Why do people enter total institutions – places that confine and control them around the clock – and how does the experience change them? This book updates Goffman's classic model by introducing the Re-inventive Institution, where members voluntarily commit themselves to pursue regimes of self-improvement.

An overview of the development of new religions and the controversies surrounding them in late modern society. A stimulating, course-friendly overview of the history and development of new religious movements (NRMs) in the late twentieth century. Explores eight cults and NRMs, including the Church of Scientology, Transcendental Meditation, Unificationism, The Family International, the Ramtha School of Enlightenment, the Branch Davidians, Heaven's Gate, and Wicca. Each chapter reviews the origins, leaders, beliefs, rituals and practices of a NRM, highlighting the specific controversies surrounding this group. Covers debates including what constitutes an authentic religion, the validity of claims of brainwashing techniques, the implications of experimentation with unconventional sexual practices, and the deeply rooted cultural fears that cults engender.

While Erving Goffman's books are among the most widely read sociological works, covering issues including the presentation of the self, total institutions, interaction order to frame analysis, they are in fact guided by a single theme: the analysis of the form of interaction in social situations and the role that individuals play in it. This book stresses Goffman's central role as a sociological theorist, exploring the potentials of his work and uncovering the recondite layers of his oeuvre. In opening a path to understanding the complexity of his writings, it offers new directions for social theory and empirical research.

A classic text that documents the "work" of everyday life in a nursing home. In 1973 sociologist Jaber F. Gubrium spent several months at a nursing home as a participant-observer. Through his observations, interviews, and transcriptions, Gubrium recounts case studies of clients, doctors, the dynamics between them, patient socialization, and the intimacies of daily hygiene.

This interdisciplinary collection of primary and secondary readings encourages scholars and students to engage critically with current debates about the origins, implementation and postwar interpretation of the Holocaust. Interdisciplinary content encourages students to engage with philosophical, political, cultural and literary debate as well as historiographical issues. Integrates oral histories and testimonies from both victims and perpetrators, including Jewish council leaders, victims of ghettos and camps, SS officials and German soldiers. Subsections can be used as the

basis for oral or written exercises. Whole articles or substantial extracts are included wherever possible.

Diese erste deutschsprachige Einführung zu Erving Goffman (1922–1982) unterstreicht dessen zentrale Bedeutung als Theoretiker: Seine Bücher zählen zu den meistgelesenen soziologischen Werken überhaupt. Sie umfassen ein weit ausgreifendes Themenspektrum, das sich von der Selbstdarstellung im Alltag, dem Überleben in totalen Institutionen, der Bewältigung von Stigmata, dem Verhalten auf öffentlichen Plätzen bis hin zur Analyse von Redeweisen als kommunikative Formen erstreckt. Leitmotivisch variieren diese Gegenstände dabei ein durchgängiges Interesse Goffmans: Die Analyse der Formen von Interaktion in sozialen Situationen sowie der Rolle, welche die Handelnden darin spielen. Diese Theorieanlage findet ihren Ausdruck in der Interaktionsordnung und der Rahmenanalyse. Goffmans Arbeiten haben die Soziologie in nachhaltiger Weise angeregt und beeinflusst. Die Potenziale seines Werkes sind trotz seiner außerordentlichen Popularität bislang nicht annähernd erschöpfend genutzt. Erschwert wird die Rezeption vor allem durch die Doppelbödigkeit seiner Schriften selbst. Jürgen Raab eröffnet hier einen Zugang, der den Blick auf die tiefgründigeren Schichten von Goffmans Werk freilegt und damit neue Impulse für die soziologische Forschung und Theorie setzt. Raabs Buch ist mittlerweile zu einem viel rezipierten Referenzwerk geworden. Die zweite Auflage erweitert den Band um ein Kapitel, das Goffmans methodologische Grundhaltung und seine methodischen Zugangsweisen darlegt.

*Carceral Geography* Routledge

The work of Erving Goffman has had an enormous impact throughout the social sciences. Yet his writings have not received the detailed scrutiny which they deserve. This new book is the first comprehensive and accessible account of Erving Goffman's contributions, ranging in its scope from his very earliest work right up to the projects upon which he was engaged at the time of his death. Goffman's writings, Manning argues, are much more systematic and conceptually powerful than is ordinarily acknowledged. The book thus offers a defence of Goffman's writings as well as providing an introduction for those who have no prior acquaintance with Goffman's ideas.

"A must-read for any student—present or former—stuck in hookup culture's pressure to put out."  
—Ana Valens, *Bitch* Offering invaluable insights for students, parents, and educators, Lisa Wade analyzes the mixed messages of hookup culture on today's college campuses within the history of sexuality, the evolution of higher education, and the unfinished feminist revolution. She draws on

broad, original, insightful research to explore a challenging emotional landscape, full of opportunities for self-definition but also the risks of isolation, unequal pleasure, competition for status, and sexual violence. Accessible and open-minded, compassionate and honest, American Hookup explains where we are and how we got here, asking, "Where do we go from here?"

Featuring over 1,800 concise definitions of key terms, the Dictionary of the Social Sciences is the most comprehensive, authoritative single-volume work of its kind. With coverage on the vocabularies of anthropology, sociology, political science, economics, human geography, cultural studies, and Marxism, the Dictionary is an integrated, easy-to-use, A-to-Z reference tool. Designed for students and non-specialists, it examines classic and contemporary scholarship including basic terms, concepts, theories, schools of thought, methodologies, issues, and controversies. As a true dictionary, it also contains concise, jargon-free definitions that explain the rich, sometimes complex language of these increasingly visible fields.

Total institutions are defined in this reader not as a separate class of social establishments that exercise complete or nearly complete control over their population, but rather as specific institutions which exhibit to an intense degree certain characteristics found in all institutions. The issue therefore is not which institutions are total and which are not, but rather how much totality does each of our institutions display? Representing an important new approach to problems of social control, this book concentrates on dynamics-how institutions change in the extent or nature of their totality over time and how they display totality in different ways-rather than the mere enumeration of common traits.

Seminar paper from the year 2004 in the subject Sociology - Individual, Groups, Society, grade: 1,3, University of Regensburg, language: English, abstract: In view of the current disclosure of torture in war prisons in Iraq, but also through the disclosure of mistreatment in the Brandenburg an der Havel prison, it becomes clear how explosive the concept of total institutions still is more than forty years after its publication by Goffman. In his work *Asyle*, first published in 1961, Erving Goffman (1922-1982) summarizes in four essays his many years of sociological studies on the inmates of psychiatric clinics. From 1954 to 1957, Goffman was a visiting professor at the National Institute of Mental Health in Bethesda, Maryland. During this time he spent over a year doing field studies at St.

Elizabeth's Hospital (Washington D.C.), which then had about 7,000 inmates. Goffman's own experiences in dealing directly with the inmates of St. Elizabeth's Hospital are included in the book as well as countless descriptions of other well-known and lesser-known authors (e.g. George Orwell, Herman Melville), who spent some years of their lives in prison, in the monastery, in the boarding school, in an orphanage, in the military or in similar institutions. Goffman first encountered the term total institution in a 1952 graduate seminar on institutions. Coined by Everett Hughes, the term must have intrigued Goffman from the start. Burns writes: "It is clear from Goffman's course notes (he gave me a copy of them) that it must have been a remarkable teaching enterprise - enlivened with allusions, encyclopedic in its coverage, and radically critical and innovative in its approach." . But while Goffman thought of the term social institution in a way that differed from Hughes', he adopted the term total institution in Hughes' sense. For Hughes, these were "social institutions which were much more shut off from the outside world" - he cites nunneries as an example - Goffman accordingly relates his observations to "the situation of those 'extruded' from society". In this work, the aim is first to present Goffman's concept of total institutions and to go into the points of view of the inmates, the staff and the points of contact of both groups. Subsequently, the concept should be examined and assessed with regard to its possible application and possibilities should be found to further differentiate the concept.

The Social Thought of Erving Goffman Walter de Gruyter

"Read and cherished by thousands all over the world since it was first published in 1981, *Through the Narrow Gate* takes the reader on a spiritual journey that began one September day in 1962 when Karen Armstrong said good-bye to her family at London's King's Cross station and journeyed on to the convent in Tripton to become a nun. *Through the Narrow Gate* is by turns a book of spiritual revelation and an intimate look at life inside the cloistered walls of the convent."--BOOK JACKET.

In one way or another, we all carry trauma. It can manifest as anxiety, shame, low self-esteem, over-eating, under-eating, addiction, depression, confusion, people-pleasing, under-earning, low mood, negative thinking, social anxiety, anger, brain fog and more. Traumas, big or 'little', leave us trapped in cycles of dysfunctional behaviours, negative thoughts and difficult feelings. Yet many people are unaware they're stuck in old reactions and patterns that stem from their past traumas. Many of us are wary of the word and push it away instead of moving towards it and learning how to break free. Dr Sarah Woodhouse is a Research Psychologist who specialises in trauma and is passionate about helping people face this word and their past. In *You're Not Broken* she teaches you what a trauma is (it's probably not what you think), and how to recognise when, why and how your past is holding you back. She gently explains the pitfalls of ignoring awkward, upsetting episodes and how true freedom comes from looking back at your past with honesty. Then, sharing the latest research-based techniques and her own personal experience, she guides you towards breaking the trauma loop, reawakening your true self and reclaiming your future.

Through the Narrow Gate, Revised Routledge

This book is about Erving Goffman's frame analysis as it, on the one hand, was presented in his 1974 book *Frame Analysis* and, on the other, was actually conducted in a number of preceding substantial

analyses of different aspects of social interaction such as face-work, impression management, fun in games, behavior in public places and stigmatization. There was, in other words, a frame analytic continuity in Goffman's work. In an article published after his death in 1982, Goffman also maintained that he throughout his career had been studying the same object: the interaction order. In this book, the author states that Goffman also applied an overarching perspective on social interaction: the dynamic relation between ritualization, vulnerability and working consensus. However, there were also cracks in Goffman's work and one is shown here with reference to the leading question in *Frame Analysis* – what is it that's going on here? While framed on a "microsocial" level, that question ties in with "the interaction order" and frame analysis as a method. If, however, it is framed on a societal level, it mirrors metareflective and metasocial manifestations of changes and unrest in the interaction order that, in some ways, herald the emphasis on contingency, uncertainty and risk in later sociology. Through analyses of social media as a possible new interaction order – where frame disputes are frequent – and of interactional power, the applicability of Goffman's frame analysis is illustrated. As such, this book will appeal to scholars and students of social theory, classical sociology and social interaction.

The author of *The Presentation of Self in Everyday Life* analyzes a person's feelings about himself and his relationship to people society calls "normal." *Stigma* is an illuminating excursion into the situation of persons who are unable to conform to standards that society calls normal. Disqualified from full social acceptance, they are stigmatized individuals. Physically deformed people, ex-mental patients, drug addicts, prostitutes, or those ostracized for other reasons must constantly strive to adjust to their precarious social identities. Their image of themselves must daily confront, and be affronted by, the image others reflect back to them. Drawing extensively on autobiographies and case studies, sociologist Erving Goffman analyzes the stigmatized person's feelings about himself and his relationship to "normals" He explores the variety of strategies stigmatized individuals employ to deal with the rejection of others, and the complex sorts of information about themselves they project. In *Stigma*, the interplay of alternatives the stigmatized individual must face every day is brilliantly examined by one of America's leading social analysts. "This short book established the conceptual understanding of stigma that continues to buttress contemporary sociological thinking." —Sociological Review
