More than a decade after LBJ left office, researchers began to open up the Johnson administration as an important area of scholarly study. Exploring the Johnson Years is an invaluable introduction to that administration and to the LBJ Library's more than thirty million separate documents. The contributors cover every major aspect of the Johnson presidency, from Vietnam (George C. Herring) to the War on Poverty (Mark I. Gelfand), including coverage of Latin American policy (Walter LaFeber), education (Hugh Davis Graham), civil rights (Steven F. Lawson), the nature of the White House staff (Larry Berman), and Johnson's stormy relationship with the media (David Culbert). The essays illuminate some of the most important files and show how they can be used to further historical understanding of the Johnson years. As a result, scholars who plan to use the library will have a useful guide before they begin, while general readers will be able to discover the ways in which the library's holdings relate to the existing body of literature on the Johnson administration.

The Cultural Politics of Childhood Hodder Education

Global value chains are radically altering how goods and services are produced--parts made in one country, for instance, are increasingly assembled in another and sold in a third. The globalisation of production has changed the industrial structure ...

General Motors McGraw-Hill Science, Engineering & Mathematics

Safe drinking water, sanitation and good hygiene are fundamental to health, survival, growth and development. However, these basic necessities are still a luxury for many of the world's poor people. Over 1.1 billion of our fellow citizens do not use drinking water from improved sources, while 2.6

billion lack basic sanitation. Safe drinking water and basic sanitation are so obviously essential to health that they risk being taken for granted. Efforts to prevent death from diarrhoea or to reduce the burden of such diseases as ascariasis, dracunculiasis, hookworm, schistosomiasis and trachoma are doomed to failure unless people have access to safe drinking water and basic sanitation. Lack of basic sanitation indirectly inhibits the learning abilities of millions of school-aged children who are infested with intestinal worms transmitted through inadequate sanitation facilities and poor hygiene. The Millennium Development Goals (MDGs) have set us on a common course to push back poverty, inequality, hunger and illness. The world has pledged to reduce by half the proportion of people without sustainable access to safe drinking water and basic sanitation. Entering the International Decade for Action, Water for Life, 2005-2015, this report looks at the challenge of meeting the MDG target for drinking water and sanitation. Achieving the MDG drinking water and sanitation target poses two major challenges: a rapid pace of urbanization, which requires a major effort even to keep up the current coverage levels; a huge backlog of rural people unserved with basic sanitation and safe drinking water, which calls for an intensive mobilization of resources to reduce the vast coverage gap between urban and rural populations.

Book Description: Management: The New Competitive Landscape, by Bateman and Snell, has consistently discussed and explained the traditional, functional approach to management-through planning, organizing, leading, and controlling. But the 6th edition goes a step further, in defining and highlighting with icons, four "bottom line" practices that managers and companies must deliver to their customers: Innovation, Speed, Quality, and Cost. Bateman and Snell's: Management: The New Competitive Landscape, 6th edition has always been about a series of "firsts": first to have a chapter on diversity, first to devote a section to the environment, and first to relate a "bricks and clicks" theme to explain the challenges of managing in a New Economy. This new edition is no exception with the expansion of such timely topics as ethics and technology. Management: The New Competitive Reality, 6th edition shows how managers must utilize the classic principles of management in combination with the practices of the "New Economy" to achieve managerial goals. By reinforcing these new business practices in context with the functional approaches, the authors deliver a unique theme amongst all principles of management texts-how to manage in ways that deliver results.

The aim of the book is to be a reference book in automotive technology, as far as automotive chassis (i.e. everything that is inside a vehicle except the engine and the body) is concerned. The book is a result of a decade of work heavily sponsored by the FIAT group (who supplied material, together with other automotive companies, and sponsored the work). The first volume deals with the design of automotive components and the second volume treats the various aspects of the design of

a vehicle as a system.

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.
