3 Applications of the Derivative in

which  $v$  is nearly constant:  $f = vt$  is

completely false  $Af = vAt$  is nearly true  $df$

$= vdt$  is exactly true. For a brief moment

the function  $f(t)$  is linear and stays near its

tangent line. In Section 2.3 we found the

tangent line to  $y = f(x)$ . At  $x = a$ , the slope

of the curve and the slope of the line are

$f'(a)$ . Calculus Online Textbook Chapter 3 -
