TOBY DAVILA

Religion, Spirituality and the Near-Death Experience M.E. Sharpe

"This work includes a look at cosmologists and physicists who have revised their theories on humanity's legacy when our world meets a fateful end, proposing a means by which mankind's achievements might survive indefinitely, transporting from one universe to another without violating the known laws of physics."--BOOK JACKET.

The Wiley Blackwell Companion to the Study of Religion Springer Nature

The medicalization of death is a challenge for all the world's religious and cultural traditions. Death's meaning has been reduced to a diagnosis, a problem, rather than a mystery for humans to ponder. How have religious traditions responded? What resources do they bring to a discussion of death's contemporary dilemmas? This book offers a range of creative and contextual responses from a variety of religious and cultural traditions. It features 14 essays from scholars of different religious and philosophical traditions, who spoke as part of a recent lecture and dialogue series of Drake University's The Comparison Project. The scholars represent ethnologists, medical ethicists, historians, philosophers, and theologians--all facing up to questions of truth and value in the light of the urgent need to move past a strictly medicalized vision. This volume serves as the second publication of The Comparison Project, an innovative new approach to the philosophy of religion housed at Drake University. The Comparison Project organizes a biennial series of scholar lectures, practitioner dialogues, and comparative panels about core, cross-cultural topics in the philosophy of religion. The Comparison Project stands apart from traditional, theistic approaches to the philosophy of religion in its commitment to religious inclusivity. It is the future of the philosophy of religion in a diverse, global world.

Routledge

Explores how religious understandings of death are experienced in hospice care.

Speaking of Death Wipf and Stock Publishers

The civil rights movement was arguably the most successful social movement in American history. In a provocative new assessment of its success, David Chappell argues that the story of civil rights is not a story of the ultimate triumph of liberal ideas after decades of gradual progress. Rather, it is a story of the power of religious tradition. Chappell reconsiders the intellectual roots of civil rights reform, showing how northern liberals' faith in the power of human reason to overcome prejudice was at odds with the movement's goal of immediate change. Even when liberals sincerely wanted change, they recognized that they could not necessarily inspire others to unite and fight for it. But the prophetic tradition of the Old Testament--sometimes translated into secular language--drove African American activists to unprecedented solidarity and self-sacrifice. Martin Luther King Jr., Fannie Lou Hamer, James Lawson, Modjeska Simkins, and other black leaders believed, as the Hebrew prophets believed, that they had to stand apart from society and instigate dramatic changes to force an unwilling world to abandon its sinful ways. Their impassioned campaign to stamp out

"the sin of segregation" brought the vitality of a religious revival to their cause. Meanwhile, segregationists found little support within their white southern religious denominations. Although segregationists outvoted and outgunned black integrationists, the segregationists lost, Chappell concludes, largely because they did not have a religious commitment to their cause.

Teaching Death and Dying Simon and Schuster

Explore a rigorous but accessible guide to contemporary approaches to the study of religion from leading voices in the field The Wiley Blackwell Companion to the Study of Religion delivers an expert and insightful analysis of modern perspectives on the study of religion across the humanities and the social sciences. Presupposing no knowledge of the approaches examined in the collection, the book is ideal for undergraduate students who have yet to undertake extensive study in the humanities or social sciences. The book includes perspectives from those in fields as diverse as globalization, cognitive science, the study of emotion, law, esotericism, sex and gender, functionalism, terror, the comparative method, modernism, and postmodernism. Many of the topics covered in the book clearly hail from religious studies, while others are grounded in other areas of academia. All of the chapters contained within are written by recognized authors who show how their chosen discipline contributes to the understanding of the phenomenon of religion. This book also includes topics like: A comprehensive exploration of multiple approaches to religious study, including anthropology, economics, literature, phenomenology, philosophy, psychology, sociology, and theology A review of various topics germane to the study of religion, including the study of the body, cognitive science, the comparative method, death and the afterlife, law, magic, music, and myth A selection of subjects touching on modern trends in extremism and violence, including chapters on terror and violence, fundamentalism, and nationalism A discussion of the influence of modernism and postmodernism in religion Ideal for undergraduate, graduate, and postgraduate students in humanities and social science programs taking courses on religion and myth, The Wiley Blackwell Companion to the Study of Religion will also earn a place in the libraries of specialists working in the fields of Religious Studies, Theology, Sociology, Anthropology, Psychology, Political Science, History, and Philosophy.

Death and Afterlife Yale University Press

From childbirth and baptism through to courtship, weddings, and funerals, every stage in the life-cycle of Tudor and Stuart England was accompanied by ritual. Even under the protestantism of the reformed Church, the spiritual and social dramas of birth, marriage, and death were graced with elaborate ceremony. Powerful and controversial protocols were in operation, shaped and altered by the influences of the Reformation, the Revolution, and the Restoration. Each of the major rituals was potentially an arena for argument, ambiguity, and dissent. Ideally, as classic rites of passage, these ceremonies worked to bring people together. But they also set up traps into which people could stumble, and tests which not everybody could pass. In practice, ritual performance revealed frictions and fractures that everyday local discourse attempted to hide or to heal. Using fascinating first-hand evidence, David Cressy shows how the making and remaking of ritual formed part of a continuing debate, sometimes strained and occasionally acrimonious, which exposed the raw nerves of society

in the midst of great historical events. In doing so, he vividly brings to life the common experiences of living and dying in Tudor and Stuart England.

Religion and the Death Penalty Routledge

This practical guide summarizes the principles of working with dying patients and their families as influenced by the commoner world religions and secular philosophies. It also outlines the main legal requirements to be followed by those who care for the dying following the death of the patient. The first part of the book provides a reflective introduction to the general influences of world religions on matters to do with dying, death and grief. It considers the sometimes conflicting relationships between ethics, religion, culture and personal philosophies and how these differences impact on individual cases of dying, death and loss. The second part describes the general customs and beliefs of the major religions that are encountered in hospitals, hospices, care homes and home care settings. It also includes discussion of non-religious spirituality, humanism, agnosticism and atheism. The final part outlines key socio-legal aspects of death across the UK. *Death, Religion and Law* provides key knowledge, discussion and reflection for dealing with the diversity of the everyday care of dying and death in different religious, secular and cultural contexts. It is an important reference for practitioners working with dying patients, their families and the bereaved.

Dying, Death, and Afterlife in Dharma Traditions and Western Religions Columbia University Press

In a valuable contribution to the philosophy of religion, Merold Westphal explains what it means to be religious. Examples from the writings of Kierkegaard, Freud, Heidegger, Dostoyevsky, Nietzsche, and Tolstoy illuminate the author's thesis that guilt and death are the central problems of human existence. A typology of exilic, mimetic, and covenantal religions distinguishes three different approaches to salvation from guilt and death.

Death, Burial and Rebirth in the Religions of Antiquity Routledge

This dramatic and sustained response to decades of research into near-death experiences (NDEs) is the first book to credibly bridge the gap between the competing factions of science and spirituality. Neither a religious argument touting NDEs as hard evidence for God, nor a scientific rebuke to religious interpretations, it balances investigation of these much-reported yet baffling phenomena, and brings fresh urgency to the study of our hopes for a life beyond.

Death Anxiety and Religious Belief John Wiley & Sons

This Handbook traces the history of the changing notion of what it means to die and examines the many constructions of afterlife in literature, text, ritual, and material culture throughout time. The *Routledge Handbook of Death and the Afterlife* is an outstanding reference source to the key topics, problems, and debates in this exciting subject. Comprising twenty-nine chapters by a team of international contributors, the Handbook is divided into three parts and covers the following important themes: The study of dying, death, and grief Disposal of the dead: past, present, and future Representations of death: narratives and rhetoric Youth meets death: a juxtaposition Questionable deaths and afterlives: suicide, ghosts, and avatars Material corpses and imagined afterlives around the world Within these sections, central issues, debates, and problems are examined, including: the world of death and dying from various cultural viewpoints and timeframes, cultural and social constructions of the definition of death, disposal practices, and views of the

afterlife. The *Routledge Handbook of Death and the Afterlife* is essential reading for students and researchers in religious studies, philosophy, anthropology, and sociology.

Beliefs and Approaches to Death and Dying in Late Seventeenth-century England Routledge

For the decade that followed the end of the cold war, the world was lulled into a sense that a consumerist, globalized, peaceful future beckoned. The beginning of the twenty-first century has rudely disposed of such ideas—most obviously through 9/11 and its aftermath. But just as damaging has been the rise in the West of a belief that a single model of political behavior will become a worldwide norm and that, if necessary, it will be enforced at gunpoint. In *Black Mass*, celebrated philosopher and critic John Gray explains how utopian ideals have taken on a dangerous significance in the hands of right-wing conservatives and religious zealots. He charts the history of utopianism, from the Reformation through the French Revolution and into the present. And most urgently, he describes how utopian politics have moved from the extremes of the political spectrum into mainstream politics, dominating the administrations of both George W. Bush and Tony Blair, and indeed coming to define the political center. Far from having shaken off discredited ideology, Gray suggests, we are more than ever in its clutches. *Black Mass* is a truly frightening and challenging work by one of Britain's leading political thinkers.

Religious Approaches to Death Springer

It has long been assumed that the more modern we become, the less religious we will be. Yet a recent resurrection in faith has challenged the certainty of this belief. In these original essays and interviews, leading hermeneutical philosophers and postmodern theorists John D. Caputo and Gianni Vattimo engage with each other's past and present work on the subject and reflect on our transition from secularism to postsecularism. As two of the figures who have contributed the most to the theoretical reflections on the contemporary philosophical turn to religion, Caputo and Vattimo explore the changes, distortions, and reforms that are a part of our postmodern faith and the forces shaping the religious imagination today. Incisively and imaginatively connecting their argument to issues ranging from terrorism to fanaticism and from politics to media and culture, these thinkers continue to reinvent the field of hermeneutic philosophy with wit, grace, and passion.

The Death of Secular Messianism Bloomsbury Publishing

Few philosophers have devoted such sustained, almost obsessive attention to the topic of death as Søren Kierkegaard. *Kierkegaard and Death* brings together new work on Kierkegaard's multifaceted discussions of death and provides a thorough guide to the development, in various texts and contexts, of Kierkegaard's ideas concerning death. Essays by an international group of scholars take up essential topics such as dying to the world, living death, immortality, suicide, mortality and subjectivity, death and the meaning of life, remembrance of the dead, and the question of the afterlife. While bringing Kierkegaard's philosophy of death into focus, this volume connects Kierkegaard with important debates in contemporary philosophy.

Beyond the Death of God Kendall/Hunt Publishing Company

The academic study of death rose to prominence during the 1960s. Courses on some aspect of death and dying can now be found at most institutions of higher learning. These courses tend to stress the psycho-social aspects of grief and bereavement, however, ignoring the religious elements

inherent to the subject. This collection is the first to address the teaching of courses on death and dying from a religious-studies perspective.

Death and Religion in a Changing World HarperLuxe

Few issues apply universally to people as poignantly as death and dying. All religions address concerns with death from the handling of human remains, to defining death, to suggesting what happens after life. The Routledge Companion to Death and Dying provides readers with an overview of the study of death and dying. Questions of death, mortality, and more recently of end-of-life care, have long been important ones and scholars from a range of fields have approached the topic in a number of ways. Comprising over fifty-two chapters from a team of international contributors, the companion covers: funerary and mourning practices; concepts of the afterlife; psychical issues associated with death and dying; clinical and ethical issues; philosophical issues; death and dying as represented in popular culture. This comprehensive collection of essays will bring together perspectives from fields as diverse as history, philosophy, literature, psychology, archaeology and religious studies, while including various religious traditions, including established religions like Christianity, Judaism, Islam, Hinduism, and Buddhism as well as new or less widely known traditions such as the Spiritualist Movement, the Church of Latter Day Saints, and Raëlianism. The Routledge Companion to Death and Dying is essential reading for students and researchers in religious studies, philosophy and literature.

Patterns of Transcendence Farrar, Straus and Giroux

Looking at how religious people approach death in the twenty-first century, this is a comprehensive study of the intersection of death and religion. It describes how people from a variety of faiths draw on and adapt traditional beliefs and practices as they deal with death in modern societies.

Birth, Marriage, and Death : Ritual, Religion, and the Life-Cycle in Tudor and Stuart England Deepak Heritage Books

Explores life's meaning through the lens of belief in God and lived realities including boredom, denial of death, and suicide.

Religion and the Meaning of Life Routledge

Major religious traditions of the world contain perspectives of perennial importance on the topic of death and afterlife. Such concepts are not only reflected directly in mortuary and funerary practices, but also inform patterns of beliefs and rituals that shape human lifestyles. Here thirteen scholars, each a specialist in a particular religious tradition, outline the beliefs and practices relating to death and afterlife. The volume introduction provides a framework for understanding the evolutionary relationships among world religions and the unity as well as the diversity of their quest for overcoming death.

Death and the World Religions Routledge

This dissertation is about death and its relationship to religion in late seventeenth-century England.

The primary argument is that while beliefs about death stemmed from the Reformation tradition, divergent religious reforms of Puritanism and Arminianism did not lead to differing approaches to death. People adapted religious ideas on general terms of Protestant Christianity and not specifically aligned with varying reform movements. This study links apologetics and sermons concerning spiritual death, physical death, and remedies for each to cultural practice through the lens of wills and graves to gauge religious influence. Readers are reminded of the origins of reformed thought, which is what seventeenth-century English theologians built their ideas upon. Religious debates of the day centered on the Puritan and Arminian divide, which contained significantly different ideas of soteriology, a key aspect of a good death in the English *ars moriendi*. Puritans and Arminians regarded each other as political and religious enemies, yet their theology and teachings reveal the same understanding to the end of life and afterlife. Interestingly, people approached death identifying their common faith as Christians, not divided into different religious groups. Individuals heeded preachers' advice to recognize mortality and prepare for death in advance of the deathbed. Guidance from theologians emphasized hope and expectation of a blessed death through reliance on God and His promises. This dissertation contributes to narrowing a gap in the scholarship on late seventeenth-century English history and is also a work in thanatology that assesses how humanity has dealt with death. This research especially considers wills as a primary source to evaluate how society faced mortality and Christian teachings shaped conventional thought. The evidence also reveals an increasing value placed on family. Finally, this dissertation is a reminder that assessing the personal topic of death and dying is a unique way to increase understanding of human nature as death is approached. This is a study of the humanities that deals with life's meaning, mortality, identity and cultural change at one of the most crucial of the life cycles - death.

Religion, Death, and Dying Wm. B. Eerdmans Publishing

This book considers how the termination of life might be accepted in the view of a general obligation to protect life. It features more than 10 papers written by scholars from 14 countries that offer international comparative empirical research. Inside, readers will find case studies from such areas as: India, Chile, Germany, Italy, England, Palestine, Lithuania, Nigeria, and Poland. The papers focus on three limitations of the right to life: the death penalty, abortion, and euthanasia. The contributors explore how young people understand and evaluate the right to life and its limitations. The book presents unique empirical research among today's youth and reveals that, among other concepts, religiosity matters. It provides insight into the acceptance, perception, and legitimation of human rights by people from different religious and cultural backgrounds. This investigation rigorously tests for inter-individual differences regarding political and judicial rights on religious grounds, while controlling for other characteristics. It will help readers better understand the many facets of this fundamental, yet controversial, philosophical question. The volume will be of interest to students, researchers, as well as general readers searching for answers.
