Research and theory on self-esteem have flourished in recent years. This resurgence has produced multiple perspectives on fundamental issues surrounding the nature of self-esteem and its

role in psychological functioning and interpersonal processes. Self-Esteem Issues and Answers brings together these various perspectives in a unique format. The book is divided into five sections. Section I focuses on core issues pertaining to the conceptualization and assessment of self-esteem, and when self-esteem is optimal. Section II concentrates on the determinants, development, and modifiability of self-esteem. Section III examines the evolutionary significance of self-esteem and its role in psychological processes and therapeutic settings. Section IV explores the social, relational, and cultural significance of self-esteem. Finally, Section V considers future directions for self-

esteem researchers, practitioners, parents and teachers. This volume offers a wealth of perspectives from prominent researchers from different areas of psychology. Each expert contributor was asked to focus his or her chapter on a central self-esteem issue. Three or four experts addressed each question. The result is that *Self-Esteem Issues and Answers* provides a comprehensive sourcebook of current perspectives on a wide range of central self-esteem issues.

This clearly written textbook introduces the reader to the three styles of programming, examining object-oriented/imperative, functional, and logic programming. The focus of the text moves from highly prescriptive languages to very descriptive languages, demonstrating the many and varied ways in which we can think

about programming. Designed for interactive learning both inside and outside of the classroom, each programming paradigm is highlighted through the implementation of a non-trivial programming language, demonstrating when each language may be appropriate for a given problem. Features: includes review questions and solved practice exercises, with supplementary code and support files available from an associated website; provides the foundations for understanding how the syntax of a language is formally defined by a grammar; examines assembly language programming using CoCo; introduces C++, Standard ML, and Prolog; describes the development of a type inference system for the language Small.

Now available in three thematic volumes, the second edition of *Moral Issues in Global Perspective* is a collection of the newest and best articles on current moral issues by moral and political theorists from around the globe. Each volume seeks to challenge the standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America. Covering a broad range of issues and arguments, this collection includes critiques of traditional liberal accounts of rights, justice, and moral values, while raising questions about the treatment of disadvantaged groups within and across societies affected by globalization. Providing new perspectives on issues such as war and terrorism, reproduction, euthanasia, censorship, and the environment, each volume of *Moral Issues in Global Perspective* incorporates work by race, class, feminist, and disability theorists. *Human Diversity and*

Equality, the second of the three volumes, examines issues of equality and difference and the effects, within and across borders, of kinds of discrimination on the basis of race, ethnicity, gender, disability, class, and sexual orientation. Nine essays are new, four of which were written especially for this volume. Moral Issues in Global Perspective is available in three separate volumes—Moral and Political Theory, Human Diversity and Equality, and Moral Issues.

The collapse of the Christian worldview in America and the West is happening, to the utter shock of Christians. Why? They've been blind to the enemy's stealth attack on biblical history and authority, which has led multiple generations to abandon God's Word as their foundation. When our culture asks the questions dealt with in this book — and our kids parrot these questions and ideas heard from schools, libraries, movies, books, music, YouTube, social media, etc. — it must be remembered they're not innocent, unintentional questions. They stem fundamentally from a rejection of biblical authority. Quick Answers to Social Issues provides answers for some of the toughest questions of the day regarding: Marriage and sexuality from God's Word Response to the LGBTQ+ community Animal rights and the green movement The biblical response to racism It's imperative that Christians be ready to give answers to today's questions! Thus, the passion and purpose of this book is to equip you with clear, concise biblical answers to effectively stand on God's Word and boldly proclaim the gospel of Jesus Christ on the frontlines of today's battle!

The Social Studies Quick Answers to Social Issues

A bold vision about the ways companies will adapt and be reborn in a revolutionary world where business models implode and the search is on for what will work. The fate of newspapers and the music industry is a harbinger of what awaits every company: an aging business model in its death throes as people wake up to the grim fact that their products and the way they deliver them are out of sync not only with what customers want but how they want it. But commentator Michael Malone is back to make sense of this future: Survival will require companies to be "protean"--nimble shape-shifters able to change direction and identity in response to a rapidly evolving international marketplace. They must, in other words, act like perpetual entrepreneurial start-ups.--From publisher description.

Through extensive research and best practices of various schools nationwide, this book provides educators with solutions to the problems in our public schools. These solutions include articles on some of the latest federal programs afforded to state education agencies to address challenges plaguing public schools such as the No Child Left Behind Act. The book can be very helpful to school stakeholders such as parents, teachers, principals and

district administrators since the topics focus on the K-12 environments. With a plethora of references to support numerous suggestions, discrepancies and issues, this book can be useful to graduate students, professors, researchers, university administrators and education state agencies. In a proposal format, this book also provides a roadmap for successful and struggling schools in the U.S. with objectives, goals, strategies and performance measures.

Contract Law: A Case & Problem-Based Approach is a unique casebook that provides an organizational structure introducing

students to each major area of contract law before exploring these areas in greater depth later in the casebook. Specifically, the casebook is broken into three major parts, each of which is designed not only to orient the students to the major subject areas of contract law but also meant to help them appreciate the connections and relationships between and among these various subject areas. Part I, the "30,000-foot view," familiarizes students with contract law, discusses the sorts of problems with which contract law is concerned, and introduces them to some of the basic rules and theories governing contract law. Part II, the "10,000-foot view," exposes students to each major substantive area of contract law in more depth by discussing one classic case in each area, along with additional historical, theoretical, and contextual materials to supplement the black-letter doctrine. After finishing Parts I and II, the student will have a basic understanding of each major area of contract law, along with a good understanding of how these parts fit together. Part III is therefore designed to explore each of the major subject areas in greater depth, and is organized along the lines of a traditional contracts casebook, including a healthy mix of classic and modern cases, short problems, and exercises. New to the Second Edition: Additional materials and cases added to explore the contract doctrines of impossibility and impracticability in light of past and current epidemics (in the case of polio) and pandemics (in the case of COVID-19). Additional case added to explore the relationship between Contract Law, Civil Rights, and Constitutional Law. Reorganization of some materials in Chapter
