New Age International

This book is a review of the analytical methods required in most of the quantitative courses taught at MBA programs. Students with no technical background, or who have not studied mathematics since college or even earlier, may easily feel overwhelmed by the mathematical formalism that is typical of

economics and finance courses. These students will benefit from a concise and focused review of the analytical tools that will become a necessary skill in their MBA classes. The objective of this book is to present the essential quantitative concepts and methods in a self-contained, non-technical, and intuitive way.

initially it does not make any sense at all. This book is the result of many years of data collecting about allegedly incurable diseases by the bio-physicist Andreas Kalcker, who dares to speak the truth, offering solutions where there were none until now. After recovering from a disease deemed incurable himself, he has been able to find out the lowest common denominator to all diseases and the reason behind such an effective therapeutic response that raises polemic among the conventionalists. This book contains everything one needs to set out on a new paradigm about their physical and psychic wellness, at the same time that they discover that within the pharmaceutical industry... nothing is what it seems. Andreas Kalcker's new book is written in a simple and comprehensive style that is suitable for both beginners and health professionals, with a valuable collection of data, protocols and recovery testimonials for an A-Z list of diseases. Dr. Isabel Bellostas (Peditrician): "A fearless man in search of the Truth that seeks him." Dr. Jorge Valentín Esteves (Oncologist): "We are deeply grateful to Andreas for his invaluable support for our son and our patients and we want to encourage him so he doesn't lose heart and continues making the world aware of everything he teaches, which is wonderful." Dr. Rosa Ema Peuchot: "I witness the joy of these mothers when they see their children recovered and I value the noble task performed by Dr. Kalcker." Dr. Lucila Vera: "Andreas is a light being who helps patients and doctors with a holistic

This compact and student-friendly book presents the fundamental concepts of accounting. It brilliantly combines two areas of accounting—financial accounting and corporate accounting. While the initial and middle chapters give a clear analysis of financial accounting, the remaining chapters provide a succinct account of corporate accounting. The chapters on financial accounting discuss in detail the concepts of accounting and accounting standards, the process and technique of accounting, source documents and vouchers for recording of transactions. Besides, they deal with the rules of debit and credit, and journal entry and preparation of trial balance as well as errors and their rectification. Finally, these chapters cover the concept and causes of depreciation and methods of recording and providing depreciation, the adjustment required to prepare the final accounts of a trader including the accounting concepts of income and its measurements, and the meaning, objectives and methods of valuation of inventories. Chapters on corporate accounting discuss in detail the issue of shares, forfeiture and reissue of forfeited shares, and issue and redemption of debentures. In addition, they show how the final accounts of a company are prepared as per Schedule VI of the Indian Companies Act, 1956. This well-organized and student-friendly book is intended as a text for the undergraduate students of management (BBA). Besides, anyone who wishes to know about the fundamentals of financial and corporate accounting will find the book extremely useful. Key Features Provides 400 solved problems to illustrate the concepts discussed. Includes 300 unsolved problems for practice. Contains a variety of end-of-chapter questions.
