Dr. A. P. J. Abdul Kalam
had a great belief in
the power of the youth.
He met over 21 million
children and young
people in India and
outside and spoke to
them about the power

of knowledge, ambition, moral behavior and the need to bring about change in society. He travelled to almost every corner of the country meeting the youth in schools, universities and institutions and interacted with them like a committed teacher. In *Learning How to Fly* some of his nearly 2, 000 lectures have been compiled. These lectures were addressed to teachers and students in school and beyond. In each one of them he has spoken about preparing oneself best for life, to identify and overcome challenges and how to bring out the best within each individual. Through stories from his own life, those of his teachers and mentors as well as stories of

some of the greatest men and women of the world and the latest developments in science and technology, he shows us the importance of dreams and the hard work needed to turn those dreams into reality. Filled with warmth, inspiration and a positive attitude, *Learning How to Fly* is essential reading for every Indian, young and old.

Childhood of Kalam
Rajpal & Sons

A.P.J. Abdul Kalam was an Indian scientist and scholar who served his nation as president from 2002 to 2007.

A.P.J. Abdul Kalam was an aviation researcher who joined India's guard office after moving on from the Madras Institute of Technology. He was a focal figure in the

improvement of the nation's atomic capacities and was hailed as a public legend after a progression of effective tests in 1998. Kalam filled in as India's president for one term from 2002 to 2007 and passed on of respiratory failure on July 27, 2015. Top Inspiring Thoughts of A. P. J. My Journey Prabhat Prakashan Pvt Limited
Where does inspiration come from? Is it a moment of personal genius? The voice of God speaking directly to us? Or is it the result of good, old-fashioned hard work? Maybe, it's both. The word inspiration literally means to "breathe in." When babies are born, when they begin to live, they breathe. Likewise, we all need inspiration - the breath of life - to truly live. Every now and then we read a book, watch a

movie or simply hear a story where we learn something that dramatically changes our life. It's profound when it happens. But as remarkable as it may be, it is also rare and unpredictable.

In this ground-breaking vision document, first published in 1998, Dr A.P.J. Abdul Kalam and Y.S. Rajan offer a blueprint for India to be counted among the world's top five economic powers by the year 2020. They cite growth rates and development trends to show that the goal is not unrealistic. Past successes—the green revolution and satellite-based communication linking remote regions of the country, for instance—bear them

out. The same sense of purpose can make us a prosperous, strong nation in a matter of years, assert Kalam and Rajan. This is a book that every citizen who hopes for a better India must read.

It was like any other day on the Anna University campus in Chennai. As I was returning to my room in the evening, the vice-chancellor, Prof. A. Kalanidhi, fell in step with me. Someone had been frantically trying to get in touch with me through the day, he said. Indeed, the phone was ringing when I entered the room. When I answered, a voice at the other end said, 'The prime minister wants to talk with you.' Some months earlier, I

had left my post as Principal Scientific Adviser to the Government of India to return to teaching.

Now, as I spoke to the PM, Atal Bihari Vajpayee, my life was set for an unexpected change. Turning Points takes up the incredible Kalam story from where Wings of Fire left off. It brings together details from his career and presidency that are not generally known as he speaks out for the first time on certain points of controversy. It is a continuing saga, above all, of a journey - individual and collective - that will take India to 2020 and beyond as a developed nation.

Gary Vaynerchuk was conceived born on November 14, 1975, in Babruysk, Soviet Union, which came to be known as Belarus after the crumbling of the Soviet Union. He was one of the three youngsters in the family and grew up with a sibling and a sister. After going through the initial three years of his life in Babruysk, Gary moved to the US with his family. His dad was a finance manager, and the more distant family settled in a studio loft in Queens, New York City.

Inspiring Thoughts of Great Educational Thinkers

Harper Collins

'Fresh, attractive, humorous and witty,

Tiya is easy to read because it wears its learning lightly.' - Upamanyu Chatterjee
The perky parrot Tiya's secure world is shattered when he hears an unknown voice urging him to leave his home, the old banyan tree. As he launches into an adventure-filled journey through strange lands, meeting fantastic creatures along the way, Tiya comes to terms with his strengths and weaknesses. He discovers that no one in this universe is ordinary, and that life is a series of experiences that ultimately unshackle you from your own narrow existence. It is up to you to take on this adventure and come out of it as a free spirit. This delightful

fable is irreverent and inspiring at the same time. Written by a monk with several years of learning and experience as a teacher, it is an imaginative rendering of Vedantic and Yoga philosophy. Yet you will find no sermons—only the story of a simple parrot and his formless mentor Hans.

Nuclear capability; self-sufficiency in food production; an array of indigenous satellites and missiles; an unmanned Moon mission—India's achievements in the scientific domain in recent years have been spectacular. But; according to the country's best-known scientist A.P.J. Abdul Kalam and his close associate Y.S. Rajan;

we've only just begun. In a century that many experts predict may belong to India; the realization of the vision of a better future for everyone will require a keen understanding of our needs and this can only be achieved by tailoring our research and innovations to the goal of national development. India to the forefront of the world in the decades to come. The Scientific Indian will speak to every curious and adventurous mind; and especially to tomorrow's scientists and technologists; encouraging us to dream big; and urging us to work hard to make our dreams come true. In The Scientific Indian; the authors of the path-breaking India 2020: A Vision for the New

Millennium return after ten years to the core areas of scientific advancement that are crucial today: space exploration; satellite technology; missile development; earth and ocean resources; the biosphere; food production; energy and water harvesting; health care and communications; to name a few. The road to success is long and difficult marked by sweat, toil and tears. Providing solace, smiles, insights and inspiration is this selection of quotations from some of the world's most successful people. Their words will uplift your spirits, fill you with renewed vigour and help

reinforce your focus and commitment to achieving your dreams. *India 2020* Simon and Schuster
Mission India: A Vision For Indian Youth has been written with the intention of challenging the Indian youth to bring about a positive change in the country by 2020. Kalam starts off by telling the readers that there has never been a time in Indian history such as this, where the nation has 540 million youth and 20 million Indians across the globe. He also states that several developed countries have directed their efforts towards setting up research centers across the country, which has benefited scientists, engineers, and professionals from various spheres. Kalam and Rajan tell the

readers about their goal to make India one among the five top economic powers in the world by 2020. In the beginning of this book, Kalam presents the readers with a question as to whether India can become a developed country. He then provides insights into the current situation in the country, and explains that this goal is a realistic one. In the subsequent chapters, Kalam and Rajan begin to examine the five industries that need to become reasonably self-sufficient in the coming years, and each chapter tells the readers what can be done to bring a positive change in each industry. They also tell the readers about the current education system in the country,

and the latest technology that can be used to improve the quality of education. The readers are also given insights into the present healthcare industry and infrastructural system, which are trademarks of a developed nation. Kalam and Rajan conclude by telling every individual and organization about the role they can play in transforming the nation by 2020

Dr. A.P.J. Abdul Kalam: Biography of A Saintly Scientist

Prabhat Prakashan

This book is an account of how Dr. Kalam visualizes information and Communication technology mining the rural talent. Here, Dr. Kalam presents his dream of schools in India at 2020 as symbiotic nerve centres connecting teachers, students and community;

personifying knowledge that exists in the world. He also makes a clarion call to accelerate the process of societal transformation. This would involve raising the standards of governance and safeguarding the sanctity of public institutions. The book uses the metaphor of a tree to describe the process of knowledge bearing fruits of prosperity in the contemporary globalised world where different phases, formative, adult working life, and post-50 experienced senior citizens, call for different kinds of learning. The book refers to a contextual contribution of a large number of Indian scientists and artists and proves that there

is no age bar to blossom. He advocates creation of conditions that favour growth of diverse individual talents akin to a garden and calls for a scientific mind-set guided by conscience, consensus and by actions that take our social and moral values into account in building our own systems. The book extensively draws from the world literature making an essential inspirational reading. **YOU ARE BORN TO BLOSSOM** by A.P.J.
