"Stadium Games begins with the events leading to the arrival of the Twins and Vikings to the state in 1961 and traces subsequent controversies about professional sports in the region up to the present. Weiner discusses the factors that make Minnesota the poster child for the nation's stadium debates - the recent departure of the North Stars hockey team, the near departure of the Timberwolves, the strong opposition of taxpayers, and the apparent greed of team owners. Stadium Games reveals the behind-the-scenes deals and inside scoop on what went wrong in the recent unsuccessful campaign for a new ballpark, divulging how public relations experts failed and how government leaders conspired to fake out Minnesota's citizens."-

Bowen asks not the usual question--how well are Muslims integrating in France?--but, rather, how do French Muslims think about Islam? In particular, Bowen examines how French Muslims are fashioning new Islamic institutions and developing new ways of

reasoning and teaching. He looks at some of the quite distinct ways in which mosques have connected with broader social and political forces, how Islamic educational entrepreneurs have fashioned niches for new forms of schooling, and how major Islamic public actors have set out a specifically French approach to religious norms. --from publisher description.

Profile Books
Following the long tradition of the Schuler Company, the Metal Forming Handbook presents the scientific fundamentals of metal forming technology in a way which is both compact and easily understood. Thus, this book makes the theory and practice of this field accessible to teaching and practical implementation. The first Schuler "Metal Forming Handbook" was published in 1930. The last edition of 1966, already revised four times, was translated into a number of languages, and met with resounding approval around the globe. Over the last 30 years, the field of forming technology has been radically changed by a number of innovations.

New forming techniques and extended product design possibilities have been developed and introduced. This Metal Forming Handbook has been fundamentally revised to take account of these technological changes. It is both a text book and a reference work whose initial chapters are concerned to provide a survey of the fundamental processes of forming technology and press design. The book then goes on to provide an in-depth study of the major fields of sheet metal forming, cutting, hydroforming and solid forming. A large number of relevant calculations offers state of the art solutions in the field of metal forming technology. In presenting technical explanations, particular emphasis was placed on easily understandable graphic visualization. All illustrations and diagrams were compiled using a standardized system of functionally oriented color codes with a view to aiding the reader's understanding.

Roadway Lighting (ANSI/IES RP-8-14)

Apress

From the author of *Aftershock* and *The Work of Nations*, his most important book to date—a myth-shattering breakdown of how the economic system that helped make America so strong is now failing us, and what it will take to fix it. Perhaps no one is better acquainted with the intersection of economics and politics

than Robert B. Reich, and now he reveals how power and influence have created a new American oligarchy, a shrinking middle class, and the greatest income inequality and wealth disparity in eighty years. He makes clear how centrally problematic our veneration of the “free market” is, and how it has masked the power of moneyed interests to tilt the market to their benefit. Reich exposes the falsehoods that have been bolstered by the corruption of our democracy by huge corporations and the revolving door between Washington and Wall Street: that all workers are paid what they’re “worth,” that a higher minimum wage equals fewer jobs, and that corporations must serve shareholders before employees. He shows that the critical choices ahead are not about the size of government but about who government is for: that we must choose not between a free market and “big” government but between a market organized for broadly based prosperity and one designed to deliver the most gains to the top. Ever the pragmatist, ever the optimist, Reich sees

hope for reversing our slide toward inequality and diminished opportunity when we shore up the countervailing power of everyone else. Passionate yet practical, sweeping yet exactly argued, *Saving Capitalism* is a revelatory indictment of our economic status quo and an empowering call to civic action.

Effective Apology Chronicle Books

There’s nothing easy about apology. The news is filled with examples of leaders apologizing, needing to apologize, or failing miserably at the attempt. And certainly we all have occasion to apologize ourselves—maybe more often than we realize. But we don’t need more apologies, says John Kador—we need better ones. Too many people just go through the motions, missing out on the power of apology to restore strained relationships, create possibilities for growth, and generate better outcomes for all. *Effective Apology* challenges you to think about the fundamental value and importance of apology as it delivers detailed advice for making an apology that truly heals and

renews. Kador explores the Five Rs of apology: Recognize the wrong and the person harmed; accept moral Responsibility for your actions; express Remorse; provide meaningful Restitution; and offer assurance that the offense will not be Repeated. Making apology work in the real world—when and how to

apologize, in what medium, and how to make it stick—is made clear through over seventy examples of good and bad apologies drawn from the news, popular culture, and the experiences of Kador, his clients, and his friends. The willingness to apologize signals strength, character, and integrity. Effective

leadership is impossible without effective apology. John Kador shows how to craft and deliver a confident apology that will defuse resentment, reduce litigation, create goodwill, and transform a relationship ruptured by mistrust and disappointment into something stronger and more durable than it ever was before.
