The Return of the Pharaoh Andrews UK Limited

UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

The Frighteners is a bizarrely compelling, laugh-out-loud exploration of societies' fascination with the dark, spooky, and downright terrifying side of life. The author--self proclaimed "sinister minister"--opens the book by reflecting on how he went from a horror-obsessed atheist to a God-fearing Christian and then reconciled his love of the macabre with his new faith. In the chapters that follow, Laws takes us on a worldwide romp to shine light on the dark corners of our own minds. An

American hell house--controversial Christian "haunted houses" that act out the horrors of abortion, drug use, etc.—hosts his reflection on the use of horror in religion. A party in London with real life "vampires" exemplifies modern sexual fascination with the parasitic undead. He goes ghost hunting in an underground barbershop where a murderer used to cut hair. A professor in Denmark who is an expert on the recent Slenderman court case helps him explore the link between technology and the supernatural. In accessible and light-hearted prose, Peter Laws takes us from the dark corners of his mind to the underbelly of various macabre cultures to illuminate society's preoccupation with death and horror. *The Frighteners* combines psychology, religious theory, and personal memoir to create a dynamic and fascinating read that is informative and entertaining.

#1 NEW YORK TIMES BEST SELLER • Investigator Lacy Stoltz follows the trail of a serial killer, and closes in on a shocking suspect—a sitting judge—in "one of the best crime reads of the year.... Bristling with high-tech detail and shivering with suspense.... Worth staying up all night to finish" (Wall Street Journal). In *The Whistler*, Lacy Stoltz investigated a corrupt judge who was taking millions in bribes from a crime syndicate. She put the criminals away, but only after being attacked and nearly killed. Three years later, and approaching forty, she is tired of her work for the Florida Board on Judicial Conduct and ready for a change. Then she meets a mysterious woman who is so frightened she uses a number of aliases. Jeri Crosby's father was murdered twenty years earlier in a case that remains unsolved and that has grown stone cold. But Jeri has a suspect whom she has become obsessed with and has stalked for two decades. Along the way, she has discovered other victims. Suspicions are easy enough, but proof seems impossible. The man is brilliant, patient, and always one step ahead of law enforcement. He is the most cunning of all serial killers. He knows forensics, police procedure, and most important: he knows the law. He is a judge, in Florida—under Lacy's jurisdiction. He has a list, with the names of his victims and targets, all unsuspecting people unlucky enough to have crossed his path and wronged him in some way. How can Lacy pursue him, without becoming the next name on his list? *The Judge's List* is by any measure John Grisham's most surprising, chilling novel yet.

"This global affairs veteran has carved out a solid, mature path, including for 'flawed democracies' like the U.S. We'd all be wise to follow." — Vancouver Sun From the author of the Globe and Mail bestseller, *Claws of the Panda*, comes a book quite literally for our times. *Restoring Democracy in an Age of Populists and Pestilence* is a thoughtful account of how we can save democracies from the despots and populists who provide easy answers to complicated situations, dumbing political discourse down to sandbox antics. Manthorpe argues that democracy is more resilient than it appears, and is capable of overcoming the attacks from within and without that have sapped its vigour since the end of the Cold War. He begins with a description of the events of 1989, one of the seminal years in modern history. This saw the end of the Cold War, and the apparent conclusive victory of democracy and its civic values. But the view of these changes as a triumph of democracy — as summed up in Francis Fukuyama's essay "The End of History" — was short-lived. Russia, shorn of its Soviet empire, and the Chinese Communist Party, re-examining its survival after the Tiananmen Square Massacre, began devising ways to counter-attack the West's triumphalism and

these met with considerable success. Internal pressures and contradictions — wealth disparity being chief among them — threaten the survival of many democratic systems. Abandoned industrial workers turn to the repeated platitudes designed to appeal to those left behind without actually offering them the ways and means to catch up. Immigrants, refugees, and the reformist fixations of isolated liberal elites have provided ammunition for would-be despots. Adding to the pressures building on the political norms of our democracies, the COVID-19 pandemic has brought economic and social stand-still for which no country is prepared.

Part IX: 2018 Annual (1879-1895) features contributions by: Deanna Baran, Roger Riccard, David Marcum, Tracy Revels, S.R. Bennett, Nick Cardillo, Robert Stapleton, Kevin Thornton, Leslie Charteris and Denis Green, Shane Simmons, James Moffett, C.H. Dye, Stephan Gaspar, Marcia Wilson, Sonia Featherstone, Geri Schear, David Friend, Mark Mower, and a poem by Amy Thomas... and Forewords in both volumes by Nicholas Meyer, Roger Johnson, and David Marcum. Once again, the adventures of Sherlock Holmes and Dr. Watson continue in this acclaimed anthology series, with thirty-seven new tales presented in two companion volumes - more Holmes than could fit into one book! In 2015, *The MX Book of New Sherlock Holmes Stories* was first published, a huge three-book set featuring over sixty new traditional Holmes exploits, all set within the correct time period. Soon, the demand for even more traditional Holmes adventures led to further volumes. The next year brought Part IV: 2016 Annual, and then Part V: Christmas Adventures. In spring 2017 there was Part VI: 2017 Annual, and that fall revealed the massive two-volume set, Parts VII and VIII: *Eliminate the Impossible*. Now we present another two simultaneous volumes, Parts IX and X: 2018 Annual (1879-1895) and (1896-1916). There can be no argument that Sherlock Holmes is one of the most famous and recognizable figures in the world. There were only sixty narratives brought to us by the original Literary Agent, Sir Arthur Conan Doyle. Clearly that is not enough. Watson once wrote that he kept his unpublished cases in his old Tin Dispatch Box. Now, with the publication of these latest volumes, that box has again been explored by some of today's best Sherlockian writers, all of whom are donating their royalties from these anthologies toward the restoration of Undershaw, one of Sir Arthur Conan Doyle's houses, and the location where *The Hound of the Baskervilles* and many later Holmes stories were completed. Climb the seventeen steps to the sitting room at 221b Baker Street. Sherlock Holmes and Doctor Watson are waiting... The game is afoot!

With his international bestseller, *The Seven Per Cent Solution*, Nicholas Meyer brought to light a previously unpublished case of Sherlock Holmes that reinvigorated the world's interest in the first consulting detective. Now, many years later, Meyer is given exclusive access to Dr. Watson's unpublished journal, wherein he details a previously unknown case. In 1910, Dr. John Watson travels to Egypt with his wife Juliet. Her tuberculosis has returned and her doctor recommends a stay at a sanitarium in a dry climate. than an errant lord.

Mystery crime fiction written in the Golden Age of Murder "An absorbing head-scratcher." —Booklist In the seeming tranquility of Regency Square in Cheltenham live the diverse inhabitants of its ten houses. One summer's evening, the square's rivalries and allegiances are disrupted by a sudden and unusual death—an arrow to the head, shot through an open window at no. 6. Unfortunately for the murderer, an invitation to visit had just been sent by the crime writer Aldous Huxley, staying with his sister at no. 8, to his friend Superintendent Meredith. Three days after his arrival, Meredith finds himself investigating the shocking murder two doors down. Six of the square's inhabitants are keen members of the Wellington Archery Club, but if Meredith thought that the case was going to be easy to solve, he was wrong...
