The advent of the Fourth Industrial Revolution (4IR) has created a pressing need for digital transformation in human resources management (HRM) in public institutions. Traditional practices must be updated, preventing institutions from effectively managing their workforce and meeting stakeholder demands. The lack of digitalization leads to inefficiencies, ineffective performance evaluation, and an inability to adapt to the rapidly evolving technological landscape. This gap between existing HR practices and the demands of the digital age poses a significant challenge for public sector organizations.

Digital Transformation in Public Sector Human Resource Management offers a comprehensive solution to the challenges faced by public institutions. The book provides practical insights and strategies for aligning HR practices with the modern technological landscape by exploring how digital transformation can revolutionize HRM processes. It demonstrates the benefits of adopting digital technologies and innovative strategies in public sector HRM through real-world examples and case studies. The book guides public sector professionals, policymakers, and academics, helping them navigate the complexities of digital transformation in HRM.

 This report reviews economic development of Namibia in the recent years after the

global crisis. The country bounced back very well after the crisis. Namibia exhibited strong performance in the primary sectors, which has led to remarkable growth in the second half of 2012. The government has launched a three-year fiscal initiative to enhance job opportunities and preserve fiscal and external sustainability. Plans have been identified to strengthen banks, control mortgages, and improve the education system. The Executive Board has appreciated Namibia's strong macroeconomic performance.

This paper reports economic developments in Namibia during the 1990s. Since the early 1990s, average GDP growth has been higher than in the previous decade, owing to the opening of two new diamond mines, the extension of the limits of Namibia's coastal waters, and the rapid growth in government services. Real GDP grew by more than 5 percent in 1991-92, contracted by 2 percent in 1993, and expanded by 7 percent in 1994 and 5 percent in 1995. The allocation of domestic expenditure fluctuated during 1990-95.

Employment Juta and Company Ltd Diamond Warriors in Colonial Namibia enters into uncharted scholarly territory of illegal diamond smuggling at the largest diamond mining company in colonial Namibia—De Beers' Consolidated Diamond Mines of South West Africa (CDM). It details the underground activities of the natives (migrant workers) employed by the CDM and how these illicit activities accounted for rapid development in Owamboland. Beyond this account, the book takes on the deterministic 'natural resource curse' theory that equates natural resource endowments to a curse resulting in underdevelopment and sometimes conflict. It is argued and proven herein, from a decolonial

standpoint, that such an approach is an oversimplification of the political economy of natural resources in Africa in general and Namibia in particular. The text also provides a contextual account of the contract labour system and details the symbiotic relationship between CDM and the colonial state before highlighting the remaining unanswered questions and areas of further research

The Private Sector Foundation (PSF) was set up in 1981 to promote "free market values" and support the small business sector. This pamphlet reports on the second part of the 1981 manpower survey conducted by PSF to determine the principal employers and the prevailing skill shortages, summarizing information on working conditions given by 263 firms. The survey did not include agricultural and domestic workers. (Eriksen/Moorsom 1989).

This book explores the gender issues associated with international migration in dual career households. Adopting a feminist approach, the author links research in economics, sociology, management and business and human geography to explore post-industrial managerial and professional careers. Particular emphasis is placed on the way in which social mobility and spatial mobility are entwined. The author explores the location and mobility decisions of dual career households, examining their personal and household biographies as well as published statistics. Of essential interest to scholars of human geography, sociology and gender studies, this book will also interest those working in organizational, migration and urban studies.

There are ongoing debates on the concepts surrounding the roles of Indigenous people in transforming the entrepreneurial landscape to promote socio-economic development. Arguably, the culture and ways of our lives, in the context of entrepreneurship, have a role in influencing social economic development. The ideals between the entrepreneurial practice of Indigenous people and their culture are somewhat commensal towards sustainable growth and development. The practice of Indigenous and cultural entrepreneurship is embedded in historical findings. Context, Policy, and Practices in Indigenous and Cultural Entrepreneurship provides insights into the policy, culture, and practice that influence the impact of local and Indigenous entrepreneurs within communities which transcends to socio-economic development. This is critical as the knowledge gained from our entrepreneurial diversity can provide a platform to reduce social ills as a result of unemployment and give a sense of belonging within the social context.

Covering key topics such as government policy, entrepreneurial education, information technology, and trade, this premier reference source is ideal for policymakers, entrepreneurs, business owners, managers, scholars, researchers, academicians, instructors, and students.
