Like its Gulf neighbours, Bahrain has continued to offset the effects of the drop in oil prices with a host of measures, including moves towards subsidy reduction, now in place to ease the pressure. Despite the downturn, however, the country has continued to push ahead with many big-ticket projects. Counter-cyclical spending in the energy sector is expected to stand the broader economy in good stead in the years to come, as expansion boosts the country's refining capacity and provides a reliable supply of fuel for its heavy industries. Indeed, manufacturing continues to play a significant role, with the \$3bn project to build a sixth potline for Aluminium Bahrain representing the company's largest expansion since potline five came on-stream in 2005. The kingdom's financial sector has long been a dominant player in the region, and despite increasing competition from emerging financial centres in the region, continues to benefit from an advanced regulatory framework, an educated workforce and a relatively low-cost environment.

Report covers news and events in and actions impacting the Indian community.

New York Stock Exchange, American Stock Exchange, Nasdaq Stock Market and regional exchanges Oxford Business Group  
Huffington Post called him "a master of the abandoned"—and for good reason. The "artist" known only as Seph Lawless has spent the last ten years photo-documenting the America that was left behind in the throes of economic instability and overall decline—decrepit shopping malls, houses, factories, even amusement parks. Through nearly two hundred gorgeous and elegiac photographs, *Abandoned* details Lawless's journey into what was once the very heart of American entertainment: the amusement park. Lawless visits deserted parks across the country, capturing in stark detail their dilapidated state, natural overgrowth, and obvious duality of sad and playful symbolism. Previously self-published as *Bizarro*, this updated edition of Lawless's photographic tribute to decaying American amusement parks contains new content and a new foreword. For the first time, the famed photojournalist Seph Lawless makes his moving work available in a stunning trade edition.

Oman's economy contracted by 13.8% in nominal terms in 2015 as the ongoing low oil price environment squeezed growth and led to the largest budget deficit in over a decade. In a bid to tackle the shortfall the government is taking a number of revenue-raising measures such as cutting subsidies and increasing corporation tax, while remaining focused on its long-term diversification goals. Though hydrocarbons still account for 33.9% of GDP and 78.7% of state revenues, non-oil sectors are playing an increasingly prominent role in the country's economic profile. Authorities are targeting heavy industries in particular with plans to boost their GDP contribution to from 19.8% today to 29% by 2020. Meanwhile annual growth of 6% is being targeted in the mining sector, with a host of regulatory initiatives being implemented as the government seeks to boost investor interest. Start reading

Malaysia's natural resources and its well-educated population are some of the many credentials that keep the country in good stead, with priorities centred on preparing for the ASEAN Economic Community in 2015 and steering the policy framework toward more inclusive political representation. The economy is built around global trade, and the government is working to encourage greater private investment. Malaysia's GDP per capita is the highest in South-east Asia, with the exception of smaller countries like Singapore and Brunei Darussalam, \$ reaching 10,548 in 2013 based on a GDP of \$ 307.25bn and a population of almost 30m. The country produces 39% of the world's palm oil and 44% of its exports, and Increasing global demand for the commodity Bodes well for the industry. Malaysia has seen its stock rise in the World was Bank's Annual " the Ease of Doing Business" report, moving up to 6th position in 2014 from 8th the

previous year. 's Avatar Recent times have seen the Government push hard for a Greater role for the : private sector in the country's development, with the various Government Programmes aiming to boost Transparency, accountability and Sustainable Growth. The overall aim of these plans is to elevate Malaysia to become a high -income country by 2020.

The only monarchy in North Africa, Morocco has one of the more diversified GDP mixes in the region, and the mainstays of the economy include agriculture, tourism, and the textiles industry; higher-end manufacturing, IT and communications, and outsourcing are also all becoming increasingly important. The past few years have seen some significant changes, yet the kingdom has remained stable, even amidst the broader regional turmoil. After 2.7% growth in 2012, economic activity in Morocco ramped up in 2013, increasing by 4.4% as GDP hit Dh864.6bn (€76.8bn), driven in large part by the agricultural sector. The kingdom faces exogenous challenges – such as low external demand and high commodity prices – as well as domestic complications including a fiscal deficit and unemployment, but following the government reshuffle in mid-2013, the prospects look far more positive. With the 2014 budget setting a more dynamic tone as the government takes steps to redress key fiscal imbalances, there are strong indicators pointing to the economy's ability to continue to grow.

Many standard BOP models have been undergoing radical transformations. Newer functioning models with inclusivity with holistic, systems approach is the mantra. Development has morphed into community leadership, and societal fabric building

now frames the effect of corporate governance activities on shareholder value. Not surprisingly, new voices have been calling for reinvention of marketing. CEO's cannot get clear, compelling answers about marketing's impact on the bottom line. The adage of Sam Wanamaker- that he knows that 50 percent of his advertisement works but he does not know which half -still haunts management. Consider the following: Economic liberalisation has given a new impetus to the hospitality industry. It costs an average of US\$50-80 million to set up five-star hotels with 300 rentable rooms in India. The gestation period is usually between three and four years. Movements in real estate prices have to be watched, though they have stabilised in the past three years or so. Non-five-star hotels are obviously cheaper and have smaller gestation periods, but international chains are expected to go into the five-star category. Biswajit Pattajoshi offers not only a candid critique of eradicating poverty, through bottom of pyramid spins but more important a clear agenda -indeed the Samaritans agenda-for meaningful change in end of poverty by immortal brand equity white horse. He calls upon leadership to deliver value and solutions, not physicality colours. He believes that the stalwart must understand their building blocks and operations from finance to supplier partnerships. They must co-operate and compete on multidisciplinary teams, because BOP model fails whenever any part of greater agenda fails to cohort with great acres. BOP's are posing titan challenges to manage marketing tornadoes, many of which are exemplary spectaculars in waves of shareholders. Marketing change agents have led to innovative, community building indispensability models that track futuristic transformation eradicating poverty, establishing peace revolution. If community building model's take-off profits are harnessed by the BOP.

With the rapid growth of the nanotechnology industry, the need to understand the biological effects of aerosol exposure has become

increasingly important. Featuring contributions by leading experts in the field, *Aerosols Handbook: Measurement, Dosimetry, and Health Effects, Second Edition* offers an up-to-date overview of many aspects of aerosols, from properties to health effects and epidemiology. Covering indoor, outdoor, industrial, medical, pharmaceutical, and radioactive aerosols, this book explores aerosol dosimetry by defining terms such as exposure and dose. In addition, it looks at nanometer particles, the mechanism of aerosol deposition in the lungs, and modeling deposition with a corresponding uncertainty in risk assessment. The text also emphasizes the importance of accurate aerosol measurements, particularly breathing zone exposure assessments. Examining radioactive aerosols, the book discusses lessons learned from nuclear accidents, radon and thoron, and long-lived radionuclides in the environment. It brings together research on both radioactive and nonradioactive aerosols, supplying readers with a more complete view of how aerosols behave in the lungs. New in This Edition Five new chapters that address the safety of nanomaterials, dealing with nanoparticle cell penetration, high aspect ratio nanomaterials, nanoaerosols in drug delivery, risk assessment, and health effects New chapters on atmospheric pollution related to climate change, chemical analyses of particle filter deposits, and classical nucleation theory New data on measurement, dosimetry, and health effects Updated throughout, this second edition continues to be an essential resource for those who study exposure, dosages, and toxicity to develop treatments for exposure, reduce air pollution, and establish better safety regulations, particularly in industries using nanotechnologies.

NIIR had identified some Hi-Tech Projects for the entrepreneurs and published a book on that projects which titled "Detailed Projects Profile on Selected Hi-Tech Projects". These Hi-tech projects are Aluminium Beverages cans, Beer industry, Compact Disc, Lap Top computers, Optical fibre cables, plastic I. V. Bottles, Solar Power Plant, Telephone Cables and XLPE cables. All the

above projects are based on latest technologies. Each project present with uses and application, market position, manufacturing process, flow diagram. Suppliers of machineries and raw material along with cost estimation. These hi-tech projects have bright market potential and demand would be increased. This book is very informative and useful for relevant entrepreneurs.

Financial services in particular is one non-oil area where the emirate is starting to pull ahead, with recent growth in the Islamic financial services segment fuelling the emirate's ambition of becoming the knowledge-based capital of the Islamic economy in the future. Meanwhile, Dubai's real estate and construction sectors, which were badly affected by the 2008 financial meltdown, are once again thriving as the legacies of the global crisis recede, and the debts incurred from that time are repaid and restructured. Indeed Dubai is now firmly focused on the future, with preparations for Dubai Expo 2020 in particular helping nourish its economic recovery, development and growth in recent years. The event is expected to attract 25m visitors over a six-month period and the build-up is driving development across several sectors. The preparations,
