World English National Geographic Winner - British Council Innovation in English Language Teaching Award 2006 This book was written for language teachers by language teachers, with a view to encouraging readers to use more tasks in their lessons, and to explore for themselves various aspects of task-based teaching and learning. It gives insights into ways in which tasks can be designed, adapted and

implemented in a range of teaching contexts and illustrates ways in which tasks and task-based learning can be investigated as a research activity. Practising language teachers and student professionals on MA TESOL/Applied Linguistics courses will find this a rich resource of varied experience in the classroom and a stimulus to their own qualitative studies.

A Synthesis of Over 800 Meta-Analyses Relating to Achievement

Heinle *ELT Teaching EFL Writing in the 21st Century Arab World* addresses a range of issues related to researching and teaching EFL writing in different countries in the Arab World including Egypt, Morocco, Oman, Palestine, Tunisia, UAE and Yemen. Both theoretically and practically grounded, chapters within discuss the different contexts in which EFL writing is taught, from primary school to university. The book sheds light on how EFL writing is learned and taught at each educational stage, exposing the different challenges encountered in the teaching and learning. The focus on EFL writing in the Arab World makes this a unique and long

overdue contribution to the field of research around EFL writing and will be an invaluable resource for researchers, curriculum designers and students.

An Introduction Heinle ELT

This unique and groundbreaking book is the result of 15 years research and syntheses over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers – an attention to setting challenging learning intentions, being clear about what success

means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

National Geographic Learning

David Nunan's dynamic learner-centered teaching style has informed and

inspired countless TESOL educators around the world. In this fresh, straightforward introduction to teaching English to speakers of other languages he presents teaching techniques and procedures along with the underlying theory and principles. Complex theories and research studies are explained in a clear and comprehensible, yet non-trivial, manner without trivializing them. Practical examples of how to develop teaching materials and tasks from sound principles provide rich illustrations of theoretical constructs. The content is presented through a lively variety of different textual genres including classroom vignettes showing language teaching in action, question and answer sessions, and opportunities to 'eavesdrop' on small group discussions among teachers and teachers in preparation. Readers get involved through engaging, interactive pedagogical features and opportunities for reflection and personal application. Each chapter follows the same format so that readers know what to expect as they work through the text. Key

terms are defined in a Glossary at the end of the book. David Nunan's own reflections and commentaries throughout enrich the direct, up-close style of the text.

World English Intro: Teacher's Edition Heinle
ELT

This volume offers fresh perspectives on a controversial issue in applied linguistics and language teaching by focusing on the use of the first language in communicative or immersion-type classrooms. It includes new work by both new and established scholars in educational scholarship, second language acquisition, and sociolinguistics, as well as in a variety of languages, countries, and educational contexts. Through its focus at the intersection of theory, practice, curriculum and policy, the book demands a reconceptualization of code-switching as something that both proficient and aspiring bilinguals do naturally, and as a practice that is

inherently linked with bilingual code-switching.
