The Oracle E-Business Suite 12 Supply Chain Certified Implementation Specialist: Oracle Inventory certification indicates a functional foundation in E-Business Essentials including skills such as how to

access and navigate within the R12 E-Business Suite, how to enter data, retrieve information in the form of a query and access online help. You will be able to add items, enable lot control, enable serial control, enable dual unit of measure control, perform inventory transfers, perform inventory replenishment, perform a cycle, view on-hand quantities, create reservations, and setup material statuses. The consultants who will benefit the most from a certification are the ones with typically less than 2 year's project experience. This is not to say that consultants with higher experience will not benefit, but at that level, having a certification matters much less. So if you have little or no Oracle Inventory experience, you should get yourself certified, get some project experience, and then the whole of the Oracle applications World is open for you

to explore. Helping you with the first step on your ladder to success is this book!
