*2,286 Traditional Stencil Designs* BoD - Books on Demand  
 Make home décor, jewelry, and more with projects that put a twenty-first-century spin on this age-old craft. Includes photos and diagrams. Discover a fresh new take on the traditional art of macramé, a craft that was incredibly popular in the seventies and is currently enjoying a renaissance. Macramé projects are the best way to bring the current trend for luxe, boho interiors into your home. This book includes on-trend macramé projects for inside and outside the home. Choose from an assortment of projects—with “easy” and “more advanced” versions so you can develop your skills as you go. Learn all the basic macramé knots with the knot tutorial library so you can get started on your favorite projects straight away, whether it's the ubiquitous hanging plant holder or a stunning statement arch for the garden or a doorway.

*The Tunic Bible* John Wiley & Sons

Probabilistic risk analysis aims to quantify the risk caused by high technology installations. Increasingly, such analyses are being applied to a wider class of systems in which problems such as lack of data, complexity of the systems, uncertainty about consequences, make a classical statistical analysis difficult or impossible. The authors discuss the fundamental notion of uncertainty, its relationship with probability, and the limits to the quantification of uncertainty. Drawing on extensive experience in the theory and applications of risk analysis, the authors focus on the conceptual and mathematical foundations underlying the quantification, interpretation and management of risk. They cover standard topics as well as important new subjects such as the use of expert judgement and uncertainty propagation. The relationship of risk analysis with decision making is highlighted in chapters on influence diagrams and decision theory. Finally, the

difficulties of choosing metrics to quantify risk, and current regulatory frameworks are discussed.

*Modern Ladies' Tailoring* David & Charles

Which one will you knit first? With 50 patterns for knitted shawls and wraps to choose from, in so many styles, textures, and yarns, choosing your first project will be a welcome challenge. From simple knit-purl designs for beginners to slip-stitch color work designs, doubleknit, brioche, lace, and cables--there are designs to interest every level of knitter. There are so many fabulous designs, this will become your go-to shawl knitting book.

Discover a world of inspired and colourful jewellery-making from the comfort of your own home. Just make, bake and wear! In this comprehensive guide to modern polymer clay techniques, artist and designer Heidi Helyard reveals the simple techniques that can be used to create one-off, contemporary jewellery pieces with minimal tools and equipment. Polymer clay, which has been around for nearly eighty years, is currently finding itself popular amongst contemporary jewellery makers as the bright colours and sheer versatility of the material allows makers to create bold and graphic modern designs. The beauty of polymer clay is that it presents so many opportunities to explore colour combinations, patterns and texture. In this book you will learn ten easy yet exciting techniques including slab and cane making, marbling and colour mixing, inlay techniques, printing onto clay, surface embellishments and more to create twenty unique jewellery pieces. The projects in this book vary in complexity, but are accessible to both novice and advanced makers alike. If you are a beginner, the extensive step-by-step photos and instructions will help you develop your polymer clay skills and complete the projects with confidence. As you build your skills and learn the techniques via the book, you will realise that you can combine techniques to create all-new results. The skills you learn in this book will open up a limitless world of further experimentation for

you to discover.

In this book "Radar Technology", the chapters are divided into four main topic areas: Topic area 1: "Radar Systems" consists of chapters which treat whole radar systems, environment and target functional chain. Topic area 2: "Radar Applications" shows various applications of radar systems, including meteorological radars, ground penetrating radars and glaciology. Topic area 3: "Radar Functional Chain and Signal Processing" describes several aspects of the radar signal processing. From parameter extraction, target detection over tracking and classification technologies. Topic area 4: "Radar Subsystems and Components" consists of design technology of radar subsystem components like antenna design or waveform design.

*Guide to men's tailoring, Volume 2* Gwasg y Bwthyn

Shares the wisdom of animals and their matching gemstones to help work on yourself mentally, emotionally, physically, and spiritually • Reveals the energetic connections between 88 different animal allies and 88 gems, stones, and crystals from the mineral kingdom • Includes animal medicine teachings from a variety of creatures, from hummingbirds and cats to dolphins and bears, to help you find inner peace, knowledge, and wisdom • Explains how the color, formation, and the manner in which a stone grows in the Earth offers a teaching to know yourself and your life purpose All creatures, great and small, in all species on this planet are interconnected. When an animal, insect, bird, or other creature from nature appears repetitively, whether in real life or dreams, it is time to pay attention and find the message that nature is bringing you. There are many teachings available to us through the observation of a particular animal totem and their habits and patterns. For example, parrot medicine can teach us to see life from another perspective as we mimic the wise ones who have walked on the path before us. Mouse medicine teaches us to scrutinize all the details before taking action. Bear may teach you to go within yourself to find answers within your personal cave. Every animal is an ally, and every animal has a story to help you find inner peace, knowledge, and wisdom. The associated gemstone for each animal totem is a further indication of the energy of the animal as symbolism and a teaching on your sacred journey. Crystals, minerals, and stones hold the history of the Earth and all this planet has to offer you to evolve your soul and spirit in this incarnation. The color, formation, and the manner in which the stone grows in the Earth offers a teaching to know yourself and your life purpose. It takes time and inner reflection to understand the messages and clues throughout the gemstone kingdom. Matching the teachings of animals with the teachings of gemstones, Margaret Ann Lembo shows how there is symbolism in all around offering clues to light your path. Exploring 88 gems, stones, and crystals and 88 different animal allies, she details the spiritual connections of crystal vibrations and animal medicine, providing you with a deeper understanding of the interconnected energies of everything around us. She

shows how the spiritual fulfillment you seek is available to you in so many ways and this path of working with gemstones and animal medicine is just one of many.

Energy Fact Book C&T Publishing Inc

From the president of EMILY's List, a playbook for women changing the world in politics, business, or any arena, with a foreword from Vice President Elect Kamala Harris. "I have long believed that women who dream big, work hard, and get back up after they get knocked down can do anything; Stephanie Schriock is one of those women. I'm so glad her thoughtful guidance is now available for women everywhere."—Hillary Rodham Clinton For the past thirty-five years EMILY's List has helped the campaigns of thousands of pro-choice Democratic women, but the hardest part has always been convincing more women to run. Then Donald Trump was elected, and something shifted into place. American women who were furious and frustrated were looking for a way to channel their outrage into action, united in proclaiming, "If that guy can get elected, why not me?" The day after the 2016 election, dozens of women searched out an old sign-up link buried on the EMILY's List website. By Thanksgiving, those dozens had grown to a few thousand. And that was only the beginning. By the end of 2018, there were nearly fifty thousand women signed up to run for office, with scores more signing up each day. Run to Win is for all women who are looking to lead. Organized around the steps that EMILY's List coaches its candidates through (from deciding to run through celebrating victory), this book is full of essential lessons for any woman trying to succeed in a male-dominated field. Their arena is politics but their message is universal. And Stephanie Schriock is the most qualified person to share these lessons. Not only is she a powerful figure in politics but she's also a woman who commands respect for her astounding success as president of EMILY's List and a longtime Democratic operative. Her message is uplifting and actionable, her voice is that of your best girlfriend walking you through what you need to consider as you make your plan, and her experience coaching the biggest female candidates in recent elections (including all of the female 2020 Democratic presidential candidates) makes her the de facto authority on the strategies women can employ to run, fight, and win, whatever their field or goal.

**Probabilistic Risk Analysis** Rowman & Littlefield

This book aims at describing the wide variety of new technologies and concepts of non-standard antenna systems - reconfigurable, integrated, terahertz, deformable, ultra-wideband, using metamaterials, or MEMS, etc, and how they open the way to a wide range of applications, from personal security and communications to multifunction radars and towed sonars, or satellite navigation systems, with space-time diversity on transmit and receive. A reference book for designers in this lively scientific community linking antenna experts and signal processing engineers.

*Macramé Patterns and Projects* Michelle Ford

Trust NFPA 30's protocols to minimize the hazards of flammable and combustible liquids. Adopted by most states and enforceable under OSHA, NFPA 30: Flammable and Combustible Liquids Code presents the best guidance on the safe storage, handling, and

use of dangerous liquids. It provides the criteria you need to design facilities for better protection, comply with sprinkler rules, and use safe operating practices. Changes and additions in the 2003 edition affect: \* Siting of storage tanks \* Spill control, normal breather vents, and emergency relief vents for storage tanks \* Design of liquids storage cabinets, inside storage areas, and liquid warehouses \* Sprinkler design rules for storage of all types of liquids \* And more When you work with flammable and combustible liquids, even a seemingly minor oversight or mistake can have major repercussions. Don't compromise safety--insist on NFPA 30!

*Radar Technology* David and Charles

Step by step to a handmade men's jacket. Hundreds of steps and thousands of hand stitches are necessary before you hold a finished men's jacket in your hands. The trick is to follow the correct order of the individual steps and combine traditional and modern processing methods. As in the first volume of our men's tailoring books, "How to make shirts, trousers, and vests", step-by-step instructions in this book with numerous photos and drawings lead safely through the fittings to the finished garment. Detailed explanations ensure that you always keep an overview. This book is intended for advanced users with a few years of sewing practice. But even beginners can make use of the know-how of individual chapters. The way to the finished jacket is not short - but with the help of the tips and tricks from master tailor Sven Jungclaus and a little practice, first sewing successes can be achieved quickly ...
