Energy Research Abstracts Routledge

Endorsed by Cambridge International Examinations An easy and cost-effective way to teach both the speaking and listening components. This title has been written for the latest Cambridge IGCSE English as a Second Language (0510 and 0511) syllabuses. - Prepares students for their exams with a focus on assessed language features, such as inference, opinion and attitude - Develops language abilities at an appropriate pace.

The Investor's Monthly Manual Hodder Education

Environmental Impact Assessment (EIA) is a fast-growing field of land-use planning affecting many disciplines. At present, UK Government legislation requires EIA for certain types of development. Subject to a further new European directive, an EIA will be required for all policies, plans and programmes. Planning and Environmental Impact Assessment in Practice provides a practical introduction to the subject and relates the theory to the practice through extensive use of case studies. Edited by Joe Weston, the book draws on contributions from a number of practising experts in the field and covers topics such as: assessing the need for EIAs; the environmental team; scoping and public participation; internal and external consultation; local lobbying; local authority review and decision-making; public enquiries; monitoring the impacts; pollution control; and the lessons to be learned. Planning and Environmental Impact Assessment in Practice provides a practical introduction to EIA for final year undergraduate and postgraduate MSc

courses in planning, geography, civil engineering, building and estate management, and development.
