"This textbook is our go-to book, it is an excellent overview of advanced practice in psychiatric nursing. This is the text that we use in our seminar courses during clinical, and we also use it in our review for our ANCC boards. Our student's scores were 92% this past year! We are very

pleased with this textbook!" -Dr. Cheryl Zauderer, PhD, CNM, PMHNP-BC Associate Dean of Graduate Programs Co-Coordinator, PMHNP Program Hunter-Bellevue School of Nursing Now in its third edition, this revised reference continues to serve as the only foundational resource for APRNs to incorporate a focus on integrative interventions with mental health issues across the lifespan. New chapters on Legal and Ethical Decision Making and LGBTQ+ Issues: Care of Sexual and Gender Minority Patients, and Increasing Resilience in Advanced Practice

Mental Health Nurses, shed light on vital contemporary issues. This text offers expanded coverage on telehealth, population health, and the updated AACN Essentials. Additionally, the third edition provides 10 practical case studies illustrating specific syndromes as well as 2019 updates to the ANCC certification exam. It provides expanded instructor resources including a Test Bank and PowerPoints. Comprehensive and practical, this text is organized around commonly seen clinical constellations of psychiatric symptoms and covers

neurobiology, theory, and research evidence along with pharmacological information relevant to each syndrome. It delivers an abundance of valuable interventions from which clinicians and clients can co-create the most effective, individualized interventions. Popular decision trees provide an algorithm to help students work through the process of evaluating and treating patients, and a lifespan focus prepares students for treating patients in all age groups. New to the Third Edition: New Chapters: Legal and Ethical Decision Making LGBTQ+ Issues: Care of Sexual and Gender Minority Patients Increasing Resilience in Advanced Practice Mental Health Nurses Includes 10 new case studies delivering practical information on specific syndromes Updated to reflect 2019 ANCC certification exam and 2020 AACN Essentials Key Features: Simplifies complex concepts using clear language while retaining depth of information Includes diverse treatment options, decision trees, easy-to-follow algorithms, and pertinent pharmacological data Edited by internationally acclaimed PMH-APRN practitioner/educators Contains "Aging Alerts" and "Pediatric Points"

This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and

include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing

Get a unique, conceptual approach to nursing care in this rapidly-changing healthcare environment. Lewis's Medical-Surgical Nursing, 11th Edition gives you a solid foundation in medical-surgical nursing. This thoroughly revised text includes an increased focus on nursing concepts, strong evidence-based content, coverage of clinical trends, and an essential pathophysiology review. Content is presented in a readable format and covers every unique approach to nursing care including health promotion, acute intervention, and ambulatory care. A variety of helpful boxes and tables make it easy for you to find essential information and a building-block approach throughout make even the most complex concepts simple to grasp. Key topics such as interprofessional care, delegation, safety, and prioritization are integrated throughout. Additionally, extensive drug therapy information and diagnostic studies

tables help give you a full picture of care. Best of all - a complete collection of learning and study resources helps you learn more effectively and offers valuable, real-world preparation for clinical practice. Highly readable format offers students a strong foundation in medical-surgical nursing. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Interprofessional Care tables and sections in all management chapters emphasize the importance of total patient care in today's health care settings and outline the role of each provider in managing disorders. Bridge to NCLEX Examination review questions at the end of each chapter reinforce key content while helping you to prepare for the NCLEX examination with both standard and alternate item format questions. Check Your Practice boxes challenge you to think critically and interact with patient data. Scenarios and in-class activity questions are provided to promote active learning. Informatics in Practice boxes discuss how technology is used by nurses and patients in healthcare settings. Evidence-based practice boxes

help you understand how to apply the latest research to real-life patient care. Safety Alerts throughout the book highlight patient safety issues and focus on the latest National Patient Safety Goals. UNIQUE! Nursing management is presented in a consistent and comprehensive format, addressing the unique approaches to nursing care. Case Studies throughout text emphasize prioritization, delegation, and concept mapping to help you learn to prioritize and delegate patient care. Separate chapter on Genetics focuses on practical application to nursing care of patients. Genetics in Clinical Practice boxes cover key topics such as genetic testing, Alzheimer's disease, sickle cell disease, and genetics-related ethics issues. Genetic Risk alerts and Genetic Link headings highlight specific genetic issues related to body system assessments and disorders. Ethical/Legal Dilemmas boxes promote critical thinking for timely and sensitive ethical and legal issues. Pathophysiology Map flow charts make it easier for you to visualize and understand changes occurring in major diseases. Focused Assessment tables reflect a realistic

"assessment on the run" approach and offer brief checklists for evaluating the status of previously identified health problems and monitoring for signs of new problems. Extensive drug therapy content includes Drug Therapy tables and concise Drug Alerts highlighting important safety considerations for key drugs. Promoting Population Health tables summarize government health care goals as they relate to specific disorders and identify important strategies for the prevention and early detection of diseases. Nutritional Therapy tables summarize nutritional interventions and strategies for promoting healthy lifestyles in patients with various conditions. Promoting Health Equity boxes and a dedicated chapter on health disparities and culturally competent care highlight risk factors and important issues related to the nursing care of various ethnic groups. Complementary and Alternative Therapies boxes summarize what you need to know about the clinical uses, effects, and nursing implications of herbal remedies and complementary and alternative treatment options. Nursing interventions and nursing diagnoses are listed in order of priority Nursing

Management boxes highlight the nurse's role in working with members of the interprofessional team and also cover specific topics and skills related to delegation. Assessment Abnormalities tables alert the nurse to frequently encountered abnormalities and their possible etiologies. Core clinical content focuses on highlighting and incorporating QSEN competencies. Emergency Management tables outline the treatment of health problems most likely to create medical emergencies. Learning Outcomes and Key Terms help you identify the key content for that chapter. Health History tables present key questions to ask patients related to a specific disease or disorder. Patient and Caregiver teaching tables provide critical information to help you educate others who will be helping to care for the patient. Gerontology and chronic illness included throughout the text under Gerontologic Considerations headings and in Gerontologic Assessment tables. Nursing Assessment tables summarize the key subjective and objective data related to common diseases. Gender Differences boxes discuss how women and men are affected

differently by conditions such as pain and hypertension. Diagnostic Studies tables provide details of commonly used lab tests that help assess various body systems. Over 60 nursing care plans clearly shows the linkages among NIC, NOC, and nursing diagnoses, and applies them to nursing practice. Over 800 full-color illustrations and photographs clearly demonstrate disease processes and related anatomy and physiology. NEW! An increased focus on concepts throughout the text includes a new Concepts Table of Contents that lists the most common exemplars with page number references, a new Problems Related to Comfort and Coping section, and the most relevant concepts listed at the start of each chapter. NEW! Additional body map images added throughout text.

The AJN Book of the Year award-winning textbook, *Psychiatric Nursing: Contemporary Practice*, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and

interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

Contemporary Psychiatric-mental Health Nursing Elsevier Health Sciences
 " The editors and contributors are to be congratulated for their clear effort to bring some degree of correction to the singular emphasis on pharmacotherapy. While it is clear that pharmacotherapy has a role to play in treatment, it is equally clear that the use of relationships as therapy has an equal if not more important role to play. There are several other features of this text that commend it to the student

and the nurse seeking a review or a refresher course. First, the authors have done an excellent job in noting historical context. Second, [they] have made extensive use of the current research literature." - Grayce M. Sills, PhD, RN, FAAN Thoroughly updated to correlate with DSM 5 diagnostic descriptions and QSEN guidelines, the second edition of this highly acclaimed undergraduate psychiatric nursing text features concrete strategies for establishing interpersonal relationships as the basis not only for working with the psychiatric patient population, but as a timeless foundation for all nursing practice. The text guides students through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice. Modules designed to foster growth in therapeutic use of self, including the importance of boundary management, are integrated with psychodynamic and current neurobiological theories to provide sturdy theoretical underpinnings for practice. A wealth of descriptive psychiatric diagnoses, QSEN criteria, and NANDA-based care plans, case scenarios, evidence-based practice, patient and

family education tips, drug summary lists, and complementary and alternative therapy approaches populate the text. The main body of the book focuses on common mental illnesses and weaves both the psychodynamic and neurobiological concepts into evidence-based strategies for nursing interventions. Additional features such as examples of therapeutic dialogue and a "Consumer's Perspective" featuring an actual consumer's voice relating personal experience about living with a specific illness, provide further guidance in understanding and adopting a relationship-based approach to nursing. Web links facilitate quick access to additional information and NCLEX-style review questions prepare students for passing the NCLEX exam. New to the Second Edition: Revisions correlate to DSM 5 descriptions, QSEN criteria and NANDA nursing diagnoses Provides new information on psychopharmacology, compassion fatigue and a recovery model, use of informed consent, and cognitive behavioral therapy Presents updates on complementary and alternative interventions Includes expanded content on cultural and lifespan considerations

related to mental health care worldwide

Patient-Centered Collaborative Care, Single Volume Elsevier Health Sciences Master nursing skills with this guide from the respected Perry, Potter & Ostendorf author team! The concise coverage in *Nursing Interventions & Clinical Skills, 7th Edition* makes it easy to learn the skills most commonly used in everyday nursing practice. Clear, step-by-step instructions cover more than 160 basic, intermediate, and advanced skills — from measuring body temperature to insertion of a peripheral intravenous device — using evidence-based concepts to improve

patient safety and outcomes. A streamlined, visual approach makes the book easy to read, and an Evolve companion website enhances learning with review questions and handy checklists for each clinical skill. Coverage of more than 160 skills and interventions addresses the basic, intermediate, and advanced skills you'll use every day in practice. Safe Patient Care Alerts highlight risks or other key information to know in performing skills, so you can plan ahead at each step of nursing care. Unique! Using Evidence in Nursing Practice chapter provides the information needed to use evidence-based care to solve clinical problems. Coverage of evidence-based nursing techniques includes the concept of care bundles, structured practices that improve patient safety and outcomes, in addition to the coverage of teach-back. Delegation & Collaboration guidelines help you make decisions in whether to delegate a skill to unlicensed assistive personnel, and indicates what key information must be shared. Teach-Back step shows how to evaluate the success of patient teaching, so you can see whether the patient understands a task or topic or if additional

teaching may be needed. Recording guidelines describe what should be reported and documented after performing skills, with Hand-off Reporting sections listing important patient care information to include in the handoff. Special Considerations indicate the additional risks or accommodations you may face when caring for pediatric or geriatric patients, as well as patients in home care settings. A consistent format for nursing skills makes it easier to perform skills, organized by Assessment, Planning, Implementation, and Evaluation. Media resources include skills performance checklists on the Evolve companion website and related lessons, videos, and interactive exercises on Nursing Skills Online. NEW! 2017 Infusion Nurses Society standards are included on administering IVs and on other changes in evidence-based practice. NEW Disaster Preparedness chapter focuses on caring for patients after biological, chemical, or radiation exposure. NEW! SBAR samples show how to quickly and effectively communicate a patient's condition in terms of Situation, Background, Assessment, and Recommendation. NEW!

Practice Reflections sections include a clinical scenario and questions, helping you reflect on clinical and simulation experiences. NEW! Three Master Debriefs help you develop a better understanding of the "big picture" by synthesizing skill performance with overall patient care.

Gain the knowledge and skills you need to effectively care for adult patients. *Medical-Surgical Nursing*, 7th Edition covers both medical-surgical and psychiatric mental health conditions and disorders while building on the fundamentals of nursing. This essential text focuses on nursing roles, settings, trends, body systems and their disorders, and emergency and disaster management. Unique to this edition is the gerontologic nursing unit which addresses physiologic and psychosocial changes in the older adult, along with related disorders common to the elder patient - the primary patient group population you'll encounter in practice. It also emphasizes culturally competent care and holistic nursing, while thoroughly covering all relevant NCLEX-PN® test plan content. With updated guidelines on diabetes, heart failure, asthma, COPD, and cancer treatment protocols, no other resource offers the

breadth of topics at a level that is so perfectly tailored to the LPN/LVN student. UNIQUE! Gerontologic nursing unit covers physiologic and psychosocial changes in the older adult, along with related disorders common to the elder patient, the primary patient group for whom LPNs provide care. UNIQUE! In-depth pharmacology coverage includes: the Pharmacology Tutorial covering drug classifications, how drugs work, and nursing responsibilities; Pharmacology Capsules boxes providing medication information, precautions for use, interactions, and side/adverse effects; and Pharmacology and Medications tables including classification, use/action, side/adverse effects, and nursing interventions. Nursing care plans reinforce the nursing process and focus on critical thinking. Get Ready for the NCLEX-PN® Examination! sections at the end of chapters include key points, review questions, and case studies that address the various NCLEX® Client Needs categories. Coordinated Care boxes highlight team approach to patient care, helping you to prioritize tasks and assign them safely to assistive personnel. Patient

Teaching Plans provide bulleted lists of nursing instructions for patients, stressing the role and responsibility of the LPN/LVN to reinforce patient education. Health Promotion Considerations boxes highlight timely wellness and disease prevention topics. Cultural Considerations boxes discuss the importance of providing culturally competent care related to various clinical situations. Put on Your Thinking Cap boxes allow you to pause and consider the practical implications of what you have just read. Nutritional Considerations boxes are spotlighted at appropriate points throughout the text to emphasize the role that nutrition plays in disease and nursing care. Complementary and Alternative Therapies focus on nontraditional therapies along with precautions and possible side effects. Key terms with phonetic pronunciations help improve terminology and language skills of English-as-a-Second-Language (ESL) students and students with limited proficiency in English before they enter clinical practice. Emphasis on clinical judgment teaches you to develop skills in clinical reasoning and clinical decision-making when applying concepts to clinical situations, with Clinical Judgment Challenge questions throughout the chapters. An emphasis on prioritization stresses the most important patient problems and nursing interventions, with patient problems presented in a single prioritized list of nursing diagnoses and collaborative problems. UNIQUE! NCLEX preparation tools include chapter-opening Learning Outcomes and chapter-ending Get Ready for the NCLEX Examination! sections organized by NCLEX® Client Needs Categories, plus NCLEX Examination Challenge questions, with an answer key in the back of the book and on the Evolve companion website. Practical learning aids include NCLEX Examination Challenges, Clinical Judgment Challenges, Best Practice for Patient Safety & Quality Care charts, common examples of drug therapy, concept maps, laboratory profiles, and more. A clear alignment with the language of clinical practice reflects the real world of nursing practice with

NANDA diagnostic labels where they make sense, and non-NANDA diagnostic labels when these are more common descriptions of patient problems. Student Resources on an Evolve companion website help you prepare for class, clinicals, or lab with video and audio clips, animations, case studies, a concept map creator, NCLEX exam-style review questions, and more. UNIQUE! Concentration on essential knowledge for the RN level of medical-surgical nursing practice focuses your attention on need-to-know content to pass the NCLEX Examination and practice safety as a beginning nurse. NEW! Enhanced focus on QSEN (Quality and Safety Education for Nurses) competencies includes new icons identifying QSEN competency material and new Quality Improvement boxes describing projects that made a dramatic difference in patient outcomes. UPDATED learning features include an expanded emphasis on developing clinical judgment skills; on prioritization, delegation, and supervision skills; on long-term care issues; and on preparation for the NCLEX® Examination and consistency with the 2013 NCLEX-RN® Test Plan. NEW!

UNIQUE! Care of Transgender Patients chapter discusses the unique health care needs and issues specific to the transgender community. Improved delineation of NANDA-I nursing diagnoses clearly differentiate NANDA diagnoses from collaborative problems. NEW photos and drawings show patient care skills as well as the latest in nursing education and practice.

A 2017 AJN Book of the Year Award winner, *Essentials of Psychiatric Mental Health Nursing: A Communication Approach to Evidence Based Care*, 4th Edition, offers the perfect balance of essential nursing interventions and clinical content. It incorporates a reader-friendly style, and an emphasis on therapeutic communication and evidence-based practice. Perfect for shorter psychiatric nursing courses, this streamlined psychiatric text includes need to know information and key DSM-5 content you need to pass your course and prepare for the NCLEX®. A neurobiology of the brain teaching tool provides a visual depiction of how the disorder affects brain function —

and what drugs are used to treat it. Additionally, this new edition includes Giddens Concept boxes, Integrative Care boxes, updated clinical disorders chapters, and new use of nursing diagnosis language International Classification for Nursing Practice (ICNP) which smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems Neurobiology of the brain feature provides a visual depiction on how the disorder affects brain function and what drugs are used to treat the disorder. Applying Evidence Based Practice boxes throughout the clinical chapters pose a question, walk you through the process of gathering evidence-based data from a variety of sources, and present a plan of care based on the evidence. Vignettes describing psychiatric patients and their disorders add more practical application to the chapter material. DSM-5 diagnostic criteria identify medical diagnostic criteria for most major disorders. Applying Critical Judgment introduces clinical situations in psychiatric nursing at the end of all chapters with thought provoking questions that engage critical thinking. NEW!

Integrative Care boxes address alternative therapies to treat psychiatric illnesses. NEW! Giddens Concept boxes at the beginning of each chapter tie to the topics discussed in that chapter. UPDATED! Clinical disorders chapters such as Schizophrenia, Bipolar Disorders and Somatoform Disorders, and many others reflect the latest evidence-based research and practice. NEW! ICNP nursing diagnosis language smooths your transition into practice, as this is a common language shared with many electronic health record documentation systems. UPDATED! Cultural Considerations sections include more updated and relevant material, whenever possible in the clinical chapters, and address cultural considerations with various patients and appropriate care. Master the skills that LPN/LVNs need to care for patients across the lifespan!
Foundations of Nursing, 9th Edition provides an essential guide to nursing care for pediatric, maternity, adult, and older

adult patients. Through use of the nursing process, you will develop clinical judgment skills to assess patient needs, develop nursing care plans, and plan effective nursing interventions. Case studies provide practice with critical thinking and clinical judgment, and new Next Generation NCLEX®-format questions help you apply theory to practice. Written by nursing educators Kim Cooper and Kelly Gosnell, this text also helps you prepare for success on the NCLEX-PN® examination. Step-by-step instructions for more than 100 skills show nursing techniques and procedures along with the rationales for each. Clear, easy-to-understand coverage of skills across the lifespan includes maternity, pediatrics, adults, and older adults. Nursing care plans use a case-study format to emphasize patient goals and outcomes, and include critical thinking questions at the end of each care plan. Complete mathematics review covers basic arithmetic skills and dosage calculation, followed by a discussion of medication administration including IV therapy. Safety Alerts cover issues related to safe patient care in a variety of settings. Evidence-

Based Practice boxes provide synopses of research articles that apply to nursing, along with nursing implications for the LPN/LVN. Coordinated Care boxes promote comprehensive patient care with other members of the health care team, focusing on prioritization, assignment, supervision, collaboration, delegation, and leadership topics. Health Promotion Considerations boxes highlight information on wellness and disease prevention, including infection control, diet, and pregnancy. Communication boxes illustrate communication strategies through real-life examples of nurse-patient dialogue. Patient Teaching boxes focus on three-way communication among the nurse, patient, and family members, and include topics such as hospital discharge instructions. Home Health Considerations boxes discuss issues facing patients and

their caregivers in the home setting. Lifespan Considerations boxes provide age-specific information for the care of the patient. NEW! Next Generation NCLEX® case studies and new format questions help you prepare for success on the NCLEX-PN® examination. NEW! Discussion of the NCSBN Clinical Judgment Measurement Model helps you develop the skills needed to plan effective nursing interventions. NEW! Updated Asepsis and Infection Control chapter prepares you for today's healthcare environment. NEW! Updated photos and illustrations show nursing techniques, procedures, and patient care.
