Rocks of Ages: Developing Rock Art Tourism in Israel John Wiley & Sons
 London continues to fascinate a vast audience across the world, and an extensive, diverse literature now exists describing and analyzing this metropolis. The central question - what is London? - has produced many answers but none of them, the author argues, uncovers the complex ways in which knowledge is constructed in the diverse attempts to represent places and people. On the contrary: a gulf has opened up between analysis of contemporary London as a global, postcolonial city, on the one hand, and historical accounts of the imperial capital on the other. The author shows how the gap can be bridged by combining an analysis of the representation over time by various experts of London and certain localities with an investigation of the ways in which residents have represented their communities through struggles over symbolic and material resources.

 It is hard to imagine tourism without the creative use of seductive, as well as restrictive, imaginaries about peoples and places. These socially shared assemblages are collaboratively produced and consumed by a diverse range of actors around the globe. As a nexus of social practices through

which individuals and groups establish places and peoples as credible objects of tourism, "tourism imaginaries" have yet to be fully explored. Presenting innovative conceptual approaches, this volume advances ethnographic research methods and critical scholarship regarding tourism and the imaginaries that drive it. The various authors contribute methodologically as well as conceptually to anthropology's grasp of the images, forces, and encounters of the contemporary world.

This book provides an innovative perspective on migration, mobility and transport. Using concepts drawn from migration history, mobilities studies and transport history it makes the case for greater integration of these disciplines. The approach is historical, demonstrating how past processes of travel and population movement have evolved, examining the continuities and changes that have occurred, and arguing that many of the concepts used in mobilities studies today are equally relevant to the past. The three central chapters view past population movements through, respectively, the lenses of migration history, mobilities studies and transport. Two further chapters demonstrate the diversity of mobility experiences and the opportunities and difficulties of applying this approach in teaching and research. Extensive case study material from around the world is used, including personal diaries, which vividly recreate the everyday experiences of past mobilities. Population movement has never been of more importance globally: this book demonstrates how knowledge of past mobility experiences can inform our understanding of the present.
