This illustrated work covers the stories of five British engineering companies that produced successful ranges of agricultural, earthmoving or construction machinery. County, Doe, Chaseside, Muir-Hill, Matbro and Bray all made extensive use of the Ford tractor skid unit as a basis for their machines and they pioneered the development of the four-wheel drive

agricultural tractor in Britain. Stuart Gibbard gives details of all the main models and machines of these manufacturers. He chronicles the fortunes of the firms from the beginning of the 20th century to the present day and discusses many of the personalities involved.

The Burnouts Heinemann

"Roby's highly engaging prose offers edgy characters and intense drama." - Booklist
It's been four years since twenty-eight-year old Alicia Black, daughter of Reverend Curtis Black, divorced her second husband, the most womanizing and corrupt man she has ever known.

Since then, Alicia has been dating her first husband, Phillip Sullivan, a wonderfully kind and true man of God whom she'd hurt terribly by cheating on him. Alicia has worked hard to prove herself worthy of his trust once more, and when he asks her to marry him again, she couldn't be happier. But Levi Cunningham, the drug dealer Alicia had an extramarital affair with, has just been released from prison, and he has completely turned his life around for the better. Still head-over-heels in love with Alicia, he will do whatever is necessary to win her back. Remarrying Phillip is the one thing Alicia has wanted for years, but she

can't get Levi out of her mind. Alicia and Phillip aren't the only ones in the middle of a crisis. Their best friends, husband and wife Brad and Melanie Richardson, are struggling to keep their marriage together. Workaholic Brad is never home and has begun losing thousands on bad investments. Or so he says. Melanie, who is certain there's more to the story, is determined to get at the truth. Fresh betrayal leads to consequences no one saw coming, and Alicia's relationship with Phillip might not be the only thing that needs saving. But is it already too late?

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following

disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

London's social season is in full swing, and Victorian aristocracy is atwitter over a certain gentleman who claims to be the direct descendant of Louis XVI and Marie Antoinette. Adding to their fascination with all things French, an audacious cat burglar is systematically stealing valuable items that once belonged to the ill-fated queen.

But things take a dark turn. The owner of one of the pilfered treasures is found murdered after the theft is reported in the newspapers, and the mysterious thief develops a twisted obsession with Lady Emily Ashton. It takes all of Lady Emily's wit and perseverance to unmask her stalker and ferret out the murderer, while faced with a brewing scandal that threatens both her reputation and her romance with the dashing Colin Hargreaves.

In this "raw and heartbreaking" novel set in 1950s Louisiana, a compassionate prison cook uncovers the lives of death row prisoners (Historical Novel Review). Ginny Polk has come back to Louisiana's Greenmount State Penitentiary, the place where her father worked and died, to become a prison cook. She knows the harsh reality of life within those walls. That's why, among her duties, Ginny has taken on a special responsibility: preparing last meals for prisoners facing execution. Ginny prepares whatever the men ask for, even meeting with their heartbroken relatives to get each recipe just right. The

prison board frowns on the ritual, as does Roscoe Simms, Greenmount's Warden. Her daddy's best friend before he was killed by an inmate, Roscoe has always watched out for Ginny. But when Ginny stumbles upon information about the man executed for killing her father, it leads to a series of dark and painful revelations. Truth, justice, mercy—none of these are as simple as Ginny once believed. And sometimes the most shocking crimes we commit are not inspired by anger or greed, but by love.

The barriers to entry in your market just
vanished. Unexpected competitors are
swarming in. Are you ready? You always
knew digital was going to change things,
but you didn't realize how close to home it
would hit. In every industry, digital
competitors are taking advantage of new
platforms, tools, and relationships to
undercut competitors, get closer to
customers, and disrupt the usual ways of
doing business. The only way to compete
is to evolve. James McQuivey of Forrester
Research has been teaching people how to
do this for over a decade. He's gone into
the biggest companies, even in traditional

industries like insurance and consumer
packaged goods, and changed the way
they think about innovation. Now he's
sharing his approach with you. McQuivey
will show you how Dr. Hugh Reinhoff of
Ferrokin BioSciences disrupted the
pharmaceutical industry, streamlining
connections with doctors and regulators to
bring molecules to market far faster--and
then sold out for \$100 million. How
Charles Teague and his team of four
people created Lose It!, a weight loss
application that millions have adopted,
achieving rapid success and undermining
titans like Weight Watchers and Jenny
Craig in the process. Regardless of your
background and industry, you can learn
how to be a digital disruptor too. First,
adopt the right mindset: Take risks, invest
as cheaply as possible, and build on
existing platforms to find the fastest path
to solving a customer's problem. Second,
seek the "adjacent possible"--the space
just next to yours where new technology
creates opportunity. That's how Benjamin
Rubin and Paolo DePetrillo of Zeo created
a \$100 sleep monitor that does much of
what you'd get from a \$3,000 sleep lab
visit. Finally, disrupt yourself. Use these

tools to make parts of your business obsolete before your competitors do. That's what Tim FitzRandolph did at Disney, creating a game that shot to the top of the app store charts. With the tools in this book you can assess your

readiness, learn the disruptive mindset, and innovate rapidly, starting right within your own business.
