CHAPTER 1
1.1 You are given the following differential equation with the initial

condition, $v(t=0) = 0$, $c dv g d v^2 dt m$. Multiply both sides $m dv m g v^2 c d dt c d$. Define $a mg c d m dv a^2 v^2 c d dt$. Integrate separation of variables, $dv cd a^2 v^2 m dt$. A table of integrals can be consulted to find that $2 dx x 1 \tanh 2 a a$. Therefore, the integration yields $1 v c \tanh \dots$
