The Constitution of India is the supreme law of land. The document lays down extensively the framework demarcating fundamental political code, structure, procedures, powers, and duties of government institutions and sets out fundamental rights, directive principles, and the duties of citizens. It is the longest written constitution of any country on earth. B. R. Ambedkar, chairman of the drafting committee, is widely considered to be its chief architect. Constitution is a living document, an instrument which makes the government system work. Its flexibility lies in its amendments. In this edition, the text of the Constitution of India has been brought up-to-date by incorporating therein all amendments made by Parliament up to and including the Constitution (One Hundredth Amendment) Act, 2015 which contains details of acquired and transferred territories between the Governments of India and Bangladesh and the same has been included in Annexure.
