*Essentials of calculus for business, economics, life sciences, social sciences*  
McGraw Hill

This text is written for students preparing for a career in business, economics, psychology, sociology, architecture, or the life, social, environmental, or physical sciences. The

exposition is designed to provide a sound, intuitive understanding of the basic concepts of calculus without sacrificing mathematical accuracy. Every exercise set includes writing problems that are related to issues raised in the examples and exercises. These problems challenge a student's critical-thinking skills and invite students to research topics on their own and to communicate about mathematics using words, not just symbols.

*Applied Calculus for Business, Economics, and the Social and Life Sciences with MathZone* Pearson

The Student's Solution Manual contains comprehensive, worked-out solutions for all odd-numbered problems in the text, with the exception of the checkup section for which solutions to all

problems are provided. Detailed calculator instructions and keystrokes are also included for problems marked by the calculator icon. Written by an instructor with years of classroom experience, it guides professors to demonstrate solutions in a manner consistent with the methods used throughout the text.
