This thesis analyzes the motivation and performance of 403 acquisitions made by emerging multinational corporations (EMNCs) in Western Europe and North America between 1994 and 2013. The findings indicate that most EMNCs were motivated to acquire in order to obtain access to the upstream and downstream know-how of their target firms. In addition, the thesis' event study results demonstrate that EMNCs on average

generated value for their shareholders with their acquisitions over short periods around acquisition announcement. This result is particularly significant since similar studies on buying firms from developed markets have frequently come to the conclusion that acquirers destroy shareholder value.

The role of the Chief Financial Officer (CFO)

has substantially changed in a world characterized by globalized financial markets and truly global products. The accelerated development of new technologies, products, and markets has led to an increasingly dynamic and uncertain competitive situation. The book demonstrates and discusses the impact of this changing corporate environment on the role and responsibilities of the CFO. A more holistic view that integrates

business and financial decisions is required in order to manage these challenges of globalization. The book shows how the CFO can adopt and implement this management approach and thus play a vital role in the firm's value creation.

Charles Hill's Global Business Today, 4e (GBT) has become an established text in the International Business market for its excellent but concise coverage of the key global issues including the cultural context for global business, cross-border trade and investment, the global monetary system and competition in the global environment. GBT's concise chapters give a general introduction to international business - emphasizing the environmental factors, with less coverage of operations. Charles Hill is renowned for his attention to research trends and that is evident in Global Business Today, 4e

through a variety of real world examples and cases from small, medium, and large companies throughout the world

As an emerging global phenomenon, Islamic economics and the financial system has expanded exponentially in recent decades. Many components of the industry are still unknown, but hopefully, the lack of awareness will soon be stilled. The Handbook of Research on Theory and Practice of Global Islamic Finance provides emerging research on the latest global Islamic economic practices. The content within this publication examines risk management,

economic justice, and stock market analysis. It is designed for financiers, banking professionals, economists, policymakers, researchers, academicians, and students interested in ideas centered on the development and practice of Islamic finance.

Rapid improvements and constant advancements in information technology have inevitably lead to significant changes for businesses across the globe. As a result, some of these large shifts have unfortunately ended in major financial crises. Technology and Financial Crisis: Economical and Analytical Views

investigates financial crises from unique points of view. Not only does this publication consider the broader economical implications that a financial crisis can have on one business or on a whole country, but it also thoroughly discusses the smaller areas which are affected or contribute to the downfall. This book is intended to be of use to the public sector, researchers, practitioners, and educators who are interested in the affects of a financial crises and possible ways to reduce such large scale problems in the future.

Principles of Corporate Finance, 12/e Oxford University Press

A thoroughly revised and updated edition of a textbook for

graduate students in finance, with new coverage of global financial institutions. This thoroughly revised and updated edition of a widely used textbook for graduate students in finance now provides expanded coverage of global financial institutions, with detailed comparisons of U.S. systems with non-U.S. systems. A focus on the actual practices of financial institutions prepares students for real-world problems. After an introduction to financial markets and market participants, including asset management firms, credit rating agencies, and investment banking firms, the book covers risks and asset pricing, with a new overview of risk; the structure of

interest rates and interest rate and credit risks; the fundamentals of primary and secondary markets; government debt markets, with new material on non-U.S. sovereign debt markets; corporate funding markets, with new coverage of small and medium enterprises and entrepreneurial ventures; residential and commercial real estate markets; collective investment vehicles, in a chapter new to this edition; and financial derivatives, including financial futures and options, interest rate derivatives, foreign exchange derivatives, and credit risk transfer vehicles such as credit default swaps. Each chapter begins with learning objectives and

ends with bullet point takeaways and questions. Corporate Investment Decisions IGI Global "We have continued to evolve the structure and content of this textbook in step with the rapidly changing world of international business. This includes completely revising several key chapters, including Chapter 6, on International Trade. This is entirely updated and includes new case studies covering both the trade-war between the US and China and the complex Brexit process. These and other real-world developments have made a wide range of stakeholders much more aware of the significance of global trade interdependencies than in the past.

Chapter 16 on the European Union is also entirely updated to take account of Brexit and a range of new socio-political and economic events in Europe. Chapter 11 ('MNEs as Responsible Stakeholders') has been removed, making this edition more consolidated, with 20 rather than 21 chapters. In place of Chapter 11 we have inserted new sections, frameworks and case studies on responsible business throughout the book as a fundamental dimension of international business theory and practice across all the other chapters. New case studies, such as 'Businesses and NGOs working together on climate change' in Chapter 4, provide additional

material on this topic. Chapter 14, on 'Political risk and negotiation strategy' also features new case studies on the 'US-Venezuela oil dispute' and 'Huawei accused of spying'." *Principles of Management* IGI Global This book is intended for both practising managers who require a thorough knowledge of the principles of making investment decisions in the real world and for students undertaking financial courses whether at undergraduate, MBA or professional levels. The subject matter encompasses relevant aspects of the investment decision varying from a basic introduction to the appraisal techniques available to placing investment decisions

within a strategic context and coverage of recent developments including real options, value at risk and environmental investments.

In a globalized society, individuals in business, government, and a variety of other fields must frequently communicate and work with individuals of different cultures and backgrounds.

Effectively bridging the culture gap is critical to success in such

scenarios. Cross-Cultural Interaction:

Concepts, Methodologies, Tools, and Applications

explores contemporary research and historical perspectives on

intercultural competencies and

transnational organizations. This

three-volume compilation will

present a compendium

of knowledge on cultural diversity and the impact this has on modern interpersonal interactions. Within these pages, a variety of researchers, scholars, professionals, and leaders who interact regularly with the global society will find useful insight and fresh perspectives on the field of cross-cultural interaction.

ISE Fundamentals of Corporate Finance

McGraw-Hill Education Corporate Finance, by Ross, Westerfield, Jaffe, and Jordan emphasizes the modern

fundamentals of the theory of finance, while providing

contemporary examples to make the theory come to life.

The authors aim to present corporate finance as the working of a small number of

integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The Twelfth Edition includes many exciting new research findings as well as the incorporation of the Tax Cuts and Jobs Act (TCJA) throughout the text.

McGraw-Hill Companies
The publication of
Alexis de Tocqueville's
Democracy in America

has kindled interest across disciplines to appraise the exceptional nature of U.S. activities. In general, however, all the published works have not focused their analyses from an economic point of view. While economics was for some a "dismal science" following Thomas Carlyle's characterization of Malthus' demographic model, it has increasingly become the "queen of the social sciences" for more practitioners. The book fills a gap in the literature by describing the American contributors as precursors and genuinely exceptional economists. We present their works within the state of the nation in which they advance their

discipline. One is treated to both qualitative and quantitative theories in the opening chapter. Budding theories that became established theories of Economics and Finance are investigated in Chapters II and III. When President John Adams was confronted with M. Turgot's criticisms of the American government, he resorted to a historic survey of types of government from ancient Greece to the Middle Ages. Similarly, we have included a final chapter, Chapter IV, to present the argument for American Exceptionalism in the domain of Political Economy and Economic Law over the ages.

The Challenge of Global Competition

Taylor & Francis
This textbook presents an overview of how the activities of an organisation can be managed to satisfy the needs of stakeholders through the cost effective, operationally efficient and sustainable transformation of resources into outputs. Taking an interdisciplinary approach, the authors show the relationship between management and economics and within this framework present the key areas of management activity. The book explains the connections between these areas and provides tools and instruments for successful management. The book's approach and content is relevant for

all kinds of organisation - private or public sector, service or manufacturing, non-profit, large or small. Each chapter provides cases to illustrate what has been discussed and some questions to test comprehension. Throughout the book is a continuing project in which the reader is put in the position of owning their own

business and must think and make decisions about what the chapter has discussed. The book combines Anglo-American and German approaches to management and management studies, making it a valuable resource both for those who are studying management and those who are working as managers.
