 NEW YORK TIMES BESTSELLER • The bestselling author of Everything Happens for a Reason (And Other Lies I've Loved)

asks, how do you move forward with a life you didn't choose? "Kate Bowler is the only one we can trust to tell us the truth."—Glennon Doyle, author of the #1 New York Times bestseller *Untamed* It's hard to give up on the feeling that the life you really want is just out of reach. A beach body by summer. A trip to Disneyland around the corner. A promotion on the horizon. Everyone wants to believe that they are headed toward good, better, best. But what happens when the life you hoped for is put on hold indefinitely? Kate Bowler believed that life was a series of unlimited choices, until she discovered, at age thirty-five, that her body was wracked with cancer. In *No Cure for Being Human*, she searches for a way forward as she mines the wisdom (and absurdity) of today's "best life now" advice industry, which insists on exhausting positivity and on trying to convince us that we can out-eat, out-learn, and out-perform our humanness. We are, she finds, as fragile as the day we were born. With dry wit and unflinching honesty, Kate Bowler grapples with her diagnosis, her ambition, and her faith as she tries to come to terms with her limitations in a culture that says anything is possible. She finds that we need one another if we're going to tell the truth: Life is beautiful and terrible, full of hope and despair and everything in between—and there's no cure for being human.

 "Sometimes bees get too big to be up in the branches, sometimes they fall and break their bones. This week both happened and Foreman said, 'Tomorrow we'll find two new bees.' Peony lives with her sister and grandfather on a fruit farm outside the city. In a world where real bees are extinct, the quickest, bravest kids climb the fruit trees and pollinate the flowers by hand. All Peony really wants is to be a bee. Life on the farm is a scramble, but there is enough to eat and a place to sleep, and there is love. Then Peony's mother arrives to take her away from everything she has ever known, and all Peony's grit and quick thinking might not be enough to keep her safe. *How To Bee* is a beautiful and fierce novel for younger readers, and the voice of Peony will stay with you long after you read the last page.

Field Guide to the Common Bees of California Houghton Mifflin Harcourt

From a Newbery Medal-winning author, an “exciting novel” about a colonial girl’s experience during the French and Indian War (Saturday Review). In the year 1754, the stillness of Charlestown, New Hampshire, is shattered by the terrifying cries of an Indian raid. Young Miriam Willard, on a day that had promised new happiness, finds herself instead a captive on a forest trail, caught up in the ebb and flow of the French and Indian War. It is a harrowing march north. Miriam can only force herself to the next stopping place, the next small portion of food, the next icy stream to be crossed. At the end of the trail waits a life of hard work and, perhaps, even a life of slavery. Mingled with her thoughts of Phineas Whitney, her sweetheart on his way to Harvard, is the crying of her sister’s baby, Captive, born on the trail. Miriam and her companions finally reach Montreal, a city of shifting loyalties filled with the intrigue of war, and here, by a sudden twist of fortune, Miriam meets the prominent Du Quesne family, who introduce her to a life she has never imagined. Based on an actual narrative diary published in 1807, *Calico Captive* skillfully reenacts an absorbing facet of history. “Vital and vivid, this short novel based on the actual captivity of a pre-Revolutionary girl of Charlestown, New Hampshire, presents American history with force and verve.” —Kirkus Reviews

This is a book of geography questions and answers. There are 31 chapters in the book organized into seven sections (USA, World, Bodies of Water, Cultural Geography, Economic Geography, Arrange and Decipher, and Other Topics). Each chapter focuses on a different topic. Within each chapter, questions get progressively more challenging. While the first few questions in each chapter are comparable to school-level competition questions, the last couple of questions in each chapter could stump even national champion geographers. Unlike other books,

this book arranges the questions and answers into two different columns. This way the reader can easily cover the answers with a bookmark or hand while going over questions. The structure and format of questions in this book are modeled upon the questions used by the National Geographic Society for the National Geography Bee. With over 1,500 questions, this book will be helpful for children in grades 3-8 who are participating in geography contests. As a question-answer manual, this book should also be of interest to geography buffs and trivia aficionados.

Touching Spirit Bear National Geographic Kids

This little book is confined to very simple “reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions.” The shape and motions of the earth are fundamental ideas—however difficult to grasp.

Geography should be learned chiefly from maps, and the child should begin the study by learning “the meaning of map,” and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child’s mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which “Geography” so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on “Place”—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

Based on a true story, *The Royal Bee* is an elegantly written tale that pays tribute to a young boy’s courage and strength of character. Song-ho is a young Korean boy destined by birth to a life of poverty. Barred from going to school—only the sons of wealthy families could attend—he dreams of learning to read and write. Then one day he hears the sound of a school bell and follows it deep into the valley. There, the school master turns him away, but Song-ho’s boldness and determination earn him a chance at gaining an education nevertheless. Dramatically illustrated with richly textured oil paintings, the story offers glimpses of daily life in Korea a century ago—for both the rich and the poor.
