a memoir presented in an anthological - like format; in other words, a collection of short stories, on the life of the author. It starts when he was growing

up in the Philippine countryside of Ilocos Sur province. Just like a normal kid, he played with his friends, did crazy things, went to school and moved to Manila, for his college education. He got married while in fifth year college, but still graduated on time. This book relates his struggles, failures, as well as successes, including his coming to America. Searching for the American Dream was no picnic either, but with perseverance, he achieved some of them in modest ways. Foreigners planning to immigrate to the great ol' USA could get glimpses, on what it takes, to come and live in America.

AMERICA BY DESIGN

Farrar, Straus and Giroux

"The twentieth century

loved machines and the speed they made possible. Speeding cars, trains, and planes promised to conquer space and time; their aerodynamic styling and metal skins embodied a new and modern beauty, one that especially enchanted American designers from the late 1920s through the 1950s. Streamlining became the popular American style for all sorts of objects: from toy scooters to typewriters, from power tools to teakettles." "This book celebrates this beauty as epitomized by the work of Raymond Loewy, Kem Weber, Henry Dreyfuss, Norman Bel Geddes, as well as in works by many lesser-known industrial designers whose products are

presented here for the first time. The book also demonstrates the resurgence of interest in streamlining among international vanguard designers from the 1980s to the present." "This volume is illustrated with patent drawings and period photographs showing how these dynamically styled objects were used. The one hundred eighty objects presented here, drawn from the Eric Brill Collection (recently donated to the American Friends of Canada) and supplemented by pieces from the Stewart Collection at the Montreal Museum of Fine Arts, were photographed for this book. A full bibliography, biographies of the designers, and index

complete the study."--

 David Hicks is
 considered to be
 among the foremost
 interior designers of
 the 20th century. From
 the decoration of his
 own house in London in
 1956--in powerful
 colors that heralded an
 end to the drab,
 postwar English look--
 he set the pace for
 interior design both in
 Europe and America.
 David Hicks: Designer
 looks at the most vital
 period of his career,
 from 1958 to 1979.
 Presenting 200 original
 color photos, many
 never before
 published, it displays a
 decorating oeuvre that
 ranged from
 apartments for Helena
 Rubinstein, the

Niarchos children, and
 the Prince of Wales to
 yachts, private jets,
 and the glamorous
 New York offices of
 British Steel. Central to
 the book are the
 interiors of his own
 houses, where he
 mixed antique and
 modern with a
 groundbreaking
 command of style and
 color. This book is a
 splendid overview of
 the entire range of the
 designer's vision and
 talents, with chapters
 on English and New
 York interiors
 interspersed with
 sections on his designs
 for stores and offices,
 furniture and carpets,
 fabrics and wallpapers,
 tablescapes, graphics,
 and books.
*History of Modern
 Design* Laurence King
 Hailed a "significant
 contribution" by The
 New York Times, David

Noble's book *America by Design* describes the factors that have shaped the history of scientific technology in the United States. Since the beginning, technology and industry have been undeniably intertwined, and Noble demonstrates how corporate capitalism has not only become the driving force behind the development of technology in this country but also how scientific research—particularly within universities—has been dominated by the corporations who fund it, who go so far as to influence the education of the engineers that will one day create the technology to be used for capitalist gain. Noble reveals that

technology, often thought to be an independent science, has always been a means to an end for the men pulling the strings of Corporate America—and it was these men that laid down the plans for the design of the modern nation today.

The Century of Modern Design

Doubleday Canada
Architecture and Modern

Literature explores the representation and interpretation of architectural space in modern literature from the early nineteenth century to the present, with the aim of showing how literary production and architectural construction are related as cultural forms in the historical context of modernity.

In addressing this subject, it also examines the larger questions of the relation between literature and architecture and the extent to which these two arts define one another in the social and philosophical contexts of modernity. *Architecture and Modern Literature* will serve as a foundational introduction to the emerging interdisciplinary study of architecture and literature. David Spurr addresses a broad range of material, including literary, critical, and philosophical works in English, French, and German, and proposes a new historical and theoretical overview of this area, in which modern forms of "meaning" in

architecture and literature are related to the discourses of being, dwelling, and homelessness.

Ancient and Modern Britons Oxford University Press

Interior designer David Naylor embraces the broad range of possibilities presented by a world of materials old and new, of objects both found and manufactured. He calls his approach "infusion design," by which he means capturing the ideas of the Old World without forgetting about the present, stirring melting pots of cultures and allowing opposites to coexist, and pulling together objects from around the world. The timelessness, natural warmth, and adaptability of the popular Southwestern

style aesthetic provide an appealing backdrop for his interpretations, which eschew the clichés while retaining the essence. The architectural elements of the region—round beams, adobe walls, natural wood finishes—create a versatile aesthetic that can embrace an infinite variety of designs, while the nomadic nature of Americans generally, who move freely about the country bringing their favorite decor items with them, makes for limitless opportunities to infuse designs with intriguing juxtapositions and unexpected placements. Chapters include: Old World, New World Luxe Americana Contemporary Comfort Mixing It Up Trained as

a painter and visual artist, David Naylor turned to furniture and interior design and has opened his own workrooms and showroom to feature pieces that he incorporates into his design commissions. He has studied at Philadelphia College of Art and later the Pennsylvania Academy of Fine Arts. His design studio, Visions Design Group, is located in Santa Fe, NM.

The Industrial Design Reader

Flammarion
his anthology compiled from volumes 3-10 of Design Issues, includes material from areas seldom discussed in existing surveys and will facilitate the general discourse within the design community on a wide range of conceptual

and methodological issues of contemporary design history. Design history has emerged in recent years as a significant field of scholarly research and critical reflection. With their interest in the conceptualization, production, and consumption of objects (large and small, unique or multiple, anonymous or signed) and environments (ephemeral or enduring, public or private), design historians investigate the multiple ways in which intentionally produced objects, environments, and experiences both shape and reflect their historical moments. This anthology compiled from volumes 3-10 of *Design Issues*, includes material from areas seldom

discussed in existing surveys and will facilitate the general discourse within the design community on a wide range of conceptual and methodological issues of contemporary design history. Individual essays investigate various aspects of design in the modern era. They provide fresh insights on familiar figures such as Harley Earl and Norman Bel Geddes and shed new light on neglected aspects of design history such as the history of women in early American graphic design or the history of modern design in China. The essays are grouped in three broad categories: *Graphic Design*, *Design in the American Corporate Milieu*, and *Design in the Context of National*

Experiences.
Contributors David Brett, Bradford R. Collins, Dennis P. Doordan, David Gartman, Gyorgy Haiman, Larry D. Luchmansingh, Roland Marchand, Enric Satué, Mitchell Schwarzer, Paul Shaw, Svetlana Sylvestrova, Ellen Mazur Thomson, Matthew Turner, John Turpin, Shou Zhi Wang. A Design Issues Reader Designer, Activist, Visual Historian University of Michigan Press
Surveying applied arts and industrial design from the 18th century to the present day, this book explores the dynamic relationship between design and manufacturing, and the technological, social and commercial context in which this relationship developed.

The effects of a vastly enlarged audience for the products of modern design and the complex dynamic of mass consumption are also discussed. Part of this dynamic reveals that products serve as signs for desires that have little to do with need or function. The book also explores the impact of a wealth of new man-made industrial materials and tools on the course of modern design - from steel to titanium, plywood to plastic, cotton to nylon, wire to transistors, and microprocessors to nanotubes. The research, development and applications of these technologies are shown as depending upon far-reaching lines of communication stretching across geographical and

linguistic boundaries. Reviews of the first edition: "...Raizmans book awakens you to examples of design that surround us everywhere, all the time. By the end, the History of Modern Design manages the rare trick of being an authoritative textbook that fuels the imagination.."

Blueprint

The Power of Organizational Architecture Epicenter Press

One of the most important books on the modernist movement in architecture, written by a founder of the Bauhaus school. One of the most important books on the modern movement in architecture, The New Architecture and The Bauhaus poses some of the fundamental

problems presented by the relations of art and industry and considers their possible, practical solution. Gropius traces the rise of the New Architecture and the work of the now famous Bauhaus and, with splendid clarity, calls for a new artist and architect educated to new materials and techniques and directly confronting the requirements of the age.
