An experimental temperature probe package containing a fluidic oscillator temperature probe and a shielded thermocouple temperature probe was tested during several X-15 flights. The X-15 flights provided greatly varying test conditions, including a wide range of rapidly changing total temperatures and Mach numbers which extended from subsonic to hypersonic speeds. Within restricted ranges of free-stream Mach number, free-stream unit weight flow, and local stagnation pressure, both probes yielded ramp outputs of temperature parallel to ramp inputs of free-stream total temperature. Within these ranges both probes were used to determine total temperature in the Mach 6 temperature environment. Because ambient temperature was known, both probes were used to estimate velocity and Mach number.

Power and Influence demonstrates how the indigenous wisdom contained in African proverbs and folktales can be used to enhance modern life. The timeless wisdom contained in African proverbs and folktales enriches self-development and positive influence. The inspiring results provide deeper understanding of self-development and self-leadership, forming a solid foundation for leadership effectiveness at all levels. This book is among the first to consciously acknowledge and demonstrate the rationale of applying indigenous wisdom to enhance the understanding of disciplines, theories, and practice. African proverbs and folktales express an accumulated wisdom of human relations; add dimensions to practice in ways that are soulful, respectful,

practical, and socially embedded. By using African indigenous wisdom, the book contributes towards the much-needed, cross-cultural dialogue among individuals, organizations and societies in this increasingly diversified world.
