Bank, first opened in 2016, is a 100 billion dollar multilateral development bank purpose-built to support infrastructure projects that enhance regional economic productivity. Its arms reach far: in its first two years, AIIB has financed transport systems such as national motorways in Pakistan, railways

in Oman, and rural roads in India; energy projects including natural gas pipelines in Azerbaijan and hydropower plants in Tajikistan; and the redevelopment of impoverished areas in Indonesia.

Initiated by China, its membership is global, with regional powers from Korea to Saudi Arabia, and key players from Europe, Africa, and Latin America. In a text that will appeal to general readers and legal specialists alike, Natalie Lichtenstein examines the Bank's mandate, investment operations, finance, governance, and institutional set up, as well as providing detailed analyses of the similarities and differences it has with other development banks - charting AIIB's story so far and anticipating its future.

For years, Douglas Stuart's *Old Testament Exegesis* has been one of the most popular ways to learn how to perform exegesis—the science and art of interpreting biblical texts properly for understanding as well as proclamation. This new edition includes a major revision and expansion of online and other resources for doing biblical research and updates past editions by including a helpful configuration of the format for the exegesis process. Stuart provides guidance for full exegesis as

well as for a quicker approach specifically tailored to the task of preaching. A glossary of terms explains the sometimes-bewildering language of biblical scholarship, and a list of frequent errors guides the student in avoiding common mistakes. No exegetical guide for the Old Testament has been more widely used in training ministers and students to be faithful, careful interpreters of Scripture.

This series of wordless picture books aims to help children with speech, language and communication needs (SLCN) to develop their expressive sentence and narrative skills, through learning to tell each story. There are 10 stories that will be separated into two levels, geared towards advancing the child from simple to intermediate and complex sentences. The stories are written in the style of a film scroll and contain familiar events to ensure the story is understandable. The general formula of each story will be a disruption (often humorous) in familiar routines followed by resolutions. The accompanying guide will have strategies

on how to teach and progress the child through each level and stage, and will have an additional skills section.

Although this resource is primarily for SLCN, they could also be used for early years and reception. Kulvinder Kaur, Team Lead in Applied Behavioural Analysis (Intervention for Children with a Diagnosis of Autism), Gordon Primary School, Eltham.

Hole in My Life Simon and Schuster
Wael B. Hallaq boldly argues that the "Islamic state," judged by any standard definition of what the modern state represents, is both impossible and inherently self-contradictory. Comparing the legal, political, moral, and constitutional histories of premodern Islam and Euro-America, he finds the

adoption and practice of the modern state to be highly problematic for modern Muslims. He also critiques more expansively modernity's moral predicament, which renders impossible any project resting solely on ethical foundations. The modern state not only suffers from serious legal, political, and constitutional issues, Hallaq argues, but also, by its very nature, fashions a subject inconsistent with what it means to be, or to live as, a Muslim. By Islamic standards, the state's technologies of the self are severely lacking in moral substance, and today's Islamic state, as Hallaq shows, has done little to advance an acceptable form of genuine Shari'a governance. The Islamists' constitutional battles in Egypt and Pakistan, the Islamic legal and political

failures of the Iranian Revolution, and similar disappointments underscore this fact. Nevertheless, the state remains the favored template of the Islamists and the ulama (Muslim clergymen). Providing Muslims with a path toward realizing the good life, Hallaq turns to the rich moral resources of Islamic history. Along the way, he proves political and other Òcrises of IslamÓ are not unique to the Islamic world nor to the Muslim religion. These crises are integral to the modern condition of both East and West, and by acknowledging these parallels, Muslims can engage more productively with their Western counterparts.

Not Just Politics Academic Press

New college students are led to believe that sharing personal information and freely expressing their opinions on social media is expected and their right to free speech. What they fail to understand is that any information they reveal may be used to steal their identity, prevent them from being hired and possibly even get them hurt or killed. It is well known that college is a time for learning, experiencing and growing as a person...but it is little understood that it is also the point in time when students form relationships, political beliefs, attitudes, and habits that will shape them for the rest of their lives. The

influence of their friends, teachers and the social and political climate on campus are huge factors in their development - both good and bad. Understanding and learning can help parents assist their sons and daughters avoid future pitfalls and grow up to be successful, productive members of society. There is nothing more important than your personal safety and the safety of your family. Safety has become the highest priority for students, parents, educators and administrators. However, the educational tools and reference guides that contain this essential information for them is lacking since most safety material focuses on the school itself and public safety professionals, not the individual. Today's college students face threats to their

personal safety that generations before did not have to deal with. New problems exist in both the digital world and the physical world, and can be harmful or even deadly. Thinking a problem won't happen to you will not make it any less likely. The solution is to be aware of what threats exist, learn how to protect yourself, and know what steps to take should a problem arise to you or around you. You can give your child the most comprehensive resource ever compiled about how to stay safe in both the physical world and digital world. This will help ensure that students are made aware of the various threats to their personal safety that exist both online and offline so they will ultimately be safer during their college years and beyond. The author has worked as an

information technology consultant since 1995, a self-defense instructor for over 20 years, and is a former university public safety professional. He is fully qualified to educate students and others based on decades of knowledge that has been distilled into this comprehensive book. Topics include: defining safety concerns safety awareness establishing personal boundaries routines & comfort zones problem roommate(s) bullying, cyberbullying & hazing the dangers of mixing alcohol and energy drinks cyber-security & online safety social media & cell phone safety phishing scams & identity theft active shooter preparedness & defensive actions viruses, malware and ransomware physical threat self-defense / safe dating / sexual harassment alcohol, drugs and

The Finance and Accounting Desktop Guide CADartifex

Over seven million Americans are either incarcerated, on probation, or on parole, with their criminal records often

following them for life and affecting access to higher education, jobs, and housing. Court-ordered monetary sanctions that compel criminal defendants to pay fines, fees, surcharges, and restitution further inhibit their ability to reenter society. In *A Pound of Flesh*, sociologist Alexes Harris analyzes the rise of monetary sanctions in the criminal justice system and shows how they permanently penalize and marginalize the poor. She exposes the damaging effects of a little-understood component of criminal sentencing and shows how it further perpetuates racial and economic inequality. Harris draws from extensive sentencing data, legal documents, observations of court hearings, and interviews with defendants, judges, prosecutors, and

other court officials. She documents how low-income defendants are affected by monetary sanctions, which include fees for public defenders and a variety of processing charges. Until these debts are paid in full, individuals remain under judicial supervision, subject to court summons, warrants, and jail stays. As a result of interest and surcharges that accumulate on unpaid financial penalties, these monetary sanctions often become insurmountable legal debts which many offenders carry for the remainder of their lives. Harris finds that such fiscal sentences, which are imposed disproportionately on low-income minorities, help create a permanent economic underclass and deepen social stratification. *A Pound of Flesh* delves into the court practices of five counties

in Washington State to illustrate the ways in which subjective sentencing shapes the practice of monetary sanctions. Judges and court clerks hold a considerable degree of discretion in the sentencing and monitoring of monetary sanctions and rely on individual values—such as personal responsibility, meritocracy, and paternalism—to determine how much and when offenders should pay. Harris shows that monetary sanctions are imposed at different rates across jurisdictions, with little or no state government oversight. Local officials' reliance on their own values and beliefs can also push offenders further into debt—for example, when judges charge defendants who lack the means to pay their fines with contempt of court and penalize them

with additional fines or jail time. A Pound of Flesh provides a timely examination of how monetary sanctions permanently bind poor offenders to the judicial system. Harris concludes that in letting

monetary sanctions go unchecked, we have created a two-tiered legal system that imposes additional burdens on already-marginalized groups.
