**MKSAP 15** Lippincott  
Williams & Wilkins  
The Board Review  
Series (BRS) is aimed  
at providing basic  
knowledge as it relates  
to clinical situations  
and is used primarily  
by medical students  
studying for the United

States Medical  
Licensing Examinations  
(USMLE). BRS  
Behavioral Science,  
Fifth Edition covers  
material on this subject  
that is addressed on  
USMLE Step 1, written  
in outline format to  
provide an efficient  
method of studying  
behavioral science for  
USMLE. The book  
includes at least 500  
USMLE-style questions

with accompanying annotated answers. An exam follows each chapter and a Comprehensive Exam is included at the end of the book. A companion Website will offer the fully searchable text and an interactive question bank.

Physicians who passed the neurology boards reveal what it takes to excel First Aid for the Neurology Boards is a unique high-yield guide for success on the Neurology Boards, in-training exams, and recertification. Readers will find hundreds of frequently tested facts based on feedback from test takers who just passed the exam, along with mini-cases that are essential for board preparation. Unlike similar reviews, First Aid for the Neurology Boards covers must-know neurology and psychiatry topics in one complete volume. This new edition is enhanced by an increased number of clinical images, a new section on how to prepare for in-training and board exams,

more margin notes, completely updated coverage of movement disorders, and a web-based component linked to each chapter of the book that includes PowerPoints for residents to use during presentations. Mini-cases highlight frequently tested scenarios and classic patient presentations. Written by recent test takers and reviewed by top faculty to assure the most up-to-date and relevant material possible.

### **USMLE Step 1**

**Lecture Notes 2021: 7-Book Set** Simon and Schuster

The story begins in 1801 with lieutenant d'Hubert walking the streets of Strasbourg, searching for a fellow lieutenant called Féraud who is wanted by their division

general. He interrupts Féraud while he is being entertained by a popular lady at her party and Féraud takes the interruption and the consequent order to stay at his home personally, thinking that his honour has been injured. They end up fighting their first duel almost immediately, but Féraud is not satisfied by the encounter. Thus begins a tale that spans the next 16 years and follows the campaigns of Bonaparte where Féraud seeks out and challenges d'Hubert to various duels whenever a momentary peace allows him to do so. *The Step 1 Method: A Step by Step Guide to Success on the USMLE Step 1 Exam* McGraw-Hill Education / Medical

"The questions serve as a self-assessment tool, allowing students to think through clinical scenarios without answer choices influencing their thought process. Most questions end in "what are the appropriate next steps in managing this patient?" Imagine yourself as the clinician taking care of these patients: What test(s), if any, would you order next?"--Provided by publisher.

## Edition

The Board Review Series (BRS) is aimed at providing basic knowledge as it relates to clinical situations and is used primarily by medical students studying for the United States Medical Licensing Examinations (USMLE). This book covers material on this subject that is addressed on USMLE Step 1. As in its previous editions, this book is written in outline format to provide an efficient method of studying Behavioral Science for USMLE. A major focus of books in the BRS series is to provide experience to students in answering USMLE-style questions. To this end, the book contains over 700 such questions with accompanying

annotated answers. An exam follows each chapter and a Comprehensive Exam is included at the end of the book.

### **Dash Eating Plan**

Oxford University Press Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly

face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention

deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.
