 "...a concise reference and practice grammar book for pre-intermediate to upper intermediate students. The grammatical structures covered are particularly relevant for students preparing for the Cambridge English: First exam (known as First Certificate in English, or FCE). It is available with or without answers and is ideal both for self-study and classroom use."--Cover.  
**An Integrated Ecosystem Approach**  
 UNEP/Earthprint  
 Morphology of soils; Soil micromorphology; Soil composition and characterization; Weathering and soil formation; Pedogenic processes: internal, soil-building

processes; Soil environment: External factors of soil formation; Parent material: initial material of the solum; Relief and landscape factors of the soil and its environment; Contributions of climate to the total soil environment; Organisms: biological portion of the soil and its environment; Time as a factor of soil formation; Principles and historical development of soil classification; Modern soil classification systems; Entisols: recently formed soils; Vertisols: shrinking and swelling dark clay soils; Inceptisols: embryonic soils with few diagnostic features; Aridisols: soils of arid regions; Mollisols: grassland soils of steppes and prairies; Spodosols: soils with subsoil, accumulations of sesquioxide and humus; Alfisols: high base status soils; Ultisols: low base status forest soils; Oxisols: sesquioxide - rich, highly

weathered soils of the intertropical regions; Histosols: organic soils.  
*The Economics of Who Goes Where and Why* Routledge  
 Desire, love, hot sex, cool sex, grieving and thriving as a Jewish dyke - it's all here in this rich and warm debut collection of short stories. From the flirtatious adventure of Bobby Silverstein to the inner face politics of Kayla Rosenbaum, *In Her Nature* beats with the heat-seeking energy of women who grab life by the gut and live it to the max. A delicious slice of life born and lived lesbian.  
*Gender Report* UNESCO Publishing  
 The Politics of Laughter in the Social Media Age: Perspectives from the Global South brings to critical and intellectual attention the role of humour in the digital era in the Global South. Many citizens of the Global South live disempowered and precarious

lives. Digital media and humour, as chapters in the volume demonstrate, have empowered these citizens through engagement with power and their peers, enabling a pursuit of a better future. Contributors to the volume, while alive to challenges associated with the digital divide, highlight the potentials of social media and humour to engage and seek redress on issues such as corruption, human rights violations, racism and sexism. Contributors expertly analyse memes, videos, cartoons and other social media texts to demonstrate how citizens mimic, disrupt, ridicule and challenge status quo. This book caters for academics and students in media and communication studies, political studies, sociology and Global South studies.

The Routledge International Handbook on Narrative and Life History Corwin Press

How are abstract concepts and words represented in the brain? That is the central question addressed by the authors of "Words as Social Tools: An Embodied View on Abstract Concepts". First, they focus on the difficulties in defining what abstract concepts and words are, and what they mean in psycholinguistic research. Then the authors go on to describe and critically discuss the main theories on this topic with a special emphasis on the different embodied and grounded theories proposed in cognitive psychology within the last ten years, highlighting the advantages and limitations of each of these theories. The core of this Brief consists of the presentation of a new theory developed by the authors, the WAT (Words As social Tools) view, according to which both sensorimotor (such as perception, action, emotional experiences) and linguistic experiences are at the basis of abstract concepts and of abstract word representation, processing and use. This theory assigns a major role to acquisition: one of the assumptions the authors make is that the different ways in which concrete and abstract words are acquired constrain their brain representation and their use. This view will be compared with the main existing theories on abstractness, from the theory of conceptual metaphors to the theories on multiple representation. Finally, the volume illustrates recent evidence from different areas (developmental, behavioral, cross-cultural, neuropsychological and neural) which converge with and support the authors' theory, leading to the conclusion that in order to account for representation and processing of abstract concepts and words, an extension of embodied and

grounded theories is necessary.

This proven, accessible approach to a curriculum presents a learner-centered approach to math education.

Mathematizing provides both the emergent curriculum and professional development frameworks to help young children learn math throughout their everyday routine and to facilitate teachers' understanding of how to see and support children's math learning at every turn. With this book and its plentitude of case studies, illustrations, photographs, and documentation, the mathematizing adult can interpret children's interests and use that knowledge as a catalyst for creating meaningful and purposeful mathematical lessons and interactions.

*Your Handbook for Action* Routledge

This revised edition of a popular and very successful text will be found invaluable by all students preparing for their 'O' level or equivalent geography examinations in West, East, Central or Southern Africa.

Excelgate Peter Lang Incorporated, International Academic Publishers

Development-induced displacements may lead to loss of land, livelihoods, shelter, property, and access to social facilities, natural resources and cultural heritage, if the affected people are not cushioned by appropriate compensation and social support mechanisms, as well as integrated rehabilitation programmes to mitigate negative impact. As a result, communities often resist relocations and in some instances the emerging conflicts between the responsible authorities and the affected communities delay critical development projects. The policies of the Government of Zimbabwe are geared towards rural development, economic growth and foreign investment. This calls for a complementing review and harmonisation of legislation, policies and practices designed to protect the rights and livelihoods of rural communities affected and displaced by development projects. In 2019, the Centre for Conflict Management and Transformation (CCMT) hosted a series of multi-stakeholder policy dialogues on the issue of development-induced displacements in Zimbabwe. In addition, a research symposium was held in collaboration with the Tugwi Mukosi Multidisciplinary Research Institute (TMMRI, Midlands State University) on Zimbabwean displacement experiences and policy options. This book, with contributions from a wide range of

researchers and practitioners, presents the results of that process.

Cracking the code Iowa State Press

In recent decades, there has been a substantial turn towards narrative and life history study. The embrace of narrative and life history work has accompanied the move to postmodernism and post-structuralism across a wide range of disciplines: sociological studies, gender studies, cultural studies, social history; literary theory; and, most recently, psychology. Written by leading international scholars from the main contributing perspectives and disciplines, *The Routledge International Handbook on Narrative and Life History* seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history work by situating these fields of study within the historical and contemporary context.

Topics covered include: • The historical emergences of life history and narrative study • Techniques for conducting life history and narrative study • Identity and politics • Generational history • Social and psycho-social approaches to narrative history With chapters from expert contributors, this volume will prove a comprehensive and authoritative resource to students, researchers and educators interested in narrative theory, analysis and interpretation.

*Debates in Geography Education* Wiley-Blackwell

*Global Mobility of Research Scientists: The Economics of Who Goes Where and Why* brings together information on how the localization and mobility of academic researchers contributes to the production of knowledge. The text answers several questions, including "what characterizes nationally and internationally mobile researchers?" and "what are the individual and social implications of increased mobility of research scientists?" Eight independent, but coordinated chapters address these and other questions, drawing on a set of newly developed databases covering 30 countries, including the US, the UK, France, Germany, Italy, Japan, Russia, and China, among others. Combines theoretically sound and empirically fascinating results in one volume that has international and interdisciplinary appeal. Covers topics at the forefront of academic, business, and policy discussions Data used in the chapters available at a freely-accessible website

*Achievement Meta-Analysis of Empirical Studies* Springer  
*Global Education Monitoring Report* Univ of California Press

This book focuses on the effect of psychological, social and demographic variables on student achievement and summarizes the current research findings in the field. It addresses the need for inclusive and interpretive studies in the field in order to interpret student achievement literature and suggests new pathways for further studies. Appropriately, a meta-analysis approach is used by the contributors to show the big picture to the researchers by analyzing and combining the findings from different independent studies. In particular, the authors compile various studies examining the relationship between student achievement and 21 psychological, social and demographic variables separately. The philosophy behind this book is to direct future research and practices rather than addressing the limits of current studies.

*Words as Social Tools: An Embodied View on Abstract Concepts* Springer

This guide helps educators implement a continuous school improvement system through application of the seven correlates of effective schools. The authors discuss each correlate, update the knowledge base, and incorporate practical ideas from practitioners in the field. A comprehensive description of practices enables educators to build and sustain a school culture that accommodates the learning expectations and needs of all students.

*Studies in the Principles of Geography* Academic Press

This book provides a significant contribution to the literature on land reform in various African contexts. While the economic evidence is clear that secure property rights are a necessary condition for catalysing broad-based economic development, the governance process by which those rights are secured is less clear. This book details the historical complexity of land rights and the importance of understanding this history in the process of trying to improve tenure security. Through a combination of single country case studies, comparative case studies and regional comparisons, the book is unequivocal that good governance is paramount for improving the performance of land reform programmes. All attempts at moving towards more formal secure tenure require congruence with informal norms, beliefs and values, and a set of clear systems and processes to avoid corruption and unintended negative consequences.

*The Factors Effecting Student Achievement* Solution Tree Press  
 Geomorphology has now reached a certain level where the methodology, scientific content and results being published in the field make it worthy of being considered as a major environmental research area. In preparing *Environmental Geomorphology*, the author has given priority to methodology and illustrative case-histories. Schemes and classifications that would be ill-suited for a naturalistic, empirical and non-systematic discipline like geomorphology have been avoided. The concepts outlined in the text are based on a subdivision of geomorphological resources and hazards (as well as their links with man) together with the consequent risk and impact problems. Each investigation, study or intervention concerning the environment, cannot ignore either the human context in which it occurs or man's history and prospects. It is necessary to have the right dialogue and relationship with the other disciplines making up this system so as to apply the most suitable methodologies and offer the most valid solutions. For some subjects covered in the book, specialists concerned with a particular section of environmental geomorphology were consulted. The text of each chapter is accompanied by several illustrative schemes, figures and photographs, derived from real research and professional experiences. The volume is addressed both to university students studying topics of geomorphology as part of their syllabus, and to researchers and consultants (geologists, geographers, engineers, naturalists, etc.) working in the field.

*A Paddler's Guide to Oregon's Rivers* Springer Nature

Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

*In Her Nature* UNESCO Publishing

This four-part multidisciplinary volume linearly engages with Zimbabwe's not too distant past and present socio-economic and political situation to 2017. It traces, explores, and analyzes the proceedings and internal mechanisms of the country's state of crisis via eclectic lens to primarily argue that, while during the colonial era some western governments were, and could indeed be implicated and held complicit for the negative developments in the country, post-independence, particularly from 1997 to 2017, Zimbabweans must objectively, individually and collectively introspect and take responsibility for some of the crisis. Part 2 consequently examines and paradoxically, both commends and condemns the agency of both the then Mugabe-led government and those Zimbabweans who refused to be victims and devised strategies to survive the crisis, albeit, at times, by victimizing others. Part 3 scrutinizes the highs and lows of the crisis by focusing on some of the prominent personalities of the crisis period covered. It premises that as a result of the November intervention by the military, the crisis had by 2017 reached a watershed, one that could either abate or exacerbate the crisis after Zimbabwe's elections in 2018. Despite the uncertainty which lay ahead, Part 4 audaciously and optimistically, proffers and charts prospective paths and possibilities which are open to the country as it faces the future.

*Learning from Colonial and Post-Colonial Experiences* Elsevier

The Fast Track Land Reform Programme in Zimbabwe has emerged as a highly contested reform process both nationally and internationally. The image of it has all too often been that of the widespread displacement and subsequent replacement of various people, agricultural-related production systems, facets and processes. The reality, however, is altogether more complex. Providing new and much-needed empirical research, this in-depth book examines how processes such as land acquisition, allocation, transitional production outcomes, social life, gender and tenure, have influenced and been influenced by the forces driving the programme. It also explores the ways in which the land reform programme has created a new agrarian structure based on small- to medium-scale farmers. In attempting to resolve the problematic issues the reforms have raised, the author argues that it is this new agrarian formation which provides the greatest scope for improving Zimbabwe's agriculture and development.

Based on a broader geographical scope than any previous study carried out on the subject, this is a landmark work on a subject of considerable controversy.

**Or, Memoirs of the Lives and Works of Eminent Painters, Engravers, Sculptors, and Architects. From the Earliest Ages to the Present Time**

Wiley-Blackwell

Coastal wetlands are under a great deal of pressure from the dual forces of rising sea level and the intervention of human populations both along the estuary and in the river catchment. Direct impacts include the destruction or degradation of

wetlands from land reclamation and infrastructures. Indirect impacts derive from the discharge of pollutants, changes in river flows and sediment supplies, land clearing, and dam operations. As sea level rises, coastal wetlands in most areas of the world migrate landward to occupy former uplands. The competition of these lands from human development is intensifying, making the landward migration impossible in many cases. This book provides an understanding of the functioning of coastal ecosystems and the ecological services that they provide, and suggestions for their management. In this book a CD is included containing color

figures of wetlands and estuaries in different parts of the world. \* Includes a CD containing color figures of wetlands and estuaries in different parts of the world.
